Introduction by R. J. Donnelly . . . . .	ix
Editor's Foreword . . . . .	x

## Part I. In Kapitchnik

1. Visiting Shal'nikov . . . . .	1
2. With family . . . . .	4
3. Kapitsa . . . . .	6
4. An important day in my life . . . . .	8
5. Kapitsa's early years in the Soviet Union . . . . .	12
6. My father . . . . .	14
7. The assignment . . . . .	17
8. The master breaker . . . . .	19
9. Everything in great harmony . . . . .	23
10. In the director's chair for the first time . . . . .	28
11. The holy of holies . . . . .	30
12. The expansion engine . . . . .	35
13. A visit . . . . .	38
14. The essence of a discovery . . . . .	40
15. The way we lived . . . . .	43
16. A visit from Kapitsa . . . . .	45
17. Shoenberg interferes . . . . .	46
18. Visiting Kapitsa . . . . .	48
19. Aleksei Tolstoi visits the institute . . . . .	50
20. At the dacha . . . . .	51
21. The experiments continue . . . . .	53

## Part II. Landau

1. Landau, as he was . . . . .	55
2. The structure of heat . . . . .	63
3. I am in luck . . . . .	67
4. Rho-en to rho . . . . .	69
5. Truth is born in arguments . . . . .	71
6. Second sound . . . . .	75
7. Comrades in arms . . . . .	76
8. The experiment . . . . .	80

9. My best friend . . . . .	83
10. May Day celebrations . . . . .	87
11. A great scientist of our time . . . . .	90
12. The Academy of Sciences celebrates its anniversary . . . . .	92
13. Ya. I. Frenkel' . . . . .	94
14. Can an atomic bomb exist? . . . . .	96
15. Vacation . . . . .	99
16. Approval . . . . .	102
17. The new spectrum . . . . .	105
18. How does rho-en to rho really depend on temperature? . . . . .	106
19. Iraklii's guests . . . . .	108
20. Eta-en . . . . .	110
21. The "Landau correction" . . . . .	114
22. Shal'nikov . . . . .	116
23. Academician Evgenii Konstantinovich Zavoiskii . . . . .	119
24. A change of management . . . . .	122
25. The Dutch group . . . . .	127
26. Hypnosis . . . . .	129
27. Critical velocities . . . . .	135
28. The knight of science . . . . .	137
29. Scientific disagreements . . . . .	140
30. On a journey . . . . .	144
31. One more experiment . . . . .	147
32. The finishing touches . . . . .	149
33. Nikolai Nikolaevich . . . . .	152
34. Cultural guide . . . . .	153

### Part III. The Caucasian prisoner

1. All is lost . . . . .	157
2. I change my profession . . . . .	159
3. Under attack . . . . .	159
4. Is superfluidity destroyed at high velocities? . . . . .	163
5. An award . . . . .	166
6. A small shock from a small conference . . . . .	167
7. A most springy liquid . . . . .	170
8. Kapitsa in Tbilisi . . . . .	172
9. Meeting with English colleagues . . . . .	176
10. There are snipers in science, too . . . . .	178
11. Further competition with foreigners . . . . .	181
12. Landau celebrates his 50th birthday . . . . .	182
13. We are guests of English physicists . . . . .	183
14. Doctor Shoenberg and Professor Mott . . . . .	188
15. Hall and Vinen on home ground . . . . .	189

---

16. Businessmen . . . . .	191
17. Holland . . . . .	193
18. Expo-1958 . . . . .	196
19. LT-VI . . . . .	198
20. Feynman . . . . .	201
21. How scaling arose . . . . .	205
22. Fifth All-Union Conference on Low “Culture” . . . . .	208
23. A physicist or a general? . . . . .	211
24. An unusual consultation . . . . .	213
25. England, 1960 . . . . .	214
26. Scotland . . . . .	218
27. Peierls and others . . . . .	222
28. Thoughts of a music lover . . . . .	224

## Part IV. Niels Bohr in Georgia

1. From Moscow to Georgia . . . . .	227
2. In Kakhetia . . . . .	233
3. Guests of the Institute of Physics . . . . .	240
4. Departure . . . . .	244
5. Niels Bohr is dead . . . . .	247
6. A few more words about Niels Bohr . . . . .	248

## Part V. The 1960s: From the illness to the death of Landau

1. Landau's illness . . . . .	251
2. How are vortices born? . . . . .	254
3. An editorial task . . . . .	256
4. Hall pays a visit . . . . .	259
5. The central macroscopic vortex . . . . .	260
6. The Americans as listeners . . . . .	263
7. A conversation on the train and its consequences . . . . .	266
8. Yura and me . . . . .	268
9. LT-X and its guests . . . . .	269
10. Meetings with John Bardeen . . . . .	274
11. R. Shrieffer and K. Maki . . . . .	276
12. The people of my Kakhetia . . . . .	277
13. Italy—1966 . . . . .	281
14. Under critical fire . . . . .	283
15. The Orsay physics school . . . . .	286
16. The “Mistral” speeds us on . . . . .	288
17. A story of the Soviet ballet . . . . .	290

18. Bakuriani . . . . .	291
19. The ground state . . . . .	292
20. Bogolyubov . . . . .	294
21. The death of Landau . . . . .	296

## The fourth generation

1. A pulsar and a mini pulsar . . . . .	299
2. Quantum crystals . . . . .	301
3. It cannot be . . . . .	303
 Illustrations . . . . .	305
 Index . . . . .	313
