Preface	vii
Membership of the working party	ix
1 General considerations on fluorescence spectrometry	1
<i>J. N. Miller</i>	
1.1 Introduction	1
1.2 Molecular photochemistry	2
1.3 Fluorescence instrumentation	3
1.4 Good spectroscopic practice	4
1.5 Fluorescence intensities	5
1.6 Nomenclature in fluorescence spectrometry	7
2 Monochromator wavelength calibration	8
<i>J. N. Miller</i>	
2.1 Introduction	8
2.2 Characteristics of calibration methods	9
2.3 Use of spectral lines from the spectrometer light source	10
2.4 Use of an auxiliary light source	12
2.5 Use of narrow bandwidth fluorescence maxima of inorganic and organic solutes	12
2.6 Conclusions and recommendations	14
3 Stray light in fluorescence spectrometers	15
<i>J.N. Miller</i>	
3.1 Origins of stray light and resultant errors	15
3.2 Stray light in grating monochromators	16
3.3 Summary and recommendations	18

4	Criteria for fluorescence spectrometer sensitivity <i>J. N. Miller</i>	20
4.1	Background: inter-instrument comparisons	20
4.2	The limit of detection method	22
4.3	The signal-to-noise ratio method	23
4.4	Summary and recommendations	25
5	Inner filter effects, sample cells and their geometry in fluorescence spectrometry <i>J. B. F. Lloyd</i>	27
5.1	Inner filter effects	27
5.2	Sample cells	38
5.3	Recommendations	41
6	Temperature effects and photodecomposition in fluorescence spectrometry <i>M. A. West</i>	44
6.1	Errors caused by temperature effects	44
6.2	Countermeasures and recommendations for temperature effects	46
6.3	Errors caused by photolysis effects	46
6.4	Countermeasures and recommendations	46
7	Correction of excitation and emission spectra <i>G. C. K. Roberts</i>	49
7.1	Introduction: the need for correction procedures	49
7.2	Excitation spectra	49
7.3	Emission spectra	54
7.4	Polarization effects	62
7.5	Recommendations	64
8	The determination of quantum yields <i>J. W. Bridges</i>	68
8.1	Introduction	68
8.2	Primary methods of determining quantum yields	71
8.3	Secondary methods of determining quantum yields: use of fluorescence standards	75
8.4	Other methods of determining quantum yields	76
8.5	Summary and recommendations	77
	Appendix Corrected excitation and emission spectra	79
	Index	114
