530.72 FRE

CONTENTS

1. Electrical Measurements 1
2. Magnetic Measurements 13
3. Vacuum Tubes and Amplifiers 22
4. Pulse Circuits 36
5. Rectifiers and Power Supplies 51
6. Oscillators 61
7. Magnet Design 66
8. Vacuum Techniques 79
9. Particle Counters; General Considerations 90
10. Ionization Chambers 96
11. Proportional Counters 107
12. Geiger Counters 115
13. Scintillation Counters 121
14. Nuclear Emulsions 128
15. Cloud Chambers 140
16. Particle Accelerators: General Considerations 149
17. Van de Graaff Electrostatic Accelerators 154
18. Linear Accelerators 167
19. Cyclotrons 179

20. Circular Electron Accelerators 190

21. Cosmic-ray Techniques 198

22. Mass Spectroscopy 206

23. Beta-ray Spectroscopy 217

24. Optical Spectroscopy 228

25. Microwave Spectroscopy 246

26. Molecular Beams 255

27. Magnetic Resonance Techniques 266

28. Pile Techniques 277

29. X-ray Diffraction 295

30. Low Temperatures 304

31. Laboratory Hazards 316

32. Design of Experiments 328

Index 345
