

**CONTENTS**

- 1. Basics of Engineering Materials 1**
  - 1.1 Introduction 1
  - 1.2 The Fundamental Terms 1
  - 1.3 The Material Properties 6
- 2. Stress and Strain 8**
  - 2.1 Introduction 8
  - 2.2 Stress 8
  - 2.3 Stress on an Inclined Angle 9
  - 2.4 Principal Stresses 10
  - 2.5 Mohr's Circle 11
  - 2.6 Strain 16
  - 2.7 Plane Stress and Strain 16
  - 2.8 Principal Strains 17
  - 2.9 Stress based on Measured Strain 18
  - 2.10 Stress State in Polar Coordinates 20
  - 2.11 Stress Field Around Circular Holes in Thin Plates 22
- 3. Stress Field Due to Pressure Conditions 28**
  - 3.1 Introduction 28
  - 3.2 Contact Stresses 28
  - 3.3 Thin-walled Spherical Pressure Vessels 34
  - 3.4 Thin-walled Cylindrical Pressure Vessels 35
  - 3.5 Thick-walled Cylinders Stresses 40
- 4. Failure Criteria 43**
  - 4.1 Introduction 43
  - 4.2 Material Failure 43
  - 4.3 Maximum Shear Stress Criterion 44
  - 4.4 Maximum Distortion Energy Criterion 45
  - 4.5 Maximum Normal Stress Criterion 46
  - 4.6 Mohr's Criterion 46
  - 4.7 Factor of Safety Calculations 47
- 5. Beam Analysis Theory 51**
  - 5.1 Introduction 51
  - 5.2 Boundary Conditions and Loading 51
  - 5.3 Shear and Moment Diagrams 52
  - 5.4 Beam Deflection 58
  - 5.5 Beam Bending 68
  - 5.6 Beam Shear 69
  - 5.7 Beam Torsion 72
  - 5.8 Curved Beam Theory 73
- 6. Plate Analysis Theory 83**
  - 6.1 Introduction 83
  - 6.2 Uniformly Loaded Circular Plates 83
  - 6.3 Center Loaded Circular Plates 87
  - 6.4 Uniformly Loaded Rectangular Plates 92
- 7. Elastic Stability and Buckling 96**
  - 7.1 Introduction 96
  - 7.2 Column Buckling Instability 96
  - 7.3 Column Buckling Under Combined Axial and Bending Loads 103
  - 7.4 Multiple Column System Buckling 106
  - 7.5 Buckling of Plates 108
- 8. Fatigue 112**
  - 8.1 Introduction 112
  - 8.2 Stress-Life S-N Curve 112
  - 8.3 Fatigue Crack Growth 116
- 9. Energy Methods 118**
  - 9.1 Introduction 118
  - 9.2 Strain Energy 118
  - 9.3 Castigliano's Theory 120
  - 9.4 Stress due to Impact by P.E. 125

<b>10. Numerical and Finite Element Methods</b>	<b>132</b>
10.1 Introduction	132
10.2 Stress on Truss Elements	132
10.3 Stress on Beam Members	146
<b>11. Composite Material Analysis</b>	<b>156</b>
11.1 Introduction	156
11.2 Orthotropic Lamina	156
11.3 Orthotropic Layers Oriented at an Arbitrary Angle	158
11.4 Analysis of Laminate	163
11.5 Effective Modulus of the Laminate	171
<b>12. Fastener and Joint Connections</b>	<b>173</b>
12.1 Introduction	173
12.2 Fastener-Connection Failure	173
12.3 Welded-Connection Failure	178
12.4 Eccentric Loading of Fasteners	179
12.5 Fastener Properties	181
<b>13. MathCAD Stress Analysis Simulations</b>	<b>184</b>
13.1 Introduction	184
13.2 Section Property Calculations	185
13.3 Stress Transformation and Principal Stresses	189
13.4 Hooke's law and Strain Transformation	191
13.5 Contact Stress	193
13.6 Pressure Vessel	194
13.7 Shear and Moment Diagrams	195
13.8 Curved Beam Theory	198
13.9 Deflection of Circular Plates	201
13.10 Deflection of Rectangular plates	207
13.11 Column Buckling	209
13.12 Plate Buckling	212
13.13 Finite Element of Truss Systems	213
13.14 Composite Laminate Lay-up Analysis	217
13.15 Eccentric loading of Fasteners	223
