

# contents

- 1-1 Physical Quantities, Standards, and Units 3
  - 1-2 The International System of Units 4
  - 1-3 The Standard of Length 6
  - 1-4 The Standard of Mass 8
  - 1-5 The Standard of Time 9

## **1** *MEASUREMENT* 3

- 2-1 Vectors and Scalars 15
- 2-2 Addition of Vectors, Geometrical Method 16
- 2-3 Resolution and Addition of Vectors, Analytic Method 17
  - 2-4 Multiplication of Vectors 21
  - 2-5 Vectors and the Laws of Physics 24

## **2** *VECTORS* 15

- 3-1 Mechanics 30
  - 3-2 Particle Kinematics 30
    - 3-3 Average Velocity 31
    - 3-4 Instantaneous Velocity 32
  - 3-5 One-Dimensional Motion – Variable Velocity 33
    - 3-6 Acceleration 35
  - 3-7 One-Dimensional Motion – Variable Acceleration 37
  - 3-8 One-Dimensional Motion – Constant Acceleration 38
    - 3-9 Consistency of Units and Dimensions 40
    - 3-10 Freely Falling Bodies 43
  - 3-11 Equations of Motion in Free Fall 44

## **3** *MOTION IN ONE DIMENSION* 30

- 4-1 Displacement, Velocity, and Acceleration 53
- 4-2 Motion in a Plane with Constant Acceleration 54
  - 4-3 Projectile Motion 55
  - 4-4 Uniform Circular Motion 59
- 4-5 Tangential Acceleration in Circular Motion 63
  - 4-6 Relative Velocity and Acceleration 64

## **4** *MOTION IN A PLANE* 53

5-1 Classical Mechanics	72	<b>5</b>	
5-2 Newton's First Law	73		<b>PARTICLE DYNAMICS—I</b>
5-3 Force	76		<b>72</b>
5-4 Mass; Newton's Second Law	77		
5-5 Newton's Third Law of Motion	78		
5-6 Systems of Mechanical Units	81		
5-7 The Force Laws	82		
5-8 Weight and Mass	83		
5-9 A Static Procedure for Measuring Forces	85		
5-10 Some Applications of Newton's Laws of Motion	85		
6-1 Introduction	97	<b>6</b>	
6-2 Frictional Forces	97		<b>PARTICLE DYNAMICS—II</b>
6-3 The Dynamics of Uniform Circular Motion	102		<b>97</b>
6-4 Classification of Forces; Inertial Forces	106		
6-5 Classical Mechanics, Relativistic Mechanics, and Quantum Mechanics	107		
7-1 Introduction	116	<b>7</b>	
7-2 Work Done by a Constant Force	117		<b>WORK AND ENERGY</b>
7-3 Work Done by a Variable Force—One-Dimensional Case	121		<b>116</b>
7-4 Work Done by a Variable Force—Two-Dimensional Case	122		
7-5 Kinetic Energy and the Work-Energy Theorem	124		
7-6 Significance of the Work-Energy Theorem	127		
7-7 Power	127		
8-1 Introduction	134	<b>8</b>	
8-2 Conservative Forces	134		<b>THE CONSERVATION OF</b>
8-3 Potential Energy	137		<b>ENERGY</b>
8-4 One-Dimensional Conservative Systems	141		<b>134</b>
8-5 The Complete Solution of the Problem for One-Dimensional Forces Depending on Position Only	144		
8-6 Two- and Three-Dimensional Conservative Systems	147		
8-7 Nonconservative Forces	148		
8-8 The Conservation of Energy	151		
9-1 Center of Mass	162	<b>9</b>	
9-2 Motion of the Center of Mass	166		<b>CONSERVATION OF</b>
9-3 Linear Momentum of a Particle	168		<b>LINEAR MOMENTUM</b>
9-4 Linear Momentum of a System of Particles	169		<b>162</b>
9-5 Conservation of Linear Momentum	170		
9-6 Some Applications of the Momentum Principle	171		
9-7 Systems of Variable Mass	174		
10-1 What is a Collision?	187	<b>10</b>	
10-2 Impulse and Momentum	188		<b>COLLISIONS</b>
10-3 Conservation of Momentum during Collisions	189		<b>187</b>
10-4 Collisions in One Dimension	190		
10-5 The "True" Measure of a Force	196		
10-6 Collisions in Two and Three Dimensions	197		
10-7 Cross Section	201		
10-8 Reactions and Decay Processes	205		
11-1 Rotational Motion	215	<b>11</b>	
11-2 Rotational Kinematics—the Variables	217		<b>ROTATIONAL</b>
11-3 Rotation with Constant Angular Acceleration	218		<b>KINEMATICS</b>
11-4 Rotational Quantities as Vectors	220		<b>215</b>
11-5 Relation between Linear and Angular Kinematics for a Particle in Circular Motion—Scalar Form	223		

11-6 Relation between Linear and Angular Kinematics for a Particle in  
Circular Motion – Vector Form 224

**12**  
*ROTATIONAL DYNAMICS I*  
231

- 12-1 Introduction 231
- 12-2 Torque Acting on a Particle 231
- 12-3 Angular Momentum of a Particle 233
- 12-4 Systems of Particles 236
- 12-5 Kinetic Energy of Rotation and Rotational Inertia 237
- 12-6 Rotational Dynamics of a Rigid Body 242
- 12-7 The Combined Translational and Rotational Motion of a Rigid  
Body 248

**13**  
*ROTATIONAL  
DYNAMICS II AND  
THE CONSERVATION OF  
ANGULAR MOMENTUM*  
260

- 13-1 Introduction 260
- 13-2 The Top 260
- 13-3 Angular Momentum and Angular Velocity 263
- 13-4 Conservation of Angular Momentum 268
- 13-5 Some Other Aspects of the Conservation of Angular  
Momentum 272
- 13-6 Rotational Dynamics – A Review 274

**14**  
*EQUILIBRIUM OF RIGID  
BODIES*  
281

- 14-1 Rigid Bodies 281
- 14-2 The Equilibrium of a Rigid Body 281
- 14-3 Center of Gravity 283
- 14-4 Examples of Equilibrium 285
- 14-5 Stable, Unstable, and Neutral Equilibrium of Rigid Bodies in a  
Gravitational Field 291

**15**  
*OSCILLATIONS*  
299

- 15-1 Oscillations 299
- 15-2 The Simple Harmonic Oscillator 301
- 15-3 Simple Harmonic Motion 303
- 15-4 Energy Considerations in Simple Harmonic Motion 307
- 15-5 Applications of Simple Harmonic Motion 310
- 15-6 Relation between Simple Harmonic Motion and Uniform Circular  
Motion 316
- 15-7 Combinations of Harmonic Motions 318
- 15-8 Two-Body Oscillations 320
- 15-9 Damped Harmonic Motion 322
- 15-10 Forced Oscillations and Resonance 323

**16**  
*GRAVITATION*  
334

- 16-1 Historical Introduction 334
- 16-2 The Law of Universal Gravitation 338
- 16-3 The Constant of Universal Gravitation,  $G$  339
- 16-4 Inertial and Gravitational Mass 342
- 16-5 Variations in Acceleration Due to Gravity 344
- 16-6 Gravitational Effect of a Spherical Distribution of Mass 347
- 16-7 The Motions of Planets and Satellites 350
- 16-8 The Gravitational Field 353
- 16-9 Gravitational Potential Energy 354
- 16-10 Potential Energy for Many-Particle Systems 357
- 16-11 Energy Considerations in the Motions of Planets and  
Satellites 359
- 16-12 The Earth as an Inertial Reference Frame 360
- 16-13 The Principle of Equivalence 360

**17**  
*FLUID STATICS*  
370

- 17-1 Fluids 370
- 17-2 Pressure and Density 371
- 17-3 The Variation of Pressure in a Fluid at Rest 372
- 17-4 Pascal's Principle and Archimedes' Principle 376
- 17-5 Measurement of Pressure 377

18-1	General Concepts of Fluid Flow	385	<b>18</b>	
18-2	Streamlines	386	<b>FLUID DYNAMICS</b>	
18-3	The Equation of Continuity	387	<b>385</b>	
18-4	Bernoulli's Equation	389		
18-5	Applications of Bernoulli's Equation and the Equation of Continuity	391		
18-6	Conservation of Momentum in Fluid Mechanics	394		
18-7	Fields of Flow	394		
19-1	Mechanical Waves	404	<b>19</b>	
19-2	Types of Waves	405	<b>WAVES IN ELASTIC MEDIA</b>	
19-3	Traveling Waves	407	<b>404</b>	
19-4	The Superposition Principle	410		
19-5	Wave Speed	412		
19-6	Power and Intensity in Wave Motion	415		
19-7	Interference of Waves	417		
19-8	Complex Waves	419		
19-9	Standing Waves	420		
19-10	Resonance	424		
20-1	Audible, Ultrasonic, and Infrasonic Waves	433	<b>20</b>	
20-2	Propagation and Speed of Longitudinal Waves	434	<b>SOUND WAVES</b>	
20-3	Traveling Longitudinal Waves	436	<b>433</b>	
20-4	Standing Longitudinal Waves	439		
20-5	Vibrating Systems and Sources of Sound	440		
20-6	Beats	444		
20-7	The Doppler Effect	445		
21-1	Macroscopic and Microscopic Descriptions	457	<b>21</b>	
21-2	Thermal Equilibrium – The Zeroth Law of Thermodynamics	458	<b>TEMPERATURE</b>	
21-3	Measuring Temperature	459	<b>457</b>	
21-4	The Constant Volume Gas Thermometer	462		
21-5	Ideal Gas Temperature Scale	462		
21-6	The Celsius and Fahrenheit Scales	464		
21-7	The International Practical Temperature Scale	465		
21-8	Temperature Expansion	466		
22-1	Heat, a Form of Energy	475	<b>22</b>	
22-2	Quantity of Heat and Specific Heat	477	<b>HEAT AND THE FIRST LAW</b>	
22-3	Molar Heat Capacities of Solids	479	<b>OF THERMODYNAMICS</b>	
22-4	Heat Conduction	480	<b>475</b>	
22-5	The Mechanical Equivalent of Heat	482		
22-6	Heat and Work	483		
22-7	The First Law of Thermodynamics	486		
22-8	Some Applications of the First Law of Thermodynamics	488		
23-1	Introduction	497	<b>23</b>	
23-2	Ideal Gas – A Macroscopic Description	498	<b>KINETIC THEORY OF</b>	
23-3	An Ideal Gas – Microscopic Definition	500	<b>GASES – I</b>	
23-4	Kinetic Calculation of the Pressure	501	<b>497</b>	
23-5	Kinetic Interpretation of Temperature	504		
23-6	Intermolecular Forces	506		
23-7	Specific Heats of an Ideal Gas	507		
23-8	Equipartition of Energy	512		
24-1	Mean Free Path	522	<b>24</b>	
24-2	Distribution of Molecular Speeds	524	<b>KINETIC THEORY OF</b>	
24-3	Experimental Confirmation of the Maxwellian Distribution	527	<b>GASES – II</b>	
24-4	Brownian Motion	529	<b>522</b>	
24-5	The van der Waals Equation of State	531		

25-1	Introduction	539
25-2	Reversible and Irreversible Processes	539
25-3	The Carnot Cycle	541
25-4	The Second Law of Thermodynamics	545
25-5	The Efficiency of Engines	547
25-6	The Thermodynamic Temperature Scale	549
25-7	Entropy – Reversible Processes	550
25-8	Entropy – Irreversible Processes	553
25-9	Entropy and the Second Law	555
25-10	Entropy and Disorder	557
