Foreword	iii
Contents	v
Participants	ix
SESSION 1	
✓ Microporous structures of carbonaceous adsorbents, M.M. Dubinin	1
Micropore structure analysis from adsorption isotherms of vapours, Ondřej Kadlec	13
✓ The adsorption of simple gases by strongly activated carbons, in relation to heterogeneity. An extension of the Dubinin theory for micropore filling, H.F. Stoeckli, J. Ph. Houriet, A. Perret and U. Huber	31
High resolution electron microscopy of microporous carbons, J.R. Fryer	41
Origins of microporosity, mesoporosity and macroporosity in carbons and graphites, Margaret Evans and Harry Marsh	53
✓ The development of porosity in group components of brown coals on carbonisation and activation. Franciszek Czechowski, Anna Jankowska, Harry Marsh, Teresa Siemieniowska and Kazimierz Tomkow	67
✓ The development of the structure of microporous carbons, Kenneth J. Masters and Brian McEnaney	79
The influence of porosity on the heats of wetting of charcoals and charcoal cloths, Frederick A.P. Maggs and George A. Robins	89
Discussion on Session 1	97
SESSION 2	
Calorimetric study of nitrogen and argon adsorption on porous silicas, Jean Rouquèrol, Françoise Rouquèrol, Claude Pérès, Yves Grillet and Méziane Boudellal	107
Formation and characteristics of microporosity in dehydrated microcrystalline gibbsite, John D.F. Ramsay and Ronald G. Avery	117
Evolution of pore structure in the thermal decomposition of chromium dioxide, R. Sáez Puche and M.A. Alario Franco	127

Micropore filling of amorphous microporous alumina as determined by dynamic gas chromatography, Gérard Pajonk, Bernard Pommier, Monique Reppelin and Stanislas Teichner	135
Discussion on Session 2	147
 SESSION 3	
Diffusion and flow in porous zeolite, carbon or ceramic media, Richard M. Barrer	155
Kinetics and equilibrium in micropore filling, Chaim Aharoni and Yaacov Suzin	173
Fundamental properties of activated carbons: effect on rate controlling steps in gas sorption, Leonard A. Jonas	181
A numerical simulation method for the sorption of organic gases in fixed beds of active carbon, Ueli Huber	191
Intrinsic and self-diffusion of hydrocarbons in decationated chabazite, Geoffrey I. Lindsley and Lovat V.C. Rees	205
Equilibrium and flow studies of model pore systems, David Nicholson and John H. Petropoulos	211
Discussion on Session 3	223
 SESSION 4	
Capillary condensation, Douglas H. Everett	229
Mechanistic aspects of capillary hysteresis in pore networks, P.H. Doe and J.M. Haynes	253
A comparison of mercury porosimetry, gas adsorption and dye adsorption data on a series of mesoporous silica gel materials, Charles H. Giles, D. Colin Havard, William McMillan, Thomas Smith and Raymond Wilson	267
Combined computer-controlled operation of gravimetric sorption and mercury porosimetry equipment, G.C. Allen	285
Comparative study of the porosity of supports by means of adsorption, mercury penetration and fluid displacement methods, K.K. Unger, St. Doeller and K.F. Krebs	291
Stimulation of porous materials, Anatolii P. Karnaukhov	301
Use of specific surface measurements for investigations of solid state reactions, Rudolf Giovanoli, Rudolf Brütsch, Willi Stadelmann and Peter Bürki	313

Direct measurement of net heat of adsorption; application to the interaction between water vapour and impregnated active carbon, Jacques J.G.M. van Bokhoven and Jan Medema	321
Discussion on Session 4	
SESSION 5	
The porous nature of pulpwood fibres, John W. Swanson	339
Pore structure in lunar soils, D. Allan Cadenhead, Myron G. Brown and David K. Rice	343
Porosity of absorbents for desulphurisation of industrial flue gases, Douglas R. Glasson and Peter O'Neill	351
The porosity and ageing of copper phthalocyanine pigments, Christopher R.S. Dean, Robert R. Mather, David L. Segal and Kenneth S.W. Sing	359
The influence of microstructure on liquid capillary penetration into porous drug carriers, F. Carli and P. Italiano	369
Incorporation of model drugs into porous alumina and measurement of the release rate, E. Robens, W. Baukal, G. Böhme, H-J. Kinkel, E-G. Kohl and W. Schönborn	375
Study of nitrogen and hexane adsorption on hydrocarbon chains grafted onto silica, Z. Kessaissia, E. Papirer, A.A. Rahman and J.B. Donnet	379
Discussion on Session 5	385
Author index	391
