

CONTENTS

	Page
Chapter 1. Thermodynamic Properties (Problems 1-40)	1
2. Conservation of Energy (Problems 41-90)	4
3. Energy Relations (Problems 91-140) ✓	8
4. The Ideal Gas (Problems 141-210) ✓	13
5. Processes of Ideal Gases (Problems 211-290) ✓	18
6. Cycle Analysis and Reversible Cycles (Problems 291-350) ✓	25
✓ 7. Entropy and the Second Law (Problems 351-410) ✓	30
8. Efficiencies (Problems 411-430) ✓	36
9. Compressors and Expanders—Gases (Problems 431-470)	38
10. Internal Combustion Engines (Problems 471-520)	42
11. Gas Turbines and Jet Engines (Problems 521-570)	47
12. Two-Phase Systems (Problems 571-660)	53
13. The Generation of Power (Problems 661-680)	61
14. Power from Steam (Problems 681-710)	62
15. Cycles for Modern Steam Plants (Problems 711-750)	65
16. Flow of Fluids (Problems 751-850)	71
17. Turbines (Problems 851-870)	79
18. The Reversed Cycle (Problems 871-920) ✓	82
19. Mixtures of Ideal Gases (Problems 921-950)	88
20. Gas-Vapor Mixtures (Problems 951-1020)	91
21. Reactive Systems—Ideal Gases (Problems 1021-1100)	97
22. Imperfect Gases (Problems 1101-1150)	103
23. Relations of Thermodynamic Properties (Problems 1151-1230)	107
24. The Transfer of Heat (Problems 1231-1285) ✓	112

	Page
Table A1. Gas Properties at Low Pressure	118
A2. Properties of Air at Low Pressure	119
A3. Carbon Dioxide at Low Pressure	120
A4. Carbon Monoxide at Low Pressure	121
A5. Hydrogen at Low Pressure	122
A6. Nitrogen at Low Pressure	123
A7. Oxygen at Low Pressure	124
A8. Products—400% Theoretical Air	125
A9. Products—200% Theoretical Air	126
A10. Water Vapor at Low Pressure	127
A11. Enthalpy and Gibbs Function of Formation; Absolute Entropy	128
A12. Heating Values of Fuels at Constant Pressure	129
A13. Values of $\log_{10} K_p$	130
A14. Critical Constants and van der Waals Constants	131
A15. Conductivities	132
A16. Conductances and Transmittances	133
A17. Factors for Radiation Equation	134
A18. Total Normal Emissivities	135
A19. Saturated Steam: Temperatures	136
A20. Saturated Steam: Pressures	142
A21. Superheated Steam	144
A22. Relations of Units	166
A23. Saturated Ammonia	168
A24. Superheated Ammonia	169
A25. Saturated Freon 12 (Dichlorodifluoromethane)	173
A26. Superheated Freon 12 (Dichlorodifluoromethane)	173
Fig. A1. Radiation Between Element and Rectangular Parallel Surface Above Element	175
A2. Radiation Between Equal Squares or Equal Disks in Parallel Planes, Directly Opposed	175
A3. Absolute Viscosities of Gases	176
A4. Absolute Viscosities of Liquids	176
A5. Absolute Viscosities of Crude Oils	177
A6. Pressures and Temperatures of Saturated Vapors	178
A7. Compressibility Factors, I.	178
A8. Compressibility Factors, II.	179
A9. Enthalpy Deviation Chart, Low Pressure Range	180
A10. Enthalpy Deviation Chart, High Pressure Range	181

APPENDIX

	Page
A11. Entropy Deviation Chart, Low Pressure Range	182
A12. Entropy Deviation Chart, High Pressure Range	183
A13. Pressure-Enthalpy Diagram for Carbon Dioxide	184
Mollier Diagram for Steam	At rear
Psychrometric Chart	At rear
