Preface	ix
Introduction. Reference formulas and curves	1
1 Variables, Functions, and Limits	13
1. Constants and Variables. 2. Functions. 3. Functional Notation. 4. Limit of a Variable. 5. Theorems on Limits. 6. Limit of a Function. 7. Infinity. 8. Continuity.	
2 Differentiation and Applications	19
9. Increments. 10. Derivative. 11. Derivatives of Powers of x . 12. Slope of a Curve. 13. Velocity and Acceleration. 14. Maxima and Minima; Critical Points. 15. Higher Derivatives. 16. Points of Inflection; Concavity. 17. Applications of Maxima and Minima. 18. Differentials. 19. Approximations and Errors.	
3 Integration of Powers	44
20. Integration. 21. Integration of Powers. 22. Constant of Integration. 23. Differential of Area. 24. Definite Integrals. 25. Calculation of Areas. 26. Fundamental Theorem. 27. Plane Areas in Rectangular Coordinates. 28. Volumes of Solids of Revolution.	
4 Applications of Integration	61
29. Moment of Mass; Centroids. 30. Centroid of a Plane Area. 31. Centroid of a Solid of Revolution. 32. Moment of Inertia; Radius of Gyration. 33. Moment of Inertia of an Area. 34. Moment of Inertia of a Solid of Revolution. 35. Fluid Pressure. 36. Work.	
5 Differentiation of Algebraic Functions	80
37. Introduction. 38. Formulas for Differentiation. 39. Formulas for Differentiation (<i>continued</i>). 40. Differentiation of Implicit Functions. 41. Summary of Formulas.	
6 Differentiation of Transcendental Functions	92
42. Transcendental Functions. 43. Properties of Trigonometric Functions. 44. Limit of $\sin \theta/\theta$. 45. Derivatives of Trigonometric Functions. 46. Properties of Inverse	

Contents

- Trigonometric Functions. 47. Derivatives of Inverse Trigonometric Functions. 48. Exponential and Logarithmic Functions. 49. Derivatives of Logarithmic Functions. 50. Derivatives of Exponential Functions. 51. Summary and Applications.
- 7 Parametric Equations, Curvature, and Roots 114**
52. Parametric Representations. 53. Derivatives in Parametric Form. 54. Differential of Arc Length. 55. Curvature. 56. Circle of Curvature. 57. Center of Curvature. 58. Evolutes. 59. Newton's Method.
- 8 Differentiation with Respect to Time 127**
60. Time-Rates. 61. Curvilinear Motion. 62. Tangential and Normal Components of Acceleration. 63. Angular Velocity and Acceleration.
- 9 Polar Coordinates 139**
64. Polar Coordinates. 65. Angle between the Radius Vector and Tangent. 66. Differential of Arc. 67. Curvature. 68. Radial and Transverse Components of Velocity and Acceleration.
- 10 Indeterminate Forms 149**
69. Rolle's Theorem. 70. Law of the Mean. 71. The Indeterminate Form $0/0$. 72. The Indeterminate Form ∞/∞ . 73. The Indeterminate Form $0 \cdot \infty$. 74. The Indeterminate Form $\infty - \infty$. 75. The Indeterminate Forms 0^0 , ∞^0 , 1^∞ .
- 11 Curve Tracing 157**
76. Graphs of Curves in Rectangular Coordinates. 77. Oblique Asymptotes Determined by Inspection. 78. Asymptotes to an Algebraic Curve. 79. Singular Points of Algebraic Curves. 80. Summary of Curve Tracing.
- 12 Integration Formulas 168**
81. Introduction. 82. Formulas of Integration. 83. Integration of Powers. 84. Integration of Exponential Functions. 85. Integration of Trigonometric Functions. 86. Transformations of Trigonometric Integrals. 87. Integrals Giving Inverse Trigonometric Functions. 88. Additional Formulas of Integration. 89. Improper Integrals.
- 13 Integration Procedures 187**
90. Introduction. 91. Integration by Parts. 92. Algebraic Substitutions. 93. Trigonometric Substitutions. 94. Integration of Rational Fractions. 95. Miscellaneous Substitutions. 96. Use of Integration Tables. 97. Approximate Integration. Trapezoidal Rule. 98. Simpson's Rule.

Contents

- 14 Additional Applications of Integration** 217
99. Area in Polar Coordinates. 100. Length of a Plane Curve. 101. Centroid and Moment of Inertia of Arc. 102. Surface of Revolution. 103. Volumes of Solids with Known Cross Sections. 104. Average Value.
- 15 Infinite Series** 231
105. Sequences and Series. 106. Convergent and Divergent Series. 107. Theorems on Convergence. 108. The Integral Test. 109. Comparison Tests. 110. Ratio Test. 111. Alternating Series. 112. Absolute and Conditional Convergence. 113. Power Series.
- 16 Expansion of Functions** 247
114. Introduction. 115. Maclaurin's Series. 116. Algebraic Operations with Power Series. 117. Differentiation and Integration of Power Series. 118. Approximation Formulas Derived from Power Series. 119. Taylor's Series. 120. Taylor's Theorem.
- 17 Hyperbolic Functions** 261
121. Definitions of the Hyperbolic Functions. 122. Identities Involving Hyperbolic Functions. 123. Derivatives and Integrals of Hyperbolic Functions. 124. The Inverse Hyperbolic Functions. 125. Derivatives of the Inverse Hyperbolic Functions. 126. Integrals Leading to Inverse Hyperbolic Functions. 127. Relations Between Trigonometric and Hyperbolic Functions. 128. Geometric Interpretation of Hyperbolic Functions.
- 18 Partial Differentiation** 272
129. Functions of Two or More Variables; Continuity. 130. Partial Derivatives. 131. Geometric Interpretation of Partial Derivatives. 132. Partial Derivatives of Higher Order. 133. Increment and Total Differential of a Function. 134. Approximations and Errors. 135. Total Derivatives. 136. Differentiation of Implicit Functions. 137. Tangent Line and Normal Plane to a Curve. 138. Normal Line and Tangent Plane to a Surface. 139. Maxima and Minima. 140. Taylor's Formula for Functions of Two Variables. 141. Sufficient Condition for a Maximum or Minimum.
- 19 Multiple Integrals** 298
142. Double Integrals. 143. Plane Areas by Double Integration. 144. Centroid and Moment of Inertia of a Plane Area. 145. Plane Areas in Polar Coordinates. 146. Volumes by Double Integration. 147. Volumes in Cylindrical Coordinates. 148. Areas of Curved Surfaces. 149. Triple

Integrals. 150. Volumes by Triple Integration. 151. Center of Gravity and Moment of Inertia of a Solid. 152. Triple Integrals in Cylindrical Coordinates. 153. Triple Integrals in Spherical Coordinates.

* 20	<u>Differential Equations</u>	327
	154. Definitions. 155. Solutions of Differential Equations. 156. Differential Equations of First Order and First Degree. 157. Linear Equations of the First Order. 158. Equations Reducible to Linear Equations. 159. Second Order Equations Reducible to First Order. 160. Linear Differential Equations of Order n . 161. Homogeneous Equations with Constant Coefficients. 162. Non-Homogeneous Equations with Constant Coefficients.	
	<i>Table of Integrals</i>	347
	<i>Numerical Tables</i>	354
	I. Powers, Roots, Reciprocals. II. Natural Logarithms. III. Exponential and Hyperbolic Functions. IV. Trigonometric Functions. V. Common Logarithms.	
	<i>Index</i>	363
