

**CONTENTS**

Greek Alphabet	1
Part I-Probability and Statistics	
Central Measures	2
The M-Tiles	2
Measures of Dispersion and Skewness	3
The Class Interval	3
Least Squares	4
Simple correlation	4
Basic Concept for Algebra of Sets	6
Probability	8
General Linear Model	20
Simplified Computations for Multiple Regression	41
Finite Differences	47
Plans for Design of Experiments	63
Analysis of Variance (ANOVA) Table	105
Part II-NORMAL DISSTRICTION	
II.1 The Normal Probability Function and Related Functions	115
II.2 Tolerance Factors for Normal Distributions	125
II.3 Factors for Computing Probable Errors	130
II.4 Probability of Occurrence of Deviations	133
II.5 Probit Analysis	134
II.6 Circular Error Probabilities	146
II.7 Charts of Upper 1%, 2.5% and 5% Points of the distribution of the Largest Characteristic Root	149
Part III-BINOMIAL, POISSON, HYPERGEOMETRIC, AND NEGATIVE BINOMIAL DISTRIBUTIONS	
III.1 Individual Terms, binomial Distribution	162
III.2 Cumulative Terms, Binomial Distribution	168
III.4 Cumulative Terms, Poisson Distribution	180
III.5 Confidence Limits for Proportions	187
III.6 Confidence Limits for the Expected Value of a Poisson Distribution	190
III.7 Various Functions of $p$ and $q = 1 - p$	192
III.8 Hypergeometric Distribution	197
III.9 Negative Binomial Distribution	202
III.10 Percentage Points of the Betas Distribution	202
III.11 Tests of Significance in 2x2 Contingency Tables	218

Part IV-STUDENT'S T-DISTRIBUTION	
IV.1 Percentage Points, Student's t-Distribution	225
IV.2 Power function of the t-Test	227
IV.3 Number of Observations for t-Test of Mean	229
IV.4 Number of Observations for t-Test of Difference Between Two Means	231
Part V-CHI-SQUARE DISTRIBUTION	
V.1 Percentage Points, chi-square Distribution	225
V.2 Percentage Points, chi-square Over Degrees of Freedom Distribution	235
V.3 Number of Observations for the comparison of a Population Variance With a Standard Value Using the chi-square Test	239
Part VI-F-DISTRIBUTION	
VI.1 Percentage Points, F-Distribution	240
VI.2 Power Functions of the Analysis-of- Variance Tests	247
VI.3 Number of Observations Required for the Comparison of Two Population Variances Using the F-Test	2563
Part VII-ORDER STATISTICS	
VII.1 Expected Values of Order Statistics from a Standard Normal Population	258
VII.2 Variances and Covariance of Order Statistics	260
VII.3 Confidence Intervals for Medians	266
VII.4 Critical Values for Testing Outliners	267
VII.5 Percentile Estimates in Large Samples	268
VII 6 Simple Estimates in Small Samples	270
Part VIII-RANGE AND STUDENTIZED TANGE	
VIII.1 Probability Integral of the Range	273.
VIII 2 Percentage Points, ;Distribution of the Range	282
VIII 3 Percentage Points, Standardized Range	290
VIII 4 Substitute t-Ratios	290
VIII 5 Substitute F-Ratio	293
VIII 6 Analysis of Variance Based on Range	296
Part IX-CORRELATION COEFFICIENT	
IX.1 Percentage Points, Distribution of the Correlation Coefficient when $\rho = 0$	298
IX.2 Confidence Limits for the Population Correlation Coefficient	300
IX.3 The Transformation $Z = \tanh^{-1} r$ for the Correlation Coefficient	303
Part X-NON-PARAMETRIC STATISTICS	
X.1 Critical Values for the Sign Test	306
X.2 Critical Values of T in the Wilcoxon Matched –Pairs Signed –Ranks Test	308
X.3 Probabilities for the Wilcoxon (Mann-Whitney) Two-Sample Statistic	310
X.4 Critical Values of U in the Wilcoxon (Mann-Whitney) Two-Sample Statistic	314
X.5 Distribution the Total Number-of-Runs Test	317
X.6 Critical Values for the Kolmogotov-Smirnov One-Sample Statistic	321

X.7 Critical Values for the Dolmogorov-Skmirnov Two-Sample Statistic	323
X.8 Kruskal-Wallis one-way Analysis of Variance by Ranks	326
X.9 Critical Values of Superman's Tank Correlation Coefficient	329
X.10 Critical Values of Kendall's Rank Correlation Coefficient	331
Part XI-QUALITY CONTROL	
XI.1 Factors for Computing Control Limits	333
XI.2 Percentage Points of the Distribution of the Mean Deviation	337
Part XII-MISCELLANEOUS STATISTICAL TABLES	
XII.1 Number of Permutations	338
XII.2 Number of Combinations	339
XII.3 Random Units	341
XII.4 Random Normal Numbers, $u = 0, Q = 1$	346
XII.5 Random Normal Numbers, $u = 2, Q = 1$	356
XII.6 Random Normal Numbers, $u = 0, Q = 2$	361
XII.7 Orthogonal Polynomials	366
XII.8 Percentage Points of Pearson Curves	380
Part XIII-MISCELLANEOUS MATHEMATICAL TABLES	
XIII.1 Miscellaneous Constants	389
XIII.2 Numerical Constants	390
XIII.3 Radians to Degrees, Minutes, and Seconds	391
XIII.4 Natural Functions for Angles in Radians	392
XIII.5 Squares, Cubes, and Roots	394
XIII.6 Exponential Functions	411
XIII.7 Six-Place Logarithms	419
XIII.8 Natural or Naperian Logarithms	441
XIII.9 Factorials and Their Logarithms	449
XIII.10 Reciprocals of Factorials and Their Logarithms	451
XIII.11 Powers of Numbers	452
XIII.12 Sums of Powers of Integers	454
XIII.13 Integrals	456
XIII.14 Gamma Function	497
Index	499
