PREFACE	page vii
<b>1 CLASSIFICATION OF SOLIDS</b>	<b>1</b>
1. Introduction. The Solid State	1
2. Classification of Solids	4
<i>Molecular crystals</i>	5
<i>Covalent crystals</i>	9
<i>Ionic crystals</i>	16
<i>Metals</i>	22
<i>The hydrogen bond</i>	28
<b>2 THE CRYSTAL LATTICE</b>	<b>30</b>
1. Properties of Crystals	30
2. Quantitative Examination of Crystals	36
3. X-ray Examination of Crystals	50
4. Structure of Solid Substances	58
<i>Ionic solids</i>	58
<i>Silicates</i>	66
<i>Organic polymers</i>	74
5. 'Semi-Solid' States of Matter	78
<b>3 BAND THEORY OF SOLIDS: DISLOCATIONS, DEFECTS AND IMPURITIES IN SOLIDS</b>	<b>82</b>
1. Band Theory of Solids	82
2. Departure of Solids from Ideal Behaviour	91
<i>Dislocations</i>	91
<i>Defects</i>	95
3. Electrical Conductivity of Ionic Solids	98
4. Impurity Systems	100
<i>Non-stoichiometry</i>	101
<i>Foreign impurity atoms or ions</i>	104
5. Solid Solutions	106

<b>4 THE CHEMISTRY OF SOLID SURFACES</b>	<i>page</i> 111
1. Solid Surfaces	111
<i>Direct study of the properties of solid surfaces</i>	113
2. Adsorption of a Single Gas by a Solid	118
<i>Adsorption isotherms</i>	121
<i>Physical adsorption</i>	124
<i>Chemisorption</i>	126
3. Solid Catalysts	137
<i>Industrial catalysts</i>	139
<i>Mechanisms of catalytic reactions</i>	141
<i>Chemisorption bonds in catalysis</i>	153
<i>Catalysis in liquids</i>	154
4. The Solid-Liquid Interface	156
<b>5 REACTIONS OF SOLIDS</b>	163
1. Reactions of a Single Solid	165
<i>Thermal decomposition reactions</i>	166
<i>Kinetic characteristics of solid phase decomposition reactions</i>	170
<i>Initial deceleratory reaction</i>	182
<i>Arrhenius parameters</i>	182
<i>Arrhenius activation energy</i>	183
<i>Photolysis of solids</i>	184
<i>Self-heating and explosion</i>	186
2. Gas-Solid Reactions	189
<i>Powder reactants</i>	193
3. Liquid-Solid Reactions	194
4. Solid-Solid Reactions	195
<b>BIBLIOGRAPHY</b>	201
<b>INDEX</b>	205
