PREFACE	ix
<b>Chapter 1 Introduction</b>	<b>1</b>
1.1. ADVANTAGES OF CONDUCTING POLYMERS	1
1.2. EARLY ATTEMPTS FOR APPLICATIONS	2
1.3. GROWTH AND PROPERTIES	2
1.4. ACTIVE DEVICES	4
<b>Chapter 2 Polyacetylene</b>	<b>7</b>
2.1. STRUCTURE, GROWTH, AND PROPERTIES	7
2.1.1. <i>Structure</i>	7
2.1.2. <i>Growth and Doping of Polyacetylene</i>	7
2.2. BAND STRUCTURE OF <i>t</i> -PA	9
2.3. THE SOLITONS AND THE POLARONS	12
2.3.1. <i>The Solitons</i>	12
2.3.2. <i>The Polarons</i>	13
2.4. TRANSPORT PROPERTIES	16
2.4.1. <i>Mobility in Selected Polymers</i>	16
2.4.2. <i>Conductivity and Susceptibility</i>	20
<b>Chapter 3 Optical and Transport Properties</b>	<b>23</b>
3.1. EFFECT OF ELECTRIC FIELD ON PHOTOLUMINESCENCE (PL)	23
3.2. THE DIELECTRIC CONSTANT	27
3.3. SPACE CHARGE LIMITED CURRENTS	28
3.3.1. <i>Early Work of Mott, Poisson and Continuity Equations in a Trap-Free Insulator</i>	28
3.3.2. <i>Effect of Background Doping</i>	31
3.4. POLYMERS: THE SOLIDS WITH TRAPS	32
3.4.1. <i>Poisson Equation with Trapped Charges</i>	32
3.4.2. <i>Single Level Traps</i>	32
3.4.3. <i>Gaussianly Distributed Traps</i>	34
3.5. EXPONENTIAL TRAPS	35
3.5.1. <i>Calculation of <math>J(V)</math></i>	35
3.6. RELAXATION OF THE APPROXIMATION $p_1 \gg p$	35
3.6.1. <i><math>J-V</math> Curves When <math>p_1 \gg p</math></i>	35

3.6.2. <i>Trap-Filled Limit</i>	36
3.7. EFFECT OF FINITE (NON-ZERO) SCHOTTKY BARRIER	38
3.7.1. <i>Importance of Finite Barriers</i>	38
3.7.2. <i>Theory</i>	39
3.7.3. <i>Results and Discussion</i>	40
3.7.4. <i>Comparison with Experiment</i>	42
3.8. COMBINED EFFECT	44
3.9. TEMPERATURE EFFECTS	44
3.9.1. <i>Temperature Effects in PPV-Based Polymers</i>	44
3.9.2. <i>Recent Work</i>	48
3.9.3. <i>Temperature Effects in MEH-PPV. Recent Work</i>	50
3.9.4. <i>Temperature Effects in Alq<sub>3</sub></i>	51
3.10. MOBILITY MODEL OF CHARGE TRANSPORT	55
3.11. UNIFIED MODEL	55
3.11.1. <i>Shallow Gaussian and Single Level Traps</i>	55
3.11.2. <i>Unified Model with Exponentially Distributed Traps</i>	57
3.12. HIGH FIELD OR POOLE-FRENKEL EFFECT	58
3.12.1. <i>J-V Characteristics</i>	58
3.12.2. <i>Calculations and Comparison with Experiments</i>	60
3.13. MOBILITY OF CHARGE CARRIERS	62
3.13.1. <i>Bulk Materials</i>	62
3.13.2. <i>Mobility in Blends</i>	63
3.14. IMPORTANT FORMULAS	64
3.15. SUMMARY OF THIS CHAPTER	64
<b>Chapter 4 Light Emitting Diodes and Lasers</b>	<b>67</b>
4.1. EARLY WORK	67
4.2. BLUE, GREEN AND WHITE EMISSION	70
4.2.1. <i>Blue and Green LEDs</i>	70
4.2.2. <i>White Light Emission from Organic LEDs</i>	74
4.3. COMPARISON WITH OTHER LEDs	80
4.4. ORGANIC SOLID STATE LASERS	81
4.4.1. <i>Photopumped Lasers</i>	81
4.4.2. <i>Spectral Narrowing</i>	82
4.4.3. <i>Blue Lasers</i>	83
4.5. QUANTUM EFFICIENCY AND DEGRADATION	83
4.6. STABILITY	86
4.6.1. <i>Degradation of the Polymer</i>	86
4.6.2. <i>The Cathode and the Black Spots</i>	87
4.6.3. <i>Degradation of the Anode</i>	90
4.7. SOLUBLE Ni <sup>2+</sup> 5-COORDINATED AL-COMPLEXES	91
4.8. SUMMARY AND CONCLUSIONS	94
<b>Chapter 5 Solar Cells</b>	<b>95</b>
5.1. INTRODUCTION	95
5.2. SOLAR CELLS	95
5.2.1. <i>Single and Bilayer Solar Cells</i>	95

5.2.2. <i>Interpenetrating Network of Donor–Acceptor Organics. Bulk Heterojunction Solar Cells</i>	97
5.3. SOURCE OF $V_{oc}$ IN BHSCS	104
5.3.1. <i>Effect of Acceptor Strength [133]</i>	104
5.3.2. <i>More Recent Work [134,135]</i>	105
5.4. OPTIMUM PCBM CONCENTRATION	107
5.4.1. <i>Superposition Principle</i>	108
5.5. MODELING THE OUTPUT CHARACTERISTICS	112
5.5.1. <i>The Output Currents</i>	112
5.5.2. <i>The Model</i>	115
5.6. COMPARISON WITH OTHER SOLAR CELLS	117
5.6.1. <i>Amorphous Si Solar Cells</i>	117
5.6.2. <i>Polycrystalline Si Solar Cells</i>	119
5.7. SUMMARY AND CONCLUSIONS	122
<b>Chapter 6 Transistors</b>	123
6.1. IMPORTANCE OF ORGANIC TFTS	123
6.2. EARLY WORK	124
6.3. EFFECT OF TRAPS	126
6.4. HIGH FIELD EFFECTS	127
6.5. TRANSPORT IN POLYCRYSTALLINE ORGANICS	130
6.5.1. <i>Effect of Grain Boundaries</i>	130
6.6. PENTACENE TFTS	131
6.7. CONTACTS	138
6.8. ORGANIC PHOTOTRANSISTOR	140
6.9. ORGANIC DIELECTRICS	143
<b>BIBLIOGRAPHY</b>	147
<b>INDEX</b>	157
<b>CONTENTS OF VOLUMES IN THIS SERIES</b>	167
