

## Contents

### *Chapter 1*

<b>General Introduction . . . . .</b>	<b>1</b>
<b>L. A. Woodward</b>	
The Raman Effect . . . . .	1
Quantum-Mechanical Theory of Light Scattering . . . . .	7
Polarizability Theory of Rayleigh Scattering. . . . .	10
General Polarizability Theory of Raman Scattering. . . . .	14
Placzek's Simplified Polarizability Theory. . . . .	30
Calculation of Force Fields from Frequencies . . . . .	32
Raman Intensities on the Basis of Placzek's Theory. . . . .	35
Experimental Measurement of Intensities . . . . .	37
Bond-Polarizability Theory of Intensities . . . . .	37
Relation of Bond Polarizability to Bond Character . . . . .	39
Raman Spectra of Solids. . . . .	40
Special Effects with Extremely High-Intensity Laser Excitation . . . . .	41
References . . . . .	43

### *Chapter 2*

<b>Advances in Raman Instrumentation and Sampling Techniques. . . . .</b>	<b>44</b>
<b>John R. Ferraro</b>	
Introduction . . . . .	44
Raman Instrumentation. . . . .	45
Sampling Techniques . . . . .	62
Possible Future Developments. . . . .	77
Acknowledgments . . . . .	79
References. . . . .	80

### *Chapter 3*

<b>Laser Raman Spectroscopy . . . . .</b>	<b>82</b>
<b>J. A. Koningsstein</b>	
Introduction . . . . .	82

General Experimental Techniques and Results.....	84
Specific Laser Raman Experiments and Results.....	90
Concluding Remarks.....	99
References.....	99

*Chapter 4*

<b>Raman Intensities and the Nature of the Chemical Bond.....</b>	<b>101</b>
---	------------

**Ronald E. Hester**

Theory of Raman Intensities .....	101
Bond Polarizability Derivatives.....	108
Bond Types from Raman Intensities—from Covalent Molecules to Ion Pairs.....	115
Bond Orders.....	121
Intermolecular Interactions in Liquids.....	133
References.....	136

*Chapter 5*

<b>Ionic Melts.....</b>	<b>139</b>
-------------------------	------------

**G. J. Janz and S. C. Wait, Jr.**

Introduction.....	139
Techniques.....	140
Principles.....	145
Melt Spectra.....	148
Mixtures.....	160
Summary.....	163
References.....	164

*Chapter 6*

<b>Observed Resonance Raman Spectra.....</b>	<b>168</b>
--	------------

**Josef Behringer**

Introduction.....	168
Special Features of Experimental Technique.....	169
Preresonance Raman Effect.....	174
Rigorous Resonance Raman Effect.....	209
Conclusion.....	219
Notation.....	220
References.....	221

*Chapter 7*

<b>Raman Spectroscopy of Complex Ions in Solution.....</b>	<b>224</b>
<b>D. E. Irish</b>	
Introduction.....	224
Identity and Geometry .....	225
Equilibrium Constants .....	233
Thermodynamic Functions.....	240
Kinetics.....	240
Raman Spectra of Simple Complex Ions.....	241
References.....	248
<b>Index .....</b>	<b>251</b>
