

Contents

1. INTRODUCTION	1
1-1. Definition of a Fluid	1
1-2. Everyday Experiences with Fluids	2
1-3. Historical Background	3
1-4. Current Research Activities in Fluid Mechanics	5
1-5. Notes on Symbols and Units	6
Problems	10
2. FLUID PROPERTIES	13
2-1. Density, Specific Volume, Specific Weight, and Specific Gravity	13
2-2. Viscosity	16
2-3. Surface Tension and Capillarity	21
2-4. Compressibility or Elasticity	22
2-5. Vapor Pressure	24
Problems	24
3. THERMODYNAMIC CONSIDERATIONS	29
3-1. Temperature	29
3-2. Work	29
3-3. Heat	30
3-4. The First Law of Thermodynamics	30
3-5. The Second Law of Thermodynamics	31
3-6. The Perfect Gas	32
3-7. Flow Processes	34
Problems	36
4. FLUID STATICS	38
4-1. General Differential Equation	38
4-2. Hydrostatics	39
4-3. Manometry	39
4-4. Fluid Forces on Submerged Surfaces	42
4-5. Curved Surfaces	45
4-6. Aerostatics	47
4-7. Isothermal Atmosphere	47
4-8. Dry Adiabatic Atmosphere	47
4-9. NACA Standard Atmosphere	48
4-10. Résumé	50
Problems	50
5. FLUID DYNAMICS	57
5-1. Types of Flow	57
5-2. Conservation of Mass	61
5-3. Conservation of Momentum	63
5-4. Conservation of Energy	75
5-5. Comparison of Equations of Motion with Steady-Flow Energy Equation	80
5-6. Work and Power	81
Problems	82

6.	POTENTIAL FLOW	96
6-1.	Partial and Total Derivatives	96
6-2.	Vectors	97
6-3.	Conservation of Mass and the Continuity Equation	100
6-4.	Irrotational Motion	102
6-5.	Velocity Potential and Stream Function for Two-Dimensional Flow	104
6-6.	Flow Nets for Two-Dimensional Flow	108
6-7.	Examples of Ideal, Two-Dimensional, Steady Fluid Flows Problems	110 117
7.	THE BOUNDARY LAYER IN INCOMPRESSIBLE FLOW	124
7-1.	Description of the Boundary Layer	125
7-2.	The Momentum Equation for the Boundary Layer	129
7-3.	The Flat Plate in a Uniform Free Stream with No Pressure Gradients	131
7-3.	Problems	138
8.	DIMENSIONLESS NUMBERS AND DYNAMIC SIMILARITY	142
8-1.	Introduction	142
8-2.	Dimensional Analysis of Fluid Systems	144
8-3.	Dynamic Similitude	146
8-4.	Modeling Ratios	151
8-5.	Incomplete Similarity	152
8-6.	Some General Expressions for Dynamic Similitude	154
8-6.	Problems	158
9.	THE FLOW OF COMPRESSIBLE GASES	165
9-1.	The Velocity of Sound	166
9-2.	The Mach Number and Its Ranges	167
9-3.	Isentropic Flow of a Perfect Gas	168
9-4.	Diabatic Flow of a Perfect Gas Without Friction	184
9-5.	Normal Shock Waves	186
9-5.	Problems	189
10.	THE FLOW OF REAL FLUIDS IN CONDUITS	200
10-1.	Basic Considerations	200
10-2.	Steady Incompressible Flow in the Entrance Region of a Pipe....	203
10-3.	Fully Developed Incompressible Flow in Round Pipes	206
10-4.	Contractions, Expansions, and Pipe Fittings	216
10-5.	Noncircular Ducts	220
10-6.	Applications	221
10-7.	Empirical Pipe-Flow Equations	224
10-8.	Pipe Networks	227
10-9.	Flow of Compressible Gases in Pipes with Friction	230
10-10.	Flow of Mixtures in Pipes	241
10-10.	Problems	244
11.	DYNAMIC DRAG AND LIFT	257
11-1.	Fluid Forces on a Body in a Flow Stream	257
11-2.	Drag	257
11-3.	Lift	264
11-4.	Model Tests and Prototype Performance	271
11-4.	Problems	274

12. OPEN-CHANNEL FLOW	281
12-1. Basic Considerations	281
12-2. Velocity of an Elementary Wave	285
12-3. Specific Energy and Specific Thrust	285
12-4. Uniform Flow	289
12-5. Gradually Varied Flow	295
12-6. Hydraulic Jump	302
12-7. Channel Transitions	306
12-8. Specialized Examples of Open-Channel Flow	308
Problems	311
13. FLOW MEASUREMENTS	318
13-1. Velocity Measurements	318
13-2. Liquid Flow Rates in Pipes	328
13-3. Liquid Flow Rates in Open Tanks or Open Channels	332
13-4. Subsonic Gas Flow Rates in Pipes	337
Problems	338
14. TURBOMACHINES	344
14-1. General Theory	344
14-2. Energy Equation and System Characteristics for Pumps	348
14-3. Pump Performance Characteristics	348
14-4. Pump and System Combinations	352
14-5. Dimensionless Parameters and Dynamic Similarity for Pumps	353
14-6. Pump Cavitation	355
14-7. Hydraulic Turbines	356
14-8. Hydraulic Turbine Characteristics	357
14-9. Dimensionless Parameters and Dynamic Similarity for Turbines	362
Problems	363
15. VARIED FLOW IN OPEN CHANNELS AND GAS FLOW IN PIPES AND NOZZLES	366
15-1. Froude and Mach Numbers	366
15-2. Specific Energy and the Fanno Line; Specific Thrust and the Rayleigh Line	368
15-3. Hydraulic Jump and Normal Shock	372
15-4. Some Examples of Similar Flows	375
16. CONVECTIVE HEAT TRANSFER	377
16-1. The Thermal Boundary Layer	377
16-2. Flow Over a Flat Plate with No Pressure Gradients	379
16-3. Flow in a Pipe	384
16-4. Résumé	386
Problems	387
SUPPLEMENTARY READING	391
