

Contents

Chapter 1. Liquid Refrigerants	3
1.1. Liquid Refrigerants in General	3
1.2. Specific Liquid Refrigerants	5
1.3. Refrigerant Economics	9
Reference	10
Chapter 2. Storage and Handling of Liquid Refrigerants	11
2.1. Storage Vessels – Principles	11
2.2. Small Liquid-Nitrogen Vessels	13
2.3. Large Liquid-Nitrogen Tanks	14
2.4. Liquid-Helium and Liquid-Hydrogen Vessels	16
2.5. The Handling of Liquid-Refrigerant Storage Vessels	18
2.6. Transfer Lines – Principles	20
2.7. Commercial Transfer Lines	22
2.8. Laboratory-Built Transfer Lines	22
2.9. Flow Promotion	25
References	26
Chapter 3. Liquefiers and Refrigerators	27
3.1. Principles	27
3.2. Commercial External-Work Liquefiers and Refrigerators	34
3.3. Commercial Internal-Work Liquefiers and Refrigerators	64
3.4. Laboratory-Built Liquefiers and Refrigerators	68
3.5. The Harwell Dilution Refrigerator	69
References	72
Chapter 4. Room-Temperature Machinery	74
4.1. Compressors	74
4.2. Vacuum Pumps	82
References	86

Chapter 5. Helium Gas Recovery Systems	87
5.1. Gas Storage at Atmospheric Pressure	87
5.2. Gas Storage at High Pressure	91
5.3. Purification	92
Reference	99
Chapter 6. Instrumentation	100
6.1. Pressure	100
6.2. Temperature – Electrical Methods	102
6.3. Temperature – Pressure-Dependent Methods	105
6.4. Gas Flow Rate	107
6.5. Integrated Gas Flow Rate	109
6.6. Liquid/Vapour Interface Point	109
6.7. Liquid Depth	111
6.8. Gas Purity	113
6.9. Automatic Control	115
References	118
Chapter 7. Materials and Jointing Methods	119
7.1. Desirable Features of Structural Materials	119
7.2. Metals	121
7.3. Nonmetals	123
7.4. Tubing	124
7.5. Valves	127
7.6. Jointing Techniques – Metal to Metal	131
7.7. Metal/Nonmetal Joints	136
7.8. Leak Detection	137
7.9. Insulating Materials	140
References	145
Chapter 8. Cryostat Dewars	147
8.1. Laboratory-Built Liquid-Helium Cryostat Dewars	147
8.2. Commercial Liquid-Helium Cryostat Dewars	152
References	153
Chapter 9. Hazards	154
9.1. Physical Hazards	154
9.2. Chemical Hazards	158
9.3. Physiological Hazards	160
Reference	161
Bibliography	162
Appendix	167
Index	179
