

CONTENTS

| | |
|------------------------------------------------------------------------------------|-----|
| The measurement of the optical transfer functions of lenses | 1 |
| Recent applications of semiconductor techniques in the study of nuclear radiations | 27 |
| The Gunn effect | 97 |
| Chemico-physical processes in shock waves | 149 |
| The theory of paramagnetic relaxation | 189 |
| Unitary symmetry | 227 |
| Nuclear reactors as research instruments | 285 |
| Plasma stability in magnetic traps | 333 |
