

	Page
PREFACE	(i)
CONTENTS	(111)
I MATHEMATICS	
1. Algebra	1
2. Trigonometric and Mensuration Formulae	8
3. Analytic Geometry and Vectors	16
4. Complex Variables	23
5. Special Functions	25
6. Statistics	28
7. Computational Methods	31
8. Calculus and Integral Tables	34
9. Miscellaneous Mathematical Tables	59
-include squares, cubes, squaroots etc of numbers as well as trigonometric, hyperbolic, Bessel and probability functions	
II BASICS CONCEPTS OF GENERAL PHYSICS AND CHEMISTRY	
1. Units, Dimensions and Conversion Factors.....	82
2. Mechanics	85
3. Acoustics	92
4. Heat	95
5. Electricity and Magnetism	96
6. Optics	105
6a. Special Theory of Relativity	116
7. Gases, Liquids and Solids	118
8. Thermodynamics and Thermochemistry	126
9. Chemical Equilibrium, Electrochemistry and Kinetics	134
10. Surface Chemistry and Polymer Chemistry	141
11. Statistical Mechanics	142
12. Bibliography	144
III TABLES OF REFERENCE DATA AND SPECIFIC PROPERTIES OF SUBSTANCES	
-include thermal, optical, electrical, magnetic and other properties of a variety substances in gaseous, liquid and solid states, thermochemical and transport properties, thermocouple calibration data etc.	145
IV ATOMIC AND MOLECULAR STRUCTURE AND PROPERTIES	
1. Quantum Mechanics	189
2. Atomic Orbitals	193
-includes hydrogenic wave functions, Slater orbitals, electronic configuration etc.	
3. Atomic Spectra	204
includes atomic radii, ionization potentials and electron affinities	

4.	Valency and Chemical Binding	212
	A, Glossary of Terms; B, V.B. Theory ; C, M.O. Theory; D, Ligand Field Theory .	
5.	Bond and Molecular Properties	226
	-includes resonance energies, bond lengths, bond energies, covalent radii, electronegativities, ionic character, bond order, dipole moments etc.	
5.	Molecular Structure	236
	A, Directed hybrid orbitals; B, Shapes of Molecules; C, Point Groups and Character Tables	
7.	Molecular Spectroscopy	252
	-includes electronic, IR, NMR ESR and Microwave	

V INORGANIC AND ANALYTICAL CHEMISTRY

1.	Properties of Elements	273
2.	Allotropy of Common Elements	277
3.	Properties of Inorganic Compounds	277
4.	Glossary in Inorganic Chemistry	294
5.	Inorganic Analysis	299
6.	Instrumental Methods of Analysis	302
7.	Bibliography	304
	Periodic Table	305

VI ORGANIC CHEMISTRY

1.	Nomenclature	306
2.	Organic Reactions and Intermediates	313
3.	Name Reactions	319
4.	Glossary in Organic Chemistry	328
5.	Organic Analysis	337
6.	Bibliography	341
7.	Physical Constants of Organic Compounds	342

VII MISCELLANEOUS TOPICS

1.	Electronic Circuits	356
2.	Common Logarithms	362
3.	Recommended Physical Constants	364

SUBJECT INDEX
