Table of Contents

apter		Page
	Introduction to Ordinary Differential Equations	1
1.1	The Mass-Spring System	1
1.2	The Pendulum Problem	3
1.3	The Need for a Theory	4
1.4	First-Order Equations	5
1.5	Graphical Solution	6
1.7	Higher-Order Equations	8
1.8	Existence, Uniqueness, and Continuity	8
	Miscellaneous Exercises	12
	Methods of Solution	18
2.1	Variables Separable	18
2.2	Linear Equations of the First Order	25
2.3	Second-Order Equations Solvable by First-Order Methods	28
2.4	Geometry of First-Order Equations	32
2.5	A Numerical Method	33
	Miscellaneous Exercises	34

Chapter Page

3. Linear Differential Equations 47

3.1 Introduction 47

3.2 Linearity 48

3.3 Linear Homogeneous Equations 48

3.4 Solution of Linear Homogeneous Differential Equations of Second Order with Constant Coefficients 52

3.5 Linear Homogeneous Equations of Arbitrary Order with Constant Coefficients 56

3.6 A Special Linear Equation with Variable Coefficients (The Euler Equation) 57

3.7 Reduction of Order 58

3.8 Linear Nonhomogeneous Equations 59

3.9 Resonance 65

Miscellaneous Exercises 67

4. Series Solutions of Linear Differential Equations 77

4.1 Introduction 77

4.3 Second-Order Linear Equations with Analytic Coefficients 78

4.5 Singular Points of Linear Differential Equations 83

4.6 Solutions about a Regular Singular Point—Examples 85

4.7 Solutions about a Regular Singular Point—Theorem 87

4.8 Solutions about a Regular Singular Point—Exceptional Cases 91

4.9 The Bessel Equation and Some Properties of Bessel Functions 100

4.10 Singularities at Infinity 110

Chapter Page

4. 4.11 Irregular Singular Points 116

Miscellaneous Exercises 118

5. Boundary Value Problems 127

5.1 Introduction 127

5.2 Examples of Homogeneous Boundary Value Problems 128

5.3 Examples of Nonhomogeneous Boundary Value Problems—The Green's Function 131

5.4 Self-Adjoint Problems for the Operator $L(y) = -y''$ 136

Miscellaneous Exercises 137

6. Systems of Differential Equations 144

6.1 Introduction 144

6.2 Systems of First-Order Equations 145

6.3 The Gronwall Inequality 153

6.4 Linear Systems 153

6.5 Linear Homogeneous Systems 156

6.6 Linear Nonhomogeneous Systems 167

6.7 Linear Systems with Constant Coefficients 170

6.8 Asymptotic Behavior of Solutions of Linear Systems with Constant Coefficients 187

6.9 Autonomous Systems—Phase Space—Two-Dimensional Systems 188

Miscellaneous Exercises 190

Chapter		Page
7.	Existence Theory	195
	7.1 Existence of Solutions	195
	7.2 Uniqueness of Solutions	206
	7.3 Dependence on Initial Conditions and Parameters	207
	7.4 Existence Theory for Systems	208
	Miscellaneous Exercises	209
8.	Numerical Methods of Solution	225
	8.1 The Euler Method	225
	8.3 The Milne Method	229
	8.5 Runge-Kutta Methods	232
	8.6 Numerical Methods for Systems and Equations of Higher Order	233
	Miscellaneous Exercises	240
9.	The Laplace Transform	245
	9.2 Basic Properties of the Laplace Transform	245
	9.3 The Inverse Transform	247
	9.4 Applications to Linear Equations with Constant Coefficients	251
	9.5 Applications to Linear Systems	260
	Miscellaneous Exercises	266
