

Analysis of NMR Spectra

A Guide for Chemists

R. A. HOFFMAN†

S. FORSÉN

Division of Physical Chemistry, Chemical Center, Lund Institute of Technology,
Lund, Sweden

B. GESTBLOM

Institute of Physics, University of Uppsala, Sweden

Contents

I.	Principles of NMR Spectroscopy	4
I.1.	The Magnetic Resonance Phenomenon	4
	a) Nuclear Moments	4
	b) Magnetic Spin States and Energy Levels	5
	c) The Magnetic Resonance Condition	7
	d) The Larmor Precession	7
	e) Experimental Aspects	8
I.2.	Chemical Shifts	9
	a) The Screening Constant σ	9
	b) Chemical Shift Scales (σ and τ)	10
I.3.	Spin Coupling Constants	12
I.4.	Intensities	15
II.	Some Basic Concepts	17
II.1.	Groups of Equivalent Spins	17
	a) Definitions of Equivalence Groupings	17
II.2.	Time Averaging Phenomena	23
	a) General Effects of Time-Dependent Interactions	23
	b) Limiting Cases of Very Slow and Very Rapid Rates	25
II.3.	The Energy Level and Transition Diagram	27
II.4.	Strong and Weak Coupling. Nomenclature	31
	a) Basic Ideas	31
	b) Weak Coupling in a Simple Spin System	32
	c) Weak Coupling in a General Case. The Concepts of Basic Groups and Basic Multiplets	33
	d) The Magnetic Quantum Numbers of Groups of Spins	34
	e) Notations for Spin Systems	36
	f) Rules for Establishing the Occurrence of Weak Coupling	37
II.5.	Invariants in NMR Spectra	37
	a) The Spectral Moments	37
III.	Miscellaneous Aids for Spectral Assignment	40
III.1.	The Need for Additional Information	40
III.2.	The Effects of a Strong Stimulating Field	41
III.3.	Controlled Variations of the Larmor Frequencies	43

III.4. Double Resonance Methods	43
a) Basic Concepts of Double Resonance.	43
b) Spin Decoupling.	44
c) Double Resonance Methods Based on Population Transfer	45
d) Spin Tickling	47
IV. Instant Analysis of NMR Spectra	49
IV.1. Simple First Order Spectra.	49
a) Second Order Effects in Near First Order Spectra	51
b) Accuracies of First Order Estimates in A_nX_m Spin Systems.	55
IV.2. The Two-Spin System AB	56
a) The General Structure of an AB Spectrum	56
b) Expressions for the NMR Parameters	57
c) Limiting Cases of AX and A_2	58
d) Summary.	59
IV.3. Deceptive Simplicity	61
a) Definition of Deceptive Simplicity	61
b) Apparent Magnetic Equivalence	63
c) Some Aids in Overcoming Deceptive Simplicity	63
IV.4. The Three-Spin System ABX	65
a) The Energy-Level Diagram of an ABX Spin System	65
b) The Concept of Effective Larmor Frequencies	67
c) Effective Larmor Frequencies in the ABX Spin System	68
d) Analysis of Observed ABX Spectra.	69
e) Basic Structure of an ABX Spectrum	69
f) Step-by-step Analysis of an ABX Spectrum	70
g) Analysis of an Artificial ABX Spectrum.	72
h) Degeneracies in ABX Spectra	74
IV.5. Generalization of the ABX Analysis Method: ABPX, ABX_n , etc.	79
a) The Method of Effective Larmor Frequencies	79
b) Basic Structure of an ABX_3 Spectrum	79
c) Basic Structure of an ABX_2 Spectrum	83
d) Basic Structure of an ABPX Spin System	84
e) Analysis Procedure for an ABPX Spectrum	87
IV.6. Magnetic Equivalence and Composite Particles	95
a) The Composite Particle Concept.	95
b) Subspectra Based on the Composite Particle Concept	98
IV.7. Spectra Characterized by One Spin-coupling Constant: A_nB_m	101
a) The Structure of A_nB_m Spectra.	101
b) The A_2B Spin System	104
c) The A_3B Spin System	105
d) The A_4B Spin System	106
e) The A_2B_2 Spin System	106
f) The A_3B_2 Spin System	107
IV.8. The Structure of $A_nB_mX_p$ Spectra	109
IV.9. The Symmetrical Four-Spin Systems $AA'XX'$ and $AA'BB'$	110
a) The Energy Level and Transition Diagram	110
b) The $AA'XX'$ Spin System	114
c) Analysis of $AA'XX'$ Spectra	115
d) The Structure of $AA'BB'$ Spectra	115
e) Analysis of $AA'BB'$ Spectra	117
f) Typical Examples of $AA'BB'$ Spin Systems in Proton Magnetic Resonance.	119
V. Quantum Mechanical Formalism	135
V.1. Introduction to the Quantum Mechanical Description of Spin Systems.	135
V.2. Quantum Mechanical Calculation of NMR Spectra	137
a) The NMR Spin Hamiltonian	137
b) The Transition Matrix Elements and Relative Intensities	138

c) An Example: The AB Spin System	139
d) The Choice of Basic Functions; the Uses of Symmetry	142
e) An Example: The AB ₂ Spin System	142
f) Rules for Evaluating Matrix Elements	144
g) The ABC and ABX Spin Systems	144
h) Two Examples: The AA'XX' and AA'BB' Spin Systems	146
V.3. Iterative and Least Squares Fit Procedures	149
VI. Historical Notes and Suggestions for Further Reading.	151
Appendix A: Sign Ambiguities in ABPX Spectra	152
Appendix B: Line Frequencies and Relative Intensities in A _n B _m Spectra	153
