

CONTENTS

1. Basic Nuclear Concepts	1
2. Alpha and Gamma Emission	25
3. Electrons in Disintegration Processes	71
4. Interaction of Charged Nuclear Radiations and Photons with Matter	116
5. Detection of Charged Particles and Photons	163
6. Neutrons—Production, Detection, and Interaction with Matter.	214
7. Nuclear Masses, Mass Numbers, and Mass Abundances	255
8. Nuclear Forces	276
9. Charged Particle Accelerators	328
10. Nuclear Reactions	369
11. Nuclear Fission	407
12. Cosmic Rays	429
13. Nuclear Spin and Magnetism	470
Appendix 1	529
Appendix 2	531
Author Index	535
Subject Index	543
