

Preface	v
1 INTRODUCTION AND SOME FUNDAMENTAL CONCEPTS	1
Exercises	8
2 DATA PRESENTATION	13
2.1 Tables	13
2.2 Graphical Presentations	14
Exercises	26
3 THE SUMMATION SIGN	31
Exercises	40
4 MEASURES OF CENTRAL TENDENCY AND VARIABILITY	47
4.1 The Mean	47
4.2 The Median	49
4.3 The Mode	52
4.4 The Geometric Mean	54
4.5 The Harmonic Mean	55
4.6 The Range	56
4.7 The Mean Absolute Deviation	56
4.8 The Variance	58
4.9 The Standard Deviation	59
4.10 The Coefficient of Variation	61
4.11 The Interquartile Deviation	62
Exercises	62
5 BASIC PROBABILITY THEORY	69
5.1 Preliminary Concepts	69
5.2 Definition of Probability	74
5.3 Conditional Probability	75
5.4 Permutations and Combinations	78

5.5	Two Sampling Procedures	82
	Exercises	85
6	RANDOM VARIABLES AND THREE POPULAR PROBABILITY DISTRIBUTIONS	93
6.1	Random Variables	93
6.2	Probability Distributions	96
6.3	The Bernoulli Probability Distribution	97
6.4	The Binomial Probability Distribution	98
6.5	The Normal Probability Distribution	101
6.6	The Standard Normal Distribution	105
	Exercises	108
7	NORMAL APPROXIMATION TO THE BINOMIAL AND FITTING THE NORMAL DISTRIBUTION	115
7.1	Normal Approximation to the Binomial	115
7.2	Fitting the Normal Distribution to an Observed Frequency Distribution	120
	Exercises	123
8	RANDOM SAMPLING FROM NORMAL POPULATIONS The Sampling Distribution of the Sample Mean and the Sampling Distribution of the Difference between Two Sample Means	127
8.1	Sampling Distributions	128
8.2	The Sampling Distribution of the Mean	129
8.3	The Sampling Distribution of the Difference of Two Means	134
	Exercises	137
9	SOME IMPORTANT SAMPLING DISTRIBUTIONS DERIVED FROM THE NORMAL DISTRIBUTION The Chi-Square, t, and F Distributions	141
9.1	The Chi-Square Distribution	141
9.2	The t Distribution	147
9.3	The F Distribution	156
	Exercises	162
10	POINT ESTIMATION OF PARAMETERS AND CONFIDENCE INTERVAL ESTIMATION OF THE MEAN AND THE DIFFERENCE OF TWO MEANS BASED ON THE STANDARD NORMAL DISTRIBUTION	169
10.1	Point Estimation	170
10.2	Confidence Interval Estimation	178
10.3	Confidence Interval for μ_X	179
10.4	Confidence Interval for the Difference $\mu_X - \mu_Y$	182
10.5	Large Sample Confidence Interval Estimation	183
	Exercises	186

11	SMALL SAMPLE CONFIDENCE INTERVAL ESTIMATION BASED ON THE t , χ^2 , AND F DISTRIBUTIONS AND DETERMINATION OF SAMPLE SIZE	191
11.1	Confidence Interval for the Mean μ_X Based on the t Distribution	191
11.2	Confidence Intervals for the Difference $\mu_X - \mu_Y$ Based on the t Distribution	194
11.3	Confidence Intervals for σ_X and σ_X^2 Based on the χ^2 Distribution	196
11.4	Confidence Interval for the Ratio σ_X/σ_Y or σ_X^2/σ_Y^2 Based on the F Distribution	198
11.5	Sample Size Determination Exercises	200 205
12	HYPOTHESIS TESTING AND TESTS OF HYPOTHESES BASED ON THE Z DISTRIBUTION	211
12.1	Concepts of Hypothesis Testing	211
12.2	Z Tests for the Mean μ_X	221
12.3	Z Tests for Equality of Two Means	224
12.4	Large Sample Z Tests Exercises	225 228
13	TESTS BASED ON THE t , χ^2 , AND F DISTRIBUTIONS	237
13.1	One-Tail and Two-Tail Tests	237
13.2	Pooled t Tests	240
13.3	Chi-Square Tests on the Standard Deviation or Variance	243
13.4	Chi-Square Goodness-of-Fit Test	245
13.5	Chi-Square Test of Independence	250
13.6	F Test on Equality of Two Standard Deviations or Variances Exercises	256 259
14	REGRESSION AND CORRELATION	269
14.1	Linear Regression Models	270
14.2	Least-Squares Estimation of the Slope and Intercept of a Regression Line	274
14.3	Confidence Interval Estimation and Tests of Hypotheses in Linear Regression	280
14.4	The Pearson Product-Moment Correlation Coefficient	283
14.5	Tests of Hypotheses and Confidence Interval Estimation for ρ Exercises	286 289
15	DESIGN AND ANALYSIS OF EXPERIMENTS	301
15.1	Preliminary Definitions	303
15.2	The Completely Randomized Design	308
15.3	Analysis of a Completely Randomized Design	310

15.4	Completely Randomized Design with Unequal Repetitions	315
15.5	The Randomized Complete Block Design	318
15.6	Analysis of a Randomized Complete Block Design	320
	Exercises	325
16	SAMPLE SURVEYS	331
16.1	Probability and Nonprobability Sampling	332
16.2	Simple Random Sampling	333
16.3	Use of Random Numbers in Drawing a Simple Random Sample	336
16.4	Population Parameters for Simple Random Sampling without Replacement	337
16.5	Estimation of Parameters in Simple Random Sampling without Replacement	338
16.6	Estimation Formulas when the Sample Data Are Arranged in a Frequency Distribution	342
16.7	Simple Random Sampling without Replacement to Estimate Proportions and Percentages	343
16.8	Size of a Simple Random Sample without Replacement	344
16.9	Stratified Simple Random Sampling	348
16.10	Population Parameters in Stratified Simple Random Sampling	349
16.11	Estimation of Parameters in Stratified Simple Random Sampling	351
16.12	Sample Size Allocation among the Strata for Given Overall Sample Size n	356
	Exercises	358
	Appendix: STATISTICAL TABLES	363
	Answers to Selected Exercises	391
	References	413
	Index	419
