

Contents

Chapter 1

Distributions of Random Variables

1

- 1.1 Introduction 1
- 1.2 Algebra of Sets 3
- 1.3 Set Functions 7
- 1.4 The Probability Set Function 11
- 1.5 Random Variables 14
- 1.6 The Probability Density Function 21
- 1.7 The Distribution Function 29
- 1.8 Certain Probability Models 36
- 1.9 Mathematical Expectation 41
- 1.10 Some Special Mathematical Expectations 46
- 1.11 Chebyshev's Inequality 54

Chapter 2

Conditional Probability and Stochastic Independence

57

- 2.1 Conditional Probability 57
- 2.2 Marginal and Conditional Distributions 61
- 2.3 The Correlation Coefficient 69
- 2.4 Stochastic Independence 76

Chapter 3

Some Special Distributions

86

- 3.1 The Binomial Distribution 86
- 3.2 The Poisson Distribution 94
- 3.3 The Gamma and Chi-Square Distributions 99
- 3.4 The Normal Distribution 104
- 3.5 The Bivariate Normal Distribution 111

*Chapter 4***Distributions of Functions of Random Variables**

- 4.1 Sampling Theory 116
- 4.2 Transformations of Variables of the Discrete Type 121
- 4.3 Transformations of Variables of the Continuous Type 125
- 4.4 The t and F Distributions 135
- 4.5 Extensions of the Change of Variable Technique 13
- 4.6 Distributions of Order Statistics 145
- 4.7 The Moment-Generating Function Technique 154
- 4.8 The Distributions of \bar{X} and nS^2/σ^2 163
- 4.9 Expectations of Functions of Random Variables 16

*Chapter 5***Limiting Distributions**

- 5.1 Limiting Distributions 171
- 5.2 Stochastic Convergence 175
- 5.3 Limiting Moment-Generating Functions 178
- 5.4 The Central Limit Theorem 182
- 5.5 Some Theorems on Limiting Distributions 186

*Chapter 6***Interval Estimation**

- 6.1 Random Intervals 190
- 6.2 Confidence Intervals for Means 193
- 6.3 Confidence Intervals for Differences of Means 199
- 6.4 Confidence Intervals for Variances 202
- 6.5 Bayesian Interval Estimates 207

*Chapter 7***Point Estimation and Sufficient Statistics**

- 7.1 The Problem of Point Estimation 212
- 7.2 A Sufficient Statistic for a Parameter 215
- 7.3 The Rao-Blackwell Theorem 223
- 7.4 Completeness 226
- 7.5 Uniqueness 229
- 7.6 The Exponential Class of Probability Density Functions 231
- 7.7 Functions of a Parameter 234
- 7.8 The Case of Several Parameters 237
- 7.9 Sufficiency, Completeness, and Stochastic Independence 243

Chapter 8

Further Topics in Point Estimation 248

- 8.1 The Rao-Cramér Inequality 248
- 8.2 Maximum Likelihood Estimation of Parameters 254
- 8.3 Decision Functions 258
- 8.4 Bayesian Procedures 261

Chapter 9

Statistical Hypotheses 265

- 9.1 Some Examples and Definitions 265
- 9.2 Certain Best Tests 272
- 9.3 Uniformly Most Powerful Tests 280
- 9.4 The Sequential Probability Ratio Test 285
- 9.5 Minimax and Bayesian Tests 290

Chapter 10

Other Statistical Tests 297

- 10.1 Likelihood Ratio Tests 297
- 10.2 Chi-Square Tests 308
- 10.3 The Distributions of Certain Quadratic Forms 316
- 10.4 A Test of the Equality of Several Means 321
- 10.5 Noncentral χ^2 and Noncentral F 325
- 10.6 The Analysis of Variance 327
- 10.7 A Regression Problem 335
- 10.8 A Test of Stochastic Independence 339
- 10.9 Multiple Comparisons 343

Chapter 11

Nonparametric Methods 348

- 11.1 Confidence Intervals for Distribution Quantiles 348
- 11.2 Tolerance Limits for Distributions 353
- 11.3 The Sign Test 357
- 11.4 A Test of Wilcoxon 359
- 11.5 The Equality of Two Distributions 365
- 11.6 The Mann-Whitney-Wilcoxon Test 371
- 11.7 Distributions under Alternative Hypotheses 376

Chapter 12

Further Normal Distribution Theory

12.1	The Multivariate Normal Distribution	379
12.2	The Distributions of Certain Quadratic Forms	384
12.3	The Independence of Certain Quadratic Forms	388
