

CONTENTS

1. Introduction	3
2. Structural Requirements	3
3. Structural Types of Liquid Crystal Polymers	4
3.1 Main Chain Liquid Crystal Polymers	4
3.1.1 Copolymerisation	5
3.1.2 Crankshaft Monomers	5
3.1.3 Ring Substituents	5
3.1.4 Kinks	6
3.1.5 Flexible Spacers	6
3.2 Side Chain Liquid Crystal Polymers	7
3.3 Combined Liquid Crystal Polymers	8
3.4 Crosslinked Liquid Crystal Polymers/Liquid Crystal Elastomers	8
4. Chemical Realisation of Liquid Crystal Polymers	9
4.1 Synthetic Routes	9
4.2 Chemical Types of Liquid Crystal Polymers	9
4.3 Effect of Polymer Variables on Liquid Crystalline Behaviour	10
4.3.1 Molecular Weight	10
4.3.2 Molecular Weight Distribution	10
4.3.3 Monomer Sequence Distribution	10
5. Characterisation	11
5.1 Polarised Light Microscopy	11
5.2 Electron Microscopy	11
5.3 Differential Scanning Calorimetry	12
5.4 X-Ray Diffraction	12
5.5 Nuclear Magnetic Resonance	13
5.6 Dielectric Investigations	13
5.7 Neutron Scattering	13
5.8 Infra Red Spectroscopy	13
5.9 Electron Spin Resonance	14
5.10 Light Scattering	14

6. Orientation Processes	14
6.1 Flow	14
6.2 Electric and Magnetic Fields	14
6.3 Surface Interactions	15
7. Rheology and Processing	15
7.1 Rheology	15
7.2 Processing	16
7.2.1 Fibre	16
7.2.2 Film	16
7.2.3 Injection Moulding	16
8. Morphology	17
9. Properties	18
10. Filled Liquid Crystal Polymers and Composites	19
11. Liquid Crystal Polymer Blends and Molecular Composites	19
11.1 Liquid Crystal Polymer/Conventional Polymer Blends	19
11.2 Liquid Crystal Polymer/Liquid Crystal Polymer Blends	21
12. Commercialisation	21
13. Conclusion	22
Additional References	22
References and Abstracts	23
Index	101
