

# Contents

- 1 INTRODUCTION, 1  
*G. J. Leigh*
- 2 DEFINITIONS, 6  
*G. J. Leigh*
  - 2.1 Atoms and elements, 6
  - 2.2 The periodic table and element symbols, 7
  - 2.3 Elementary substances, 9
  - 2.4 Preferred IUPAC names, 11
  - 2.5 IUPAC international chemical identifiers, 11
- 3 FORMULAE AND STEREOFORMULAE, 12  
*G. J. Leigh*
  - 3.1 Introduction, 12
  - 3.2 Empirical formulae, 12
  - 3.3 Molecular formulae, 13
  - 3.4 Structural formulae, 14
  - 3.5 Sequence of citation of symbols, 15
  - 3.6 Formulae of groups, 17
  - 3.7 Groups in organic nomenclature, 18
  - 3.8 Three-dimensional structures and projections, 22
  - 3.9 Isomers and stereoisomers, 27  
References, 34
- 4 TYPES OF NOMENCLATURE, 35  
*G. J. Leigh*
  - 4.1 Introduction, 35
  - 4.2 Compositional nomenclature, 35
  - 4.3 Substitutive nomenclature, 36
  - 4.4 Additive (or coordination) nomenclature, 36
  - 4.5 Polymer nomenclature, 36
  - 4.6 Biochemical nomenclature, 37
  - 4.7 Other systems, 37

## CONTENTS

- 5            **COMPOSITIONAL AND BINARY-TYPE NOMENCLATURES, 39**  
*G. J. Leigh*
- 5.1        Compositional and binary nomenclatures, 39  
5.2        Basis of the binary system of nomenclature, 39  
5.3        Name derivation, 40  
5.4        Names of polyatomic anions, 42  
5.5        Names of polyatomic cations, 45  
5.6        Applications of anion and cation names, 47  
5.7        A caveat for the unwary: different names for a single compound, 49  
5.8        Summary, 50
- 6            **SUBSTITUTIVE AND FUNCTIONAL CLASS NOMENCLATURE, 51**  
*H. A. Favre*
- 6.1        Introduction, 51  
6.2        Alkanes and the basic approach to substitutive names, 52  
6.3        Cyclic parent hydrides, 60  
6.4        Names for substances with various degrees of unsaturation, 68  
6.5        Assemblies of rings, and of rings with chains, 71  
6.6        Nomenclature of functionalised parent hydrides, 72  
6.7        Names of functional parent compounds, 78  
6.8        Names of radicals and ions, 79  
6.9        Stereochemical descriptors, 81  
6.10      Summary of the general procedure to name compounds using substitutive nomenclature, 81  
6.11      Functional class nomenclature, 83  
6.12      Name interpretation, 83  
            References, 84
- 7            **ADDITIVE NOMENCLATURE AND THE NOMENCLATURE OF COORDINATION COMPOUNDS, 85**  
*R. M. Hartshorn*
- 7.1        Introduction, 85  
7.2        Definitions, 87  
7.3        Structural diagrams of coordination compounds, 91  
7.4        Formulae of coordination compounds, 92  
7.5        Names of coordination compounds, 100  
7.6        Deciphering names and formulae, 108  
            Reference, 108

- 8        **NOMENCLATURE OF ORGANOMETALLIC  
COMPOUNDS, 109**  
*A. T. Hutton*
- 8.1      Introduction, 109
- 8.2      Organometallic compounds of the transition elements, 109
- 8.3      Organometallic compounds of the Main Group elements, 128  
References, 132
- 9        **NOMENCLATURE OF POLYMERS, 133**  
*M. Hess*
- 9.1      Introduction, 133
- 9.2      Structure-based nomenclature, 136
- 9.3      Source-based nomenclature, 140
- 9.4      Generic source-based nomenclature, 141
- 9.5      Nomenclature of regular double-strand organic polymers, 142
- 9.6      Nomenclature of regular single-strand inorganic and  
coordination polymers, 145
- 9.7      Abbreviations for polymer names, 147
- 9.8      Names of common constitutional units in polymers, 147
- 9.9      Traditional names for common polymers, 147  
References, 149
- 10      **BORON HYDRIDES AND RELATED COMPOUNDS, 150**  
*M. A. Beckett*
- 10.1     Boron hydrides as a unique group of compounds, 150
- 10.2     Structural considerations and polyhedra, 151
- 10.3     Substitution and replacement in boron clusters, 154  
References, 157
- 11      **BIOCHEMICAL NOMENCLATURE, 158**  
*G. P. Moss*
- 11.1     Introduction, 158
- 11.2     Carbohydrate nomenclature, 158
- 11.3     Nomenclature and symbolism for  $\alpha$ -amino acids and peptides, 162
- 11.4     Lipid nomenclature, 165
- 11.5     Steroid nomenclature, 166
- 11.6     Nucleic acids, 168
- 11.7     Vitamins, 171  
Further reading and references, 174

## CONTENTS

- 12 OTHER TYPES OF NOMENCLATURE, 176  
*T. Damhus and G. P. Moss*
- 12.1 Other systems of nomenclature used for chemical compounds, 176  
12.2 Chemical abstracts service nomenclature, 176  
12.3 IUBMB enzyme nomenclature, 177  
12.4 World health organisation international nonproprietary names (INNs), 177  
12.5 ISO-approved common names for pesticides, 178  
12.6 International nomenclature of cosmetic ingredient names (INCI names), 178  
References, 179
- 13 NAME CONSTRUCTION AND DECONSTRUCTION, 181  
*R. M. Hartshorn and H. A. Favre*
- 13.1 Introduction, 181  
13.2 Deciphering names of organic compounds, 182  
13.3 Deciphering names and formulae of coordination compounds, 184  
13.4 Deciphering names of polymeric compounds, 188  
13.5 Deciphering the names of biological molecules, 189
- 14 THE IUPAC INTERNATIONAL CHEMICAL IDENTIFIER (InChI), 190  
*A. D. McNaught and S. R. Heller*
- 14.1 IUPAC international chemical identifiers, 190  
14.2 Short description of the InChI, 191  
14.3 The structure of InChIs, 191  
References, 194
- 15 NOMENCLATURE IN THE MAKING, 195  
*G. J. Leigh*
- 16 GUIDELINES FOR DRAWING CHEMICAL STRUCTURES, 197  
*J. Brecher*
- APPENDIX: TABLES OF GENERAL APPLICATION TO THE  
WHOLE TEXT, 199  
*G. J. Leigh, T. Damhus and K.-H. Hellwich*
- SUBJECT INDEX, 243  
*K.-H. Hellwich*
