PART I	THE THEORY OF NUCLEAR MAGNETIC RESONANCE SPECTROSCOPY	1
1	The theory of nuclear magnetization	3
1.1	The properties of the nucleus of an atom	3
	<i>Table of nuclear properties</i>	6
1.2	The nucleus in a magnetic field	8
1.3	The source of the n.m.r. signal	10
1.4	A basic n.m.r. spectrometer	14
2	The magnetic field at the nucleus	17
2.1	Effects due to the molecule	17
	2.1.1 <i>Neighbour anisotropy effects</i>	20
	2.1.2 <i>Through-space electric field effects</i>	24
2.2	Effects due to unpaired electrons	25
2.3	The chemical shift	25
3	Internuclear spin-spin coupling	29
3.1	The mutual effects of nuclear magnets on resonance positions	29
3.2	The appearance of multiplets arising from spin-spin coupling	32
3.3	Spin-spin coupling satellites	42
3.4	Second-order effects	45
	3.4.1 <i>The three spin system</i>	51
	3.4.2 <i>Deceptively simple spectra</i>	57
	3.4.3 <i>Virtual coupling</i>	57
	3.4.4 <i>Spin-spin satellites and second-order effects</i>	59

CONTENTS

4	Nuclear magnetic relaxation and related phenomena	62
4.1	Relaxation processes in assemblies of nuclear spins	62
4.2	The Bloch equations	66
4.2.1	<i>Wiggle beats</i>	74
4.2.2	<i>Relaxation and sample viscosity</i>	79
4.3	Electric quadrupole relaxation	82
4.3.1	<i>Spin-spin coupling to quadrupole relaxed nuclei</i>	85
4.4	N.M.R. spectra of exchanging systems	88
4.5	Double resonance experiments	95
4.5.1	<i>Double resonance and spin-spin coupling</i>	95
4.5.2	<i>Double resonance and exchange coupling</i>	99
4.5.3	<i>Through-space coupling via the relaxation field</i>	101
5	The sample	103
5.1	Standardization	103
5.2	Solvent effects	105
6	Instrumentation	111
6.1	Modern spectrometer systems	111
6.2	Noise elimination	114
6.3	Derivative spectroscopy	121
PART II		
7	The uses of n.m.r. in chemistry	125
7.1	The determination of the structures of organic molecules using proton spectra	125
7.2	Determination of the conformations of organic molecules	132
7.3	Two double resonance studies of organic compounds	138
7.3.1	<i>As an aid in solving a complex structure</i>	138
7.3.2	<i>As an aid in determining a conformation</i>	139
7.4	The determination of the structures of transition metal complexes	142
7.5	Variable temperature studies of some dynamic systems	149
7.6	Contact shifts and pseudo contact shifts	154
viii		

7.7	The use of less common nuclear resonances	157
7.7.1	<i>The lithium-7 resonance</i>	157
7.7.2	<i>The boron-11 and aluminium-27 resonances</i>	157
7.7.3	<i>A transition metal, the cobalt-59 resonance</i>	163
7.7.4	<i>Phosphorus-31 n.m.r.</i>	163
7.7.5	<i>Fluorine-19 n.m.r.</i>	166
7.8	N.M.R. of solids	168
7.9	Further exercises	172
	Answers	176
	Bibliography	177
	Index	179
