Preface by Dr. H. W. Thompson	iii
Acknowledgements	iv
Foreword by Professor D. H. R. Barton	vii
Authors' Notes on Third Edition	viii
PART I	
Introduction	1
Elementary theory	2
Uses of infra-red spectroscopy	6
Instruments: construction and operation	10
Cells and sampling techniques	20
Correct phase and sample diluent	30
Prisms and gratings	36
Quantitative analysis	38
Hydrogen bonding	43
Interpretation of a spectrum	45
PART II	
Introduction	63
Table of abbreviations	66
Correlation charts	67
Tables of group absorption frequencies (and wavelengths)	73
Reciprocal Tables	98
Index	101
