|   |      |   |     |
|---|------|---|-----|
| <b>Introduction</b>                           | xvii | 4.4 Conservation of Energy                      | 60  |
| <b>1 Measurement</b>                          | 2    | 4.5 Forms and Sources of Energy                 | 63  |
| 1.1 The Senses                                | 3    | <b>5 Temperature and Heat</b>                   | 68  |
| 1.2 Concepts and Fundamental Quantities       | 4    | 5.1 Temperature                                 | 69  |
| 1.3 Standard Units                            | 6    | 5.2 Heat  | 72  |
| 1.4 Derived Quantities and Conversion Factors | 10   | 5.3 Specific Heat and Latent Heat               | 73  |
| 1.5 Measurement of Circles                    | 12   | 5.4 Thermodynamics                              | 76  |
| 1.6 Experimental Error                        | 13   | 5.5 Heat Transfer                               | 80  |
| 1.7 Powers-of-Ten Notation                    | 14   | 5.6 Phases of Matter                            | 83  |
| <b>2 Motion</b>                               | 18   | 5.7 The Gas Laws and Kinetic Theory             | 84  |
| 2.1 Straight-line Motion                      | 19   | <b>6 Waves</b>                                  | 90  |
| 2.2 Speed and Velocity                        | 19   | 6.1 Waves Properties                            | 92  |
| 2.3 Acceleration                              | 22   | 6.2 Electromagnetic Waves                       | 94  |
| 2.4 Acceleration in Uniform Circular Motion   | 26   | 6.3 Sound Waves                                 | 95  |
| 2.5 Projectile Motion                         | 27   | 6.4 Standing Waves and Resonance                | 100 |
| <b>3 Force and Motion</b>                     | 32   | 6.5 The Doppler Effect                          | 105 |
| 3.1 Newton's First Law of Motion              | 33   | <b>7 Wave Effects</b>                           | 110 |
| 3.2 Newton's Second Law of Motion             | 36   | 7.1 Reflection                                  | 111 |
| 3.3 Newton's Law of Gravitation               | 40   | 7.2 Refraction and Dispersion                   | 113 |
| 3.4 Newton's Third Law of Motion              | 44   | 7.3 Diffraction, Interference, and Polarization | 118 |
| 3.5 Momentum                                  | 45   | 7.4 Spherical Mirrors                           | 122 |
| <b>4 Work and Energy</b>                      | 52   | 7.5 Lenses                                      | 126 |
| 4.1 Work                                      | 53   | <b>8 Electricity and Magnetism</b>              | 134 |
| 4.2 Power                                     | 56   | 8.1 Electric Charge                             | 136 |
| 4.3 Kinetic Energy and Potential Energy       | 57   | 8.2 Electricity                                 | 139 |
|   |      | 8.3 Magnetism                                   | 148 |
|   |      | 8.4 Electromagnetism                            | 153 |
|   |      | 8.5 Electronics                                 | 157 |

- 9 Atomic Physics 162**
- 9.1 The Dual Nature of Light 163
  - 9.2 The Bohr Theory of the Hydrogen Atom 166
  - 9.3 Quantum-Physics Applications 170
  - 9.4 Matter Waves and Quantum Mechanics 174
  - 9.5 Atomic Quantum Numbers 179
  - 9.6 Multielectron Atoms and the Periodic Table 180
- 10 Nuclear Physics 188**
- 10.1 The Atomic Nucleus 189
  - 10.2 Nuclear Stability 192
  - 10.3 Radioactive Decay 196
  - 10.4 Nuclear Reactions 200
  - 10.5 Fission and Fusion 202
- 11 The Periodic Table 210**
- 11.1 Elements 211
  - 11.2 The Periodic Table 217
  - 11.3 Classification of Elements 218
  - 11.4 Periodic Characteristics 221
  - 11.5 Groups of Elements 222
- 12 Compounds, Molecules, and Ions 228**
- 12.1 Principles of Compound Formation 229
  - 12.2 Ionic Compounds 230
  - 12.3 Properties of Ionic Compounds 232
  - 12.4 Covalent Compounds 234
  - 12.5 Properties of Covalent Compounds 237
  - 12.6 Oxidation Number 239
  - 12.7 Naming Compounds 240
  - 12.8 Carbon and Some Simple Organic Compounds 240
- 13 Some Chemical Principles 248**
- 13.1 Types of Matter 249
  - 13.2 Early Chemical Laws 251
  - 13.3 Atomic and Molecular Weights 253
  - 13.4 Molecular Volumes 254
  - 13.5 Avogadro's Number 257
  - 13.6 Solutions 258
- 14 Chemical Reactions 264**
- 14.1 Basic Concepts 265
  - 14.2 Energy and Rate of Reaction 268
  - 14.3 Oxidation-Reduction Reactions 270
  - 14.4 Electrochemical Reactions 272
  - 14.5 Acids and Bases 274
  - 14.6 Acids and Bases in Solution 278
- 15 Complex Molecules 282**
- 15.1 Common Organic Compounds 283
  - 15.2 Biochemistry 286
  - 15.3 The Ingredients of Life and the Genetic Code 293
  - 15.4 Artificial Molecules—Plastics 297
  - 15.5 Drugs 299
- 16 The Solar System 304**
- 16.1 The Planet Earth 305
  - 16.2 The Solar System 309
  - 16.3 The Inner Planets 317
  - 16.4 The Outer Planets 324
  - 16.5 The Origin of the Solar System 334
  - 16.6 Other Solar Systems 337
- 17 Place and Time 340**
- 17.1 Cartesian Coordinates 341
  - 17.2 Latitude and Longitude 342
  - 17.3 Time 343
  - 17.4 The Seasons 346
  - 17.5 Precession of the Earth's Axis 349
  - 17.6 The Calendar 351
- 18 The Moon 356**
- 18.1 General Features 357
  - 18.2 History of the Moon 359
  - 18.3 Lunar Motion 361
  - 18.4 Phases 362

- 18.5 Eclipses 365
- 18.6 Tides 368
- 19 The Universe 374**
  - 19.1 The Sun 375
  - 19.2 The Celestial Sphere 378
  - 19.3 Stars 381
  - 19.4 Gravitational Collapse and Black Holes 386
  - 19.5 Galaxies 387
  - 19.6 Quasars 393
  - 19.7 Cosmology 393
- 20 The Atmosphere 398**
  - 20.1 Composition 399
  - 20.2 Origin 400
  - 20.3 Vertical Structure 401
  - 20.4 Energy Content 405
  - 20.5 Atmospheric Measurements 412
- 21 Winds and Clouds 422**
  - 21.1 Causes of Air Motion 423
  - 21.2 Local Winds and World Circulation 426
  - 21.3 Jet Streams 430
  - 21.4 Cloud Classification 431
  - 21.5 Cloud Formation 435
  - 21.6 Condensation and Precipitation 437
- 22 Air Masses and Storms 444**
  - 22.1 Air Masses 445
  - 22.2 Fronts and Cyclonic Disturbances 447
  - 22.3 Local Storms 449
  - 22.4 Tropical Storms 457
- 23 Weather Forecasting 464**
  - 23.1 The National Weather Service 465
  - 23.2 Data Collection and Weather Observation 467
  - 23.3 Weather Maps 473
  - 23.4 Folklore and the Weather 479
- 24 Pollution and Climate 484**
  - 24.1 Pollutants 485
  - 24.2 Sources of Pollution 490
  - 24.3 The Cost of Pollution 496
  - 24.4 Pollution, Weather, and Climate 500
- 25 Minerals and Rocks 508**
  - 25.1 Minerals 509
  - 25.2 Rocks 514
  - 25.3 Igneous Rock 516
  - 25.4 Igneous Activity 517
  - 25.5 Sedimentary Rocks 524
  - 25.6 Metamorphic Rocks 529
- 26 Structural Geology 534**
  - 26.1 Earthquakes and Structural Geology 535
  - 26.2 Continental Drift and Seafloor Spreading 542
  - 26.3 Plate Tectonics 547
- 27 Isostasy and Diastrophism 552**
  - 27.1 Isostasy 553
  - 27.2 Rock Deformation 554
  - 27.3 Mountain Building 556

  - 28.1 Relative Geologic Time 563
  - 28.2 Atomic Geologic Time 566
  - 28.3 Geologic Time Scale 568
- 29 Surface Processes 572**
  - 29.1 Weathering and Mass Wasting 573
  - 29.2 Agents of Erosion 577
  - 29.3 Earth's Water Supply 580
  - 29.4 The Oceans and Seafloor Topography 585

**Appendixes 593**

Appendix I The Seven Base Units of the International System of Units 593

Appendix II Measurement and Significant Figures 593

Appendix III Rules and Examples of the Four Basic Mathematical Operations Using Powers-of-10 Notation 595

Appendix IV Problem Solving: Five Major Steps 595

Appendix V Derivation of Bohr's Equations 599

Appendix VI Length Contraction, Time, Dilation, and Relativistic Mass Increase 600

Appendix VII Psychometric Tables 601
