

CONTENTS

PREFACE	iii
NOTE TO RUSSIAN EDITION	v
TRANSLATION EDITOR'S NOTE	vi
Chapter I. THERMODYNAMICS OF HEAT-TRANSFER AND MASS-TRANSFER PHENOMENA	1
§ 1-1. Onsager's Theory	1
§ 1-2. Methods for Defining the Fluxes and Thermodynamic Forces	4
§ 1-3. The Curie Principle	6
§ 1-4. Onsager's Basic Relation	9
§ 1-5. The Differential Transfer Equations	10
§ 1-6. Calculation of the Transfer Thermodynamic Forces and Fluxes	19
§ 1-7. The Differential Transfer Equations for a One- Component System	25
Chapter II. MASS-TRANSFER AND HEAT-TRANSFER EQUATIONS. BASIC METHODS FOR THEIR SOLUTION	27
§ 2-1. The Mass-Transfer and Heat-Transfer Equations for a Binary Gaseous Mixture	27
§ 2-2. The Mass-Transfer and Heat-Transfer Equations for a Solution	40
§ 2-3. The Equations for Mass and Heat Transfer in a Porous Body	41
§ 2-4. The Equations for Laminar Flow of Immiscible Fluids through a Porous Medium	53
§ 2-5. The Equations for Neutron and Heat Transfer in an Absorbing Medium	54
§ 2-6. The System of Differential Transfer Equations	58
§ 2-7. Boundary Conditions in Heat-Transfer Problems	59
§ 2-8. Boundary Conditions in Problems of Mass and Heat Transfer	66
§ 2-9. Methods of Solving Differential Transfer Equations	70
Chapter III. THE FUNDAMENTALS OF SIMILARITY THEORY	87
§ 3-1. The Problem Posed	87
§ 3-2. Transformation Factors and Similarity Criteria	90
§ 3-3. The Similarity of Heat-Exchange and Mass- Exchange Phenomena	95

§ 3-4.	Similarity Criteria for Heat and Mass Transfer	99
§ 3-5.	The Physical Meaning of the Similarity Criteria for Heat and Mass Transfer	104
§ 3-6.	A Dimensionless form of the Mathematical Model of Heat and Mass Transfer	107
Chapter IV.	UNSTEADY FIELDS OF HEAT-TRANSFER AND MASS- TRANSFER POTENTIAL WITH BOUNDARY CONDI- TIONS OF THE FIRST KIND	109
§ 4-1.	The Dimensionless Boundary Conditions	109
§ 4-2.	Unsteady Fields of Heat-Transfer and Mass-Transfer Potential for Constant Integral Mass-Transfer Potential	110
§ 4-3.	Unsteady Fields of Heat-Transfer and Mass-Transfer Potential in the Absence of Phase Transitions ($Ko^* = 0$) and for Constant Integral Mass-Transfer Potential	134
§ 4-4.	Heat and Mass Transfer for a Constant Potential θ	145
Chapter V.	UNSTEADY FIELDS OF HEAT-TRANSFER AND MASS- TRANSFER POTENTIAL WITH BOUNDARY CONDITIONS OF THE SECOND KIND	151
§ 5-1.	The Dimensionless Boundary Conditions	151
§ 5-2.	Basic Problems of Coupled Heat and Mass Transfer	152
§ 5-3.	Generalized Boundary Conditions of the Second Kind	173
§ 5-4.	A Method for Solving Systems of Heat-Transfer and Mass-Transfer Equations	176
§ 5-5.	Unsteady Potential Fields for Uncoupled Transfer with Continuously Acting Sources	179
Chapter VI.	UNSTEADY FIELDS OF HEAT-TRANSFER AND MASS- TRANSFER POTENTIAL WITH BOUNDARY CONDITIONS OF THE THIRD KIND	191
§ 6-1.	The Dimensionless Boundary Conditions	191
§ 6-2.	Unsteady Fields of Heat-Transfer and Mass-Transfer Potential, Constant Mass Flux at Surface of Body	192
§ 6-3.	Unsteady Fields of Heat-Transfer and Mass-Transfer Potential, Mass Flux at Surface of Body a Function of the Mass-Transfer Potential	212
§ 6-4.	Unsteady Fields of Heat-Transfer and Mass-Transfer Potential, Mass Flux at Surface of Body a Function of Time	244
§ 6-5.	Some Particular Cases of Heat and Mass Transfer	254
§ 6-6.	The Effects of the Dimensionless Numbers on Heat and Mass Transfer	279

Chapter VII.	HEAT AND MASS TRANSFER IN A MEDIUM WITH VARIABLE POTENTIALS	293
§ 7-1.	Unsteady Fields of Transfer Potential in a Medium Whose Temperature Varies Linearly or Exponentially	293
§ 7-2.	Heat and Mass Transfer in a Medium with Variable Temperature	311
§ 7-3.	Heat and Mass Transfer with Periodic Variation of Temperature of Surroundings	313
§ 7-4.	Some Generalized Problems of Heat and Mass Transfer in a Medium with Variable Temperature	323
§ 7-5.	Heat and Mass Exchange in a Layer	335
§ 7-6.	Regular Thermal Conditions	341
Chapter VIII.	TWO-DIMENSIONAL AND THREE-DIMENSIONAL FIELDS OF HEAT-TRANSFER AND MASS-TRANSFER POTENTIAL	347
§ 8-1.	Heat and Mass Transfer in a Semi-Infinite Medium, Boundary Conditions of the First and Second Kinds	347
§ 8-2.	Heat and Mass Transfer in a Two-Dimensional Infinite Plate, Boundary Conditions of the Third Kind	357
§ 8-3.	Heat and Mass Transfer in a Two-Dimensional Plate, Boundary Conditions of the First and Second Kinds	364
§ 8-4.	Uncoupled Transfer of Heat or Mass in a Rectangular Domain	376
§ 8-5.	Uncoupled Transfer of Heat or Mass in a Cylindrical Domain	378
§ 8-6.	Unsteady Fields of Heat-Transfer and Mass-Transfer Potential in an Anisotropic Body	387
Chapter IX.	UNSTEADY POTENTIAL FIELDS FOR BOTH MACROSCOPIC AND MOLECULAR HEAT AND MASS TRANSFER.	389
§ 9-1.	Transfer-Potential Fields with Boundary Conditions of the Third Kind, Mass Exchange at Body Surface a Function of Mass-Transfer Potential	389
§ 9-2.	Unsteady Fields of Heat-Transfer and Mass-Transfer Potential, with Boundary Conditions of the Third Kind, Mass Exchange at the Body Surface a Function of Time	428
§ 9-3.	The Reduction of the System of Equations Describing Macroscopic-Molecular Transfer to a System of "Uncoupled" Parabolic-Type Equations	431
§ 9-4.	Effects of the Dimensionless Parameters on Macroscopic-Molecular Heat and Mass Transfer	433
§ 9-5.	Heat and Mass Transfer in the Case of a Pressure Drop	444
§ 9-6.	Heat and Mass Transfer under the Effect of Numerous Thermodynamic Forces	452

Chapter X.	HEAT AND MASS TRANSFER WITH VARIABLE TRANSFER COEFFICIENTS	464
§ 10-1.	General Observations.	464
§ 10-2.	Heat and Mass Transfer with a Variable Parameter of Phase or Chemical Transformation	464
§ 10-3.	Heat or Mass Transfer in a Nonhomogeneous Medium	471
§ 10-4.	Unsteady Potential Fields for Nonlinear Heat and Mass Transfer	477
Chapter XI.	HEAT AND MASS TRANSFER IN A LAYERED MEDIUM	497
§ 11-1.	The System of Heat-Transfer and Mass-Transfer Equations for a Layered Medium	497
§ 11-2.	A System Consisting of Two Bodies	500
§ 11-3.	A System Consisting of Three Bodies	510
§ 11-4.	Multilayered Systems	515
APPENDIX I.	A SUMMARY OF VECTOR AND TENSOR NOTATION	520
APPENDIX II.	DIMENSIONLESS NUMBERS INTRODUCED IN THE TEXT	525
