<b>a</b>	<b>INTRODUCTION</b>	1. General	1
		2. Atomic Absorption Spectroscopy	1
		3. Flame Emission Spectroscopy	2
		4. Atomic Fluorescence Spectroscopy	2
		5. General References	3
<b>b</b>	<b>INSTRUMENT OPERATION</b>	1. General	4
		2. Lamp Operation	4
		(a) Hollow Cathode Lamps	4
		(b) Hydrogen Continuum Lamp	4
		(c) Multi-element Lamps	4
		3. Spray Chamber Assembly	4
		(a) Nebulizers	4
		(b) Impact Bead	5
		(c) Spray Chamber	5
		(d) Burners	6
		4. Flames and Gases	6
		(a) General	6
		(b) Flame Types	7
		(1) air-propane	7
		(2) air-acetylene	7
(3) nitrous oxide-acetylene	7		
(4) air-hydrogen	7		
(5) nitrogen-hydrogen-entrained air	7		
5. Wavelength Selection	7		
<b>c</b>	<b>INTERFERENCES</b>	1. Matrix Effects	8
		2. Chemical	8
		3. Non-Atomic Absorption	10
<b>d</b>	<b>ANALYTICAL PROCEDURES</b>	1. Reagents and Apparatus	11
		2. Sample Preparation	11
		3. Standard Preparation	12
		4. (a) Normal Procedure using Calibration Curve	12
		(b) Arithmetic	13
		(c) Two Standard Method	13
		(d) Method of Ultimate Precision	13
		(e) Standard Addition Technique	14
		(1) single addition	14
		(2) multiple addition	14
		(f) Secondary Standardization	15
		(g) Primary Reference Standardization	15
5. Trace Analysis	15		
<b>e</b>	<b>DEFINITION OF TERMS AND CONVERSION FACTORS</b>		16
<b>f</b>	<b>PREFACE TO DATA SHEETS</b>		17
