

CONTENTS

<b>1. Elements of Fluid Mechanics and Unit Operations . . . . .</b>	<b>1</b>
Introduction and Scope . . . . .	1
Units of Measure . . . . .	2
Prefixes for Decimal Multiples and Submultiples of SI Units . . .	5
Industrial Stoichiometry . . . . .	12
Fundamental Quantities of Matter . . . . .	12
Internal Energy and the First Law of Thermodynamics . . . . .	16
Enthalpy . . . . .	18
Heat Capacity and Specific Heat . . . . .	18
Properties of the Ideal Gas . . . . .	20
Behavior of Fluids . . . . .	24
Time-Independent Fluids . . . . .	28
Time-Dependent Fluids . . . . .	35
Viscoelastic Fluids . . . . .	37
Types of Operations and Approaches to Problem Analysis. . . . .	39
<b>2. Principles of Similarity, Modeling and Dimensional Analysis . . . . .</b>	<b>45</b>
Introduction . . . . .	45
Principles of Similarity Theory . . . . .	46
Methods of Similarity Theory . . . . .	49
Newton's Theorem . . . . .	50
Derivation of Dimensionless Groups from Process-	
Governing Equations . . . . .	54
Dimensional Analysis . . . . .	58
Buckingham Pi Theorem . . . . .	61
Federman-Buckingham's Theorem . . . . .	62
Kirpichev-Guckhman's Theorem . . . . .	64
Principles and Methods of Modeling Unit Operations . . . . .	65

<b>3.</b>	<b>Classification of Hydraulic Processes . . . . .</b>	<b>75</b>
	Introduction . . . . .	75
	Basic Definitions . . . . .	76
	Physical Properties of Fluids . . . . .	78
	Density and Specific Gravity . . . . .	78
	Viscosity . . . . .	79
	Pressure and Surface Tension . . . . .	86
	Liquid Pressure . . . . .	86
	Surface Tension . . . . .	87
<b>4.</b>	<b>Principles of Hydrostatics . . . . .</b>	<b>93</b>
	Introduction . . . . .	93
	Euler's Differential Equations . . . . .	94
	The Basic Equation of Hydrostatics . . . . .	96
	Application of Hydrostatic Principles to Manometric Techniques . . . . .	98
	Pressure Forces Acting on Submerged Flat Surfaces . . . . .	110
	Hydrostatic Machines . . . . .	121
<b>5.</b>	<b>Internal Problems of Hydrodynamics: Single-Fluid Flows . . . . .</b>	<b>129</b>
	Introduction . . . . .	130
	Characteristics of Fluids in Motion . . . . .	130
	Steady-State versus Transient Flows . . . . .	130
	Fluid Mass and Linear Velocities . . . . .	132
	Residence Time . . . . .	136
	Regimes of Flow . . . . .	140
	Laminar versus Turbulent Flows . . . . .	140
	Turbulence . . . . .	147
	Continuity Equation . . . . .	152
	Equations of Motion for Ideal Fluids . . . . .	155
	Differential Equations for Viscous Fluids . . . . .	157
	Navier-Stokes Equations . . . . .	157
	Transformation Techniques . . . . .	163
	The Total Energy Balance . . . . .	166
	Discharge of Gases . . . . .	168
	Gas Flow Through Piping . . . . .	175
	The Bernoulli Equation . . . . .	191
	General Application . . . . .	191
	Variable-Head Meters . . . . .	200
	Efflux from Vessels and Pipes . . . . .	210

Hydraulic Resistances in Pipe Flow . . . . .	219
Flow Through Pipes . . . . .	219
Flow Through Varying Cross Sections . . . . .	234
Flow Through Piping Components . . . . .	245
Velocity Dampening . . . . .	261
Flow Normal to Tube Banks . . . . .	264
Optimum Pipe Diameter . . . . .	268
Flow of Liquid Films . . . . .	278
Vertical Film Flow . . . . .	278
Wavy Flow . . . . .	289
Turbulent Film Flow . . . . .	294
<b>6. Fluid Transport by Pumps . . . . .</b>	<b>319</b>
Introduction . . . . .	319
Liquid Transportation by Pumps . . . . .	320
Classifications and Characteristics . . . . .	320
Head and Suction Head . . . . .	323
Cavitation . . . . .	327
Centrifugal Pumps . . . . .	329
Types and Applications . . . . .	329
Basic Equations for Centrifugal Machines . . . . .	348
Positive Displacement Pumps . . . . .	363
Reciprocating Pumps . . . . .	363
Rotary Pumps . . . . .	371
Diaphragm Pumps . . . . .	380
Pumps of Special Design . . . . .	387
Pump Selection Criteria . . . . .	395
<b>7. Gas Compression and Transportation . . . . .</b>	<b>411</b>
Introduction . . . . .	411
Classification of Compression Machines . . . . .	412
Thermodynamic Principles of Compression . . . . .	418
Operational Control of Piston Compressors . . . . .	434
Miscellaneous Compressor Designs . . . . .	449
Dynamic-Type Centrifugal Machines . . . . .	453
Fans . . . . .	455
Design Principles for Centrifugal Fans . . . . .	458
Blowers . . . . .	471
Centrifugal Compressors . . . . .	474
Compressor Selection . . . . .	480

<b>8.</b>	<b>Introduction to Heterogeneous Systems and External Problems of Hydrodynamics . . . . .</b>	<b>495</b>
	Introduction . . . . .	495
	Classification of Heterogeneous Systems . . . . .	496
	Classification of Separation Methods. . . . .	498
	Material Balances of Separations . . . . .	499
	Separation Effect Number . . . . .	504
<b>9.</b>	<b>Principles and Practices of Particle Sedimentation . . . . .</b>	<b>511</b>
	Introduction . . . . .	511
	Single-Particle Motion . . . . .	513
	Pressure and Drag Force . . . . .	513
	Particle Settling by Gravity Force . . . . .	516
	Gravity Sedimentation . . . . .	521
	Thickeners and Clarifiers . . . . .	521
	Principles of Sedimentation . . . . .	528
	Application of Dimensional Analysis to Particle Settling . . . . .	537
	Design Methodology . . . . .	551
	Unsteady Particle Motion in Fluids . . . . .	556
	Transient Particle Settling . . . . .	556
	Particle Injection into Flowing Streams . . . . .	561
	Particle Separation from Gas Streams . . . . .	565
	Gravitational Separation . . . . .	565
	Electrostatic Precipitation . . . . .	569
<b>10.</b>	<b>Centrifugal Separation Techniques . . . . .</b>	<b>581</b>
	Introduction . . . . .	582
	Cyclone Separators . . . . .	582
	Operating Principles . . . . .	583
	Collection Efficiency . . . . .	588
	Pressure Drop . . . . .	595
	Operating Schemes and Design Principles . . . . .	597
	Hydroclones . . . . .	608
	Sedimentation Centrifuges . . . . .	612
	General Principles . . . . .	612
	Tubular-Bowl Centrifuges . . . . .	615
	Multichamber (Multipass) Centrifuges . . . . .	616
	Solid-Bowl Centrifuges . . . . .	618
	Separation Rates in Tubular- and Solid-Bowl Centrifuges . . . . .	622
	Estimating Capacities of Tubular and Solid-Bowl Centrifuges . . . . .	627
	Analysis of the Centrifugal Process . . . . .	634

Outlet Dam Settings for Liquid-Liquid Separations . . . . .	642
Disk-Bowl Centrifuges . . . . .	643
Analysis of Disk Centrifuge Operations . . . . .	646
Power Requirements for Centrifugation . . . . .	652
Analysis of Stresses in Centrifuge Walls . . . . .	660
Selecting Separation Equipment . . . . .	665
<b>11. Mixing Theory and Practice . . . . .</b>	<b>675</b>
Introduction . . . . .	676
Mechanical Mixing Devices . . . . .	677
Propeller Mixers . . . . .	678
Turbine Mixers . . . . .	680
Paddle Mixers . . . . .	687
Emulsifiers, Blenders and Planetary Mixers . . . . .	690
Flow Patterns in Agitated Tanks . . . . .	696
The Mixing of Heterogeneous Fluid Systems . . . . .	705
Basic Dimensionless Groups for Mixed Liquid Flow . . . . .	713
Hydrodynamic Head and Pumping Capacity . . . . .	716
Power Input in Agitated Tanks . . . . .	721
Design of Paddle Mixers . . . . .	734
Design of Anchor Mixers . . . . .	737
Design of Miscellaneous Mixers . . . . .	745
Selection of Rotational Speed . . . . .	755
Rate of Homogenization . . . . .	757
Optimum Power Input . . . . .	760
Mixer Selection . . . . .	763
Scaleup Criteria . . . . .	767
Without Heat Transfer . . . . .	767
With Heat Transfer . . . . .	770
<b>12. Mixed Problems of Hydrodynamics: Filtration . . . . .</b>	<b>799</b>
Introduction . . . . .	800
Fluid Motion Through Layers . . . . .	800
Physical Concepts of Aero-Hydrodynamics . . . . .	800
Flow Through Layers of Constant Thickness . . . . .	801
Flow Through Layers of Variable Thickness . . . . .	802
Principles of Liquid Filtration . . . . .	805
Operating Principles . . . . .	805
Filtration Analysis . . . . .	810
Liquid Filtration Equipment . . . . .	831
Class A Designs (Rotary Drum Filters) . . . . .	832

Class B Designs . . . . .	836
Class C Designs . . . . .	841
Design Equations for Optimum Filtration . . . . .	856
Principal Equations . . . . .	856
Optimum Capacity of Batch Filters at Constant Rate . . . . .	866
Maximum Capacity of Batch Filters at Variable Pressure Difference and Process Rates . . . . .	870
Optimum Filtration Cycle . . . . .	871
Capacity of Continuous Filters . . . . .	873
Centrifugal Filtration . . . . .	889
Gas Filtration . . . . .	892
<b>13. Fluidization and Fluid-Particle Transport . . . . .</b>	<b>913</b>
Introduction . . . . .	914
Onset of Fluidization . . . . .	915
Dense-Phase Fluidization . . . . .	916
Bubble Phenomena in Fluidization . . . . .	919
Minimum Gas Voidage . . . . .	920
Channeling . . . . .	921
Pressure Drop . . . . .	925
Chemical Reactions in Fluidized Beds . . . . .	930
Reaction Applications . . . . .	931
Reaction Zones . . . . .	931
Catalyzed Gas-Phase Reactions in the Freeboard . . . . .	931
Spouted Beds . . . . .	933
Description . . . . .	934
Designing Spouted Beds . . . . .	943
Centrifugal Fluidization . . . . .	947
Description . . . . .	947
Heat Transfer . . . . .	950
Chemical Kinetics . . . . .	950
Three-Phase Fluidization . . . . .	950
Classification . . . . .	950
Pressure Drop . . . . .	951
Solids Holdup and Bed Expansion . . . . .	953
Gas and Liquid Holdups . . . . .	956
Bubble Characteristics . . . . .	956
Heat and Mass Transfer . . . . .	957
Entrainment . . . . .	957
General Description . . . . .	957
Similarity Analysis . . . . .	959
The Freeboard Region . . . . .	961

Entrainment at and above the TDH . . . . .	965
Entrainment below the TDH . . . . .	967
Effect of Physical Parameters on Entrainment . . . . .	968
Entrainment Model . . . . .	971
<b>14. Hydrodynamics of Gas-Liquid Flows . . . . .</b>	<b>985</b>
Introduction . . . . .	985
Regimes of Flow . . . . .	986
Hydrodynamics of Bubbling Mixtures . . . . .	988
Rapid Bubbling Through an Ideal Liquid . . . . .	991
Rapid Bubbling Through a Real Liquid . . . . .	1000
Two-Phase Flow Parameters in the Slow Bubbling Regime . . . . .	1005
Two-Phase Flow Parameters for Systems with Dissipation and Inertia . . . . .	1019
Effects of Static Liquid Height and Equipment Diameter on Void Fraction . . . . .	1019
<b>Appendix A: Answers and Detailed Solutions to Selected Chapter     Problems . . . . .</b>	<b>1025</b>
<b>Appendix B: General Conversion Factors and Physical Properties     Data . . . . .</b>	<b>1079</b>
<b>Appendix C: SI Units and Conversions Factors . . . . .</b>	<b>1105</b>
<b>Index . . . . .</b>	<b>1139</b>
