## 1

### *Chemistry: Methods and Measurement* 1

#### **CHEMISTRY CONNECTION:**

#### **Chance Favors the Prepared Mind** 2

#### INTRODUCTION 2

- 1.1 Chemistry: An Overview 3
  - Definition of Chemistry 3
  - Major Areas of Chemistry 3
- 1.2 The Methodology 3
  - The Scientific Method 3
  - Science and Technology 5
- 1.3 Data, Results, and Units 5
- 1.4 Measurement in Chemistry 6
  - English and Metric Units 6
  - Unit Conversion: English and Metric Systems 7
  - Conversion of Units Within the Same System 8
  - Conversion of Units from One System to Another 10
- 1.5 Error, Accuracy, Precision, and Uncertainty 11
- 1.6 Significant Figures and Scientific Notation 12
  - Significant Figures 12
  - Recognition of Significant Figures 13
  - Scientific Notation 14
  - Significant Figures in Calculation of Results 15
  - Rounding Off Numbers 17
- 1.7 Experimental Quantities 18
  - Mass 18
  - Length 19
  - Volume 19
  - Time 20
  - Temperature 20
  - Energy 21
  - Concentration 22
  - Density and Specific Gravity 22

#### **A HUMAN PERSPECTIVE:**

#### **Food Calories** 23

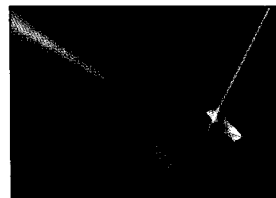

#### **A CLINICAL PERSPECTIVE:**

#### **Diagnosis Based on Waste** 25

- Summary 25
- Key Terms 26
- Questions and Problems 27
- Critical Thinking Problems 28

## 2

### *The Structure of the Atom* 29

#### **CHEMISTRY CONNECTION:**

#### **Curiosity, Science, and Medicine** 30

#### INTRODUCTION 30

- 2.1 Matter and Properties 30
  - Matter and Physical Properties 30
  - Matter and Chemical Properties 31
  - Intensive and Extensive Properties 32
  - Classification of Matter 32
- 2.2 Matter and Structure 34
  - Atomic Structure 34
  - Isotopes 36
  - Ions 38
- 2.3 Development of the Atomic Theory 39
  - Dalton's Theory 39
  - Subatomic Particles: Electrons, Protons, and Neutrons 39
  - The Nucleus 40
  - Light and Atomic Structure 40
  - The Bohr Atom 42
- 2.4 Modern Atomic Theory 43

#### **A HUMAN PERSPECTIVE:**

#### **Atomic Spectra and the Fourth of July** 43

#### **AN ENVIRONMENTAL PERSPECTIVE:**

#### **Electromagnetic Radiation and Its Effects on Our Everyday Lives** 44

- Summary 46
- Key Terms 47
- Questions and Problems 47
- Critical Thinking Problems 48

## 3

### *Elements, Atoms, and the Periodic Table* 49

#### **CHEMISTRY CONNECTION:**

#### **Managing Mountains of Information** 50

#### INTRODUCTION 50

- 3.1 The Periodic Law and the Periodic Table 50
  - Periods and Families 51
  - Metals and Nonmetals 52
  - Atomic Number and Atomic Mass 52

- 3.2 Electron Arrangement and the Periodic Table 53  
 Valence Electrons 53  
 Energy Levels and Sublevels 56  
 Electron Configuration and the Aufbau Principle 57

**A HUMAN PERSPECTIVE:**

**How the Elements Came into Being 58**

- 3.3 The Octet Rule 59  
 Ion Formation and the Octet Rule 60  
 3.4 Trends in the Periodic Table 61  
 Atomic Size 61

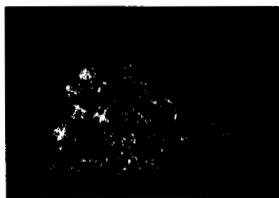

**A MEDICAL PERSPECTIVE:**

**Copper Deficiency and Wilson's Disease 62**

- Ion Size 63  
 Ionization Energy 64  
 Electron Affinity 64  
 Summary 65  
 Key Terms 66  
 Questions and Problems 66  
 Critical Thinking Problems 68

**4**

*Structure and  
 Properties of Ionic  
 and Covalent  
 Compounds 69*

**CHEMISTRY CONNECTION:**

**Magnets and Migration 70**

**INTRODUCTION 70**

- 4.1 Chemical Bonding 70  
 Lewis Symbols 70  
 Types of Chemical Bonds: Ionic and Covalent 71  
 4.2 Naming Compounds and Writing Formulas of  
 Compounds 73  
 Ionic Compounds 73  
 Covalent Compounds 77  
 4.3 Properties of Ionic and Covalent Compounds 80  
 Physical State 80  
 Melting and Boiling Points 80  
 Structure of Compounds in the Solid State 80  
 Solutions of Ionic and Covalent Compounds 80  
 4.4 Drawing Lewis Structures of Molecules and Polyatomic  
 Ions 80  
 Lewis Structures of Molecules 80

**A CLINICAL PERSPECTIVE:**

**Blood Pressure and the Sodium/Potassium Ratio 82**

- Lewis Structures of Polyatomic Ions 83  
 Lewis Structure, Stability, Multiple Bonds, and Bond  
 Energies 85  
 Lewis Structures and Resonance 86  
 Lewis Structures and Molecular Geometry; VSEPR  
 Theory 86  
 Lewis Structures and Polarity 90

- 4.5 Properties Based on Molecular Geometry 93  
 Solubility 93  
 Boiling Points of Liquids and Melting Points of Solids 94  
 4.6 Molecular Orbital Model of Bonding 95  
 Review of Atomic Orbitals 95  
 Molecular Orbitals 95  
 How Molecular Orbitals Affect Molecular Geometry 96  
 Summary 97  
 Key Terms 98  
 Questions and Problems 99  
 Critical Thinking Problems 100

**5**

*Calculations and  
 the Chemical  
 Equation 101*

**CHEMISTRY CONNECTION:**

**The Chemistry of Automobile Air Bags 102**

**INTRODUCTION 102**

- 5.1 The Mole Concept and Atoms 102  
 The Mole and Avogadro's Number 103  
 Calculating Atoms, Moles, and Mass 104  
 5.2 Compounds 106  
 The Chemical Formula 106  
 5.3 The Mole Concept Applied to Compounds 107  
 5.4 The Chemical Equation and the Information It  
 Conveys 109  
 A Recipe for Chemical Change 109  
 Features of a Chemical Equation 109  
 The Experimental Basis of a Chemical Equation 110  
 5.5 Balancing Chemical Equations 110

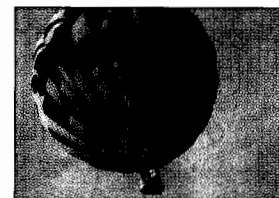

**A CLINICAL PERSPECTIVE:**

**Magnetic Resonance Imaging 111**

- 5.6 The Extent of Chemical Reactions 115  
 5.7 Calculations Using the Chemical Equation 115  
 General Principles 115  
 Use of Conversion Factors 116  
 The Limiting Reactant Problem 121  
 Summary 124  
 Key Terms 125  
 Questions and Problems 126  
 Critical Thinking Problems 127

**6**

*States of Matter:  
 Gases, Liquids, and  
 Solids 129*

**CHEMISTRY CONNECTION:**

**The Demise of the Hindenburg 130**

**INTRODUCTION 130**

- 6.1 The Gaseous State 131

- Measurement of Gases 131
- Boyle's Law 132
- Charles's Law 133
- Combined Gas Law 135
- Avogadro's Law 137
- Molar Volume of a Gas 137
- The Ideal Gas Law 137
- Dalton's Law of Partial Pressures 139

### AN ENVIRONMENTAL PERSPECTIVE:

#### The Greenhouse Effect and Global Warming 140

- Kinetic Molecular Theory of Gases 140
- Ideal Gases Versus Real Gases 141

#### 6.2 The Liquid State 141

- Compressibility 142
- Viscosity 142

### A CLINICAL PERSPECTIVE:

#### Blood Gases and Respiration 142

- Surface Tension 143
- Vapor Pressure of a Liquid 143
- Van der Waals Forces 144
- Hydrogen Bonding 144

#### 6.3 The Solid State 145

- Properties of Solids 145
- Types of Crystalline Solids 146
- Summary 146
- Key Terms 147
- Questions and Problems 147
- Critical Thinking Problems 148

## 7

### Reactions and Solutions 149

### CHEMISTRY CONNECTION:

#### Seeing a Thought 150

### INTRODUCTION 150

- 7.1 Classification of Chemical Reactions 150
  - Combination Reactions 151
  - Decomposition Reactions 151
  - Replacement Reactions 151
- 7.2 Types of Chemical Reactions 152
  - Precipitation Reactions 152
  - Reactions with Oxygen 153
  - Acid-Base and Oxidation-Reduction Reactions 154
- 7.3 Properties of Solutions 154
  - General Properties of Liquid Solutions 154
  - Solutions and Colloids 155
  - Degree of Solubility 156
  - Solubility and Equilibrium 156
  - Solubility of Gases: Henry's Law 156
- 7.4 Concentration of Solutions: Percentage 157
  - Weight/Volume Percent 157

### A HUMAN PERSPECTIVE:

#### Scuba Diving: Nitrogen and the Bends 157

Volume/Volume Percent 159

Weight/Weight Percent 159

#### 7.5 Concentration of Solutions: Moles and Equivalents 160

Molarity 160

Representation of Concentration of Ions in Solution 163

#### 7.6 Concentration-Dependent Solution Properties 164

Vapor Pressure Lowering 164

Freezing Point Depression and Boiling Point Elevation 164

Osmotic Pressure 165

#### 7.7 Water as a Solvent 168

#### 7.8 Electrolytes in Body Fluids 168

### A HUMAN PERSPECTIVE:

#### An Extraordinary Molecule 169

Summary 170

Key Terms 172

Questions and Problems 172

Critical Thinking Problems 173

## 8

### Chemical and Physical Change: Energy, Rate, and Equilibrium 175

### CHEMISTRY CONNECTION:

#### Getting Nothing for Something 176

### INTRODUCTION 176

- 8.1 Thermodynamics 176
  - The Chemical Reaction and Energy 177
  - Exothermic and Endothermic Reactions 177
  - Enthalpy 177
  - Spontaneous and Nonspontaneous Reactions 178
  - Entropy 178
  - Free Energy 178

### A HUMAN PERSPECTIVE:

#### Triboluminescence: Sparks in the Dark with Candy 179

- 8.2 Experimental Determination of Energy Change in Reactions 179
- 8.3 Kinetics 182
  - The Chemical Reaction 182
  - Activation Energy and the Activated Complex 182

### A CLINICAL PERSPECTIVE:

#### Hot and Cold Packs 183

- Experimental Factors Affecting Reaction Rate 184
- Mathematical Representation of Reaction Rate 185

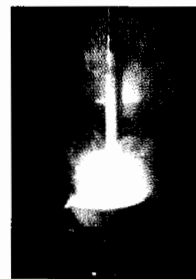

#### 8.4 Equilibrium 187

Rate and Reversibility of Reactions 187

Physical Equilibrium 187

Chemical Equilibrium 188

The Generalized Equilibrium-Constant Expression 189

- LeChatelier's Principle 192  
 Summary 195  
 Key Terms 195  
 Questions and Problems 196  
 Critical Thinking Problems 197

## 9

### *Charge-Transfer Reactions: Acids and Bases and Oxidation- Reduction 199*

#### **CHEMISTRY CONNECTION:**

**Drug Delivery 200**

#### **INTRODUCTION 200**

- 9.1 Acids and Bases 200  
 Learning the Terminology 201  
 Arrhenius Theory of Acids and Bases 201  
 Brønsted-Lowry Theory of Acids and Bases 201
- 9.2 Solutions of Acids and Bases 201  
 Strengths of Acids and Bases 202  
 The Dissociation of Water 202  
 The pH Scale 203  
 The Importance of pH and pH Control 208  
 Neutralization 208

#### **AN ENVIRONMENTAL PERSPECTIVE:**

**Acid Rain 210**

- 9.3 Acid-Base Buffers 210  
 The Buffer Process 212  
 Addition of Base ( $\text{OH}^-$ ) to a Buffer Solution 212  
 Addition of Acid ( $\text{H}_3\text{O}^+$ ) to a Buffer Solution 212

#### **A CLINICAL PERSPECTIVE:**

**Control of Blood pH 215**

- 9.4 Oxidation-Reduction Processes 216  
 Oxidation and Reduction 216  
 Oxidation and Reduction Reactions 216

#### **A CLINICAL PERSPECTIVE:**

**Oxidizing Agents for Chemical Control of Microbes 217**

- Summary 218  
 Key Terms 218  
 Questions and Problems 219  
 Critical Thinking Problems 220

## 10

### *Radioactivity and Nuclear Medicine 221*

#### **CHEMISTRY CONNECTION:**

**An Extraordinary Woman in Science 222**

#### **INTRODUCTION 222**

- 10.1 Natural Radioactivity 223  
 Alpha Particles 223  
 Beta Particles 223  
 Gamma Rays 224  
 Properties of Alpha, Beta, and Gamma Radiation 224
- 10.2 Writing a Balanced Nuclear Equation 225  
 Alpha Decay 225  
 Beta Decay 225  
 Gamma Production 225  
 Predicting Products of Nuclear Decay 225
- 10.3 Properties of Radioisotopes 226  
 Nuclear Structure and Stability 227  
 Half-Life 227
- 10.4 Nuclear Power 228  
 Energy Production 229  
 Nuclear Fission 229  
 Nuclear Fusion 229  
 Breeder Reactors 231
- 10.5 Radiocarbon Dating 231
- 10.6 Medical Applications of Radioactivity 231

#### **AN ENVIRONMENTAL PERSPECTIVE:**

**Nuclear Waste Disposal 232**

- Cancer Therapy Using Radiation 232  
 Nuclear Medicine 233  
 Making Isotopes for Medical Applications 234
- 10.7 Biological Effects of Radiation 236  
 Radiation Exposure and Safety 236
- 10.8 Detection and Measurement of Radiation 237  
 Nuclear Imaging 237  
 Computer Imaging 237  
 The Geiger Counter 238  
 Film Badges 238

#### **AN ENVIRONMENTAL PERSPECTIVE:**

**Radon and Indoor Air Pollution 239**

- 10.9 Units of Radiation Measurement 239  
 The Curie 239  
 The Roentgen 239  
 The Rad 239  
 The Rem 240  
 Summary 240  
 Key Terms 241  
 Questions and Problems 241  
 Critical Thinking Problems 242

## 11

### *An Introduction to Organic Chemistry: The Saturated Hydrocarbons 243*

#### **CHEMISTRY CONNECTION:**

**The Origin of Organic Compounds 244**

#### **INTRODUCTION 244**

- 11.1 The Chemistry of Carbon 245  
 Important Differences Between Organic and Inorganic Molecules 246  
 Families of Organic Compounds 246
- 11.2 Alkanes 248  
 Structure and Physical Properties 249  
 Nomenclature 250  
 Constitutional Isomers 253

**AN ENVIRONMENTAL PERSPECTIVE:**

**Oil-Eating Bacteria 255**

- 11.3 Cycloalkanes 255
- 11.4 Conformations of Alkanes and Cycloalkanes 256
- 11.5 *Cis-Trans* Isomerism in Cycloalkanes 259
- 11.6 Reactions of Alkanes and Cycloalkanes 260  
 Combustion 260

**A MEDICAL PERSPECTIVE:**

**Polyhalogenated Hydrocarbons Used as Anesthetics 260**

- Halogenation 261  
 Summary of Reactions 262  
 Summary 262  
 Key Terms 263  
 Questions and Problems 263  
 Critical Thinking Problems 266

12

*The Unsaturated Hydrocarbons: Alkenes, Alkynes, and Aromatics 267*

**CHEMISTRY CONNECTION:**

**A Cautionary Tale: DDT and Biological Magnification 268**

**INTRODUCTION 268**

- 12.1 Alkenes and Alkynes: Structure and Physical Properties 269
- 12.2 Alkenes and Alkynes: Nomenclature 270
- 12.3 Geometric Isomers: A Consequence of Unsaturation 272
- 12.4 Reactions Involving Alkenes 274  
 Hydrogenation: Addition of  $H_2$  to an Alkene 274  
 Halogenation: Addition of  $X_2$  to an Alkene 275  
 Hydration: Addition of  $H_2O$  to an Alkene 276  
 Hydrohalogenation: Addition of  $HX$  to an Alkene 276  
 Addition Polymers of Alkenes 277
- 12.5 The Mechanism of Hydration 278
- 12.6 Aromatic Hydrocarbons 280  
 Structure and Properties 280  
 Nomenclature 281

**A HUMAN PERSPECTIVE:**

**Aromatic Compounds and Carcinogenesis 282**

- Reactions Involving Benzene 283  
 Summary of Reactions 284  
 Summary 285  
 Key Terms 285  
 Questions and Problems 285  
 Critical Thinking Problems 288

13

*Alcohols, Phenols, Thiols, and Ethers 289*

**CHEMISTRY CONNECTION:**

**Fetal Alcohol Syndrome 290**

**INTRODUCTION 290**

- 13.1 Alcohols: Structure and Physical Properties 291
- 13.2 Alcohols: Nomenclature 292  
 I.U.P.A.C. Names 292  
 Common Names 293
- 13.3 Medically Important Alcohols 293
- 13.4 Classification of Alcohols 295
- 13.5 Reactions Involving Alcohols 295  
 Preparation of Alcohols 296  
 Dehydration of Alcohols 296  
 The Mechanism of Dehydration 298  
 Oxidation Reactions 298

**A HUMAN PERSPECTIVE:**

**Alcohol Consumption and the Breathalyzer Test 300**

- 13.6 Oxidation and Reduction in Living Systems 300

**A CLINICAL PERSPECTIVE:**

**Multistep Organic Synthesis 301**

- 13.7 Phenols 302
- 13.8 Ethers 303
- 13.9 Thiols 304  
 Summary of Reactions 306  
 Summary 307  
 Key Terms 307  
 Questions and Problems 307  
 Critical Thinking Problems 310

14

*Aldehydes and Ketones 311*

**CHEMISTRY CONNECTION:**

**Genetic Complexity from Simple Molecules 312**

**INTRODUCTION 312**

- 14.1 Structure and Physical Properties 313
- 14.2 I.U.P.A.C. Nomenclature and Common Names 314

- Naming Aldehydes 314
- Naming Ketones 315

### 14.3 Important Aldehydes and Ketones 317

#### A CLINICAL PERSPECTIVE: Aldehydes in Medicine 317

- 14.4 Reactions Involving Aldehydes and Ketones 318
  - Preparation of Aldehydes and Ketones 318
  - Oxidation Reactions 319
  - Reduction Reactions 321
  - Addition Reactions 322
  - Aldol Condensation 324

#### A HUMAN PERSPECTIVE: The Chemistry of Vision 325

- Keto-Enol Tautomerism 326
- Summary of Reactions 327
- Summary 327
- Key Terms 328
- Questions and Problems 328
- Critical Thinking Problems 330

## 15

### Carbohydrates 331

#### CHEMISTRY CONNECTION:

#### Chemistry Through the Looking Glass 332

#### INTRODUCTION 332

- 15.1 Types of Carbohydrates 334
- 15.2 Monosaccharides 334
  - Nomenclature 334
  - Stereoisomers 335
  - Some Important Monosaccharides 336
  - Reducing Sugars 342
- 15.3 Oligosaccharides 343

#### A HUMAN PERSPECTIVE:

#### Blood Transfusions and the Blood Group Antigens 344

- Maltose 345
- Lactose 346
- Sucrose 347

- 15.4 Polysaccharides 347
  - Starch 347

#### A HUMAN PERSPECTIVE:

#### Tooth Decay and Simple Sugars 348

- Glycogen 348

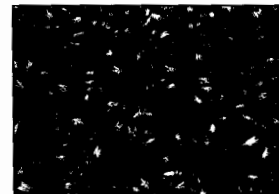

#### A CLINICAL PERSPECTIVE:

#### The Bacterial Cell Wall 350

- Cellulose 350
- Summary 352
- Key Terms 352
- Questions and Problems 353
- Critical Thinking Problems 354

## 16

### Carboxylic Acids and Carboxylic Acid Derivatives 355

#### CHEMISTRY CONNECTION:

#### Wake Up, Sleeping Gene 356

#### INTRODUCTION 356

- 16.1 Carboxylic Acids 357
  - Structure and Physical Properties 357
  - Nomenclature 358
  - Some Important Carboxylic Acids 361
  - Reactions Involving Carboxylic Acids 362

#### AN ENVIRONMENTAL PERSPECTIVE:

#### Garbage Bags from Potato Peels 362

- 16.2 Esters 366
  - Structure and Physical Properties 366
  - Nomenclature 366
  - Reactions Involving Esters 366
- 16.3 Acid Chlorides and Acid Anhydrides 368
  - Acid Chlorides 368
  - Acid Anhydrides 369

#### A HUMAN PERSPECTIVE:

#### Carboxylic Acid Derivatives of Special Interest 370

- 16.4 Nature's High-Energy Compounds: Phosphoesters and Thioesters 372
  - Summary of Reactions 374
  - Summary 374
  - Key Terms 375
  - Questions and Problems 375
  - Critical Thinking Problems 378

## 17

### Lipids and Their Functions in Biochemical Systems 379

#### CHEMISTRY CONNECTION:

#### Life-Saving Lipids 380

#### INTRODUCTION 380

- 17.1 Biological Functions of Lipids 380
- 17.2 Fatty Acids 381
  - Structure and Properties 382
  - Chemical Reactions of Fatty Acids 384
  - Eicosanoids: Prostaglandins, Leukotrienes, and Thromboxanes 385
- 17.3 Glycerides 387
  - Neutral Glycerides 387
  - Phosphoglycerides 389

- 17.4 Nonglyceride Lipids 390
  - Sphingolipids 390
  - Steroids 390

**A HUMAN PERSPECTIVE:**

- Anabolic Steroids and Athletics 391**

**A CLINICAL PERSPECTIVE:**

- Steroids and the Treatment of Heart Disease 393**

- Waxes 394

- 17.5 Complex Lipids 394

- 17.6 The Structure of Biological Membranes 397
  - Fluid Mosaic Structure of Biological Membranes 398
  - Membrane Transport 399

**A CLINICAL PERSPECTIVE:**

- Antibiotics That Destroy Membrane Integrity 401**

- Energy Requirements for Transport 405

- Summary 406

- Key Terms 407

- Questions and Problems 407

- Critical Thinking Problems 408

## 18

### *Amines and Amides 409*

**CHEMISTRY CONNECTION:**

- The Nicotine Patch 410**

**INTRODUCTION 410**

- 18.1 Amines 410
  - Structure and Physical Properties 410
  - Nomenclature 413

**A CLINICAL PERSPECTIVE:**

- Medically Important Amines 414**

- Reactions Involving Amines 416

- Quaternary Ammonium Salts 418

**A MEDICAL PERSPECTIVE:**

- Secondary Amines and Cancer 419**

- 18.2 Heterocyclic Amines 419

- 18.3 Amides 421

- Structure and Physical Properties 421

- Nomenclature 421

**A HUMAN PERSPECTIVE:**

- Amines and the Central Nervous System 422**

**A CLINICAL PERSPECTIVE:**

- Medically Important Amides 423**

- Reactions Involving Amides 424

- 18.4 A Preview of Amino Acids, Proteins, and Protein Synthesis 426

- Summary of Reactions 426

- Summary 427

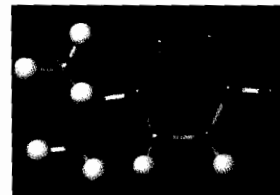

Key Terms 427

Questions and Problems 428

Critical Thinking Problems 430

## 19

### *Protein Structure and Function 431*

**CHEMISTRY CONNECTION:**

- Can Radioactive Antibodies Cure Cancer? 432**

**INTRODUCTION 432**

- 19.1 Cellular Functions of Proteins 432

- 19.2 The  $\alpha$ -Amino Acids 433

- 19.3 The Peptide Bond 436

**A HUMAN PERSPECTIVE:**

- The Opium Poppy and Peptide Synthesis in the Brain 438**

- 19.4 The Primary Structure of Proteins 440

- 19.5 The Secondary Structure of Proteins 441

- $\alpha$ -Helix 441

- $\beta$ -Pleated Sheet 442

- 19.6 The Tertiary Structure of Proteins 444

- 19.7 The Quaternary Structure of Proteins 445

- 19.8 Myoglobin and Hemoglobin 446

- Myoglobin and Oxygen Storage 446

- Hemoglobin and Oxygen Transport 447

**A MEDICAL PERSPECTIVE:**

- Immunoglobulins: Proteins That Defend the Body 448**

- Oxygen Transport from Mother to Fetus 450

- Sickle Cell Anemia 450

- 19.9 Collagen, An Important Protein in Humans 451

- The Structure of Collagen 452

- The Role of Vitamin C in Collagen Metabolism 452

- 19.10 An Overview of Protein Structure and Function 452

- 19.11 The Effect of Temperature on Proteins 454

- 19.12 The Effect of pH on Proteins 454

- 19.13 Dietary Protein and Protein Digestion 456

- Summary 457

- Key Terms 458

- Questions and Problems 458

- Critical Thinking Problems 460

## 20

### *Enzymes 461*

**CHEMISTRY CONNECTION:**

- Super Hot Enzymes and the Origin of Life 462**

**INTRODUCTION 462**

- 20.1 Nomenclature and Classification 463
  - Nomenclature of Enzymes 463
  - Classification of Enzymes 464
- 20.2 The Effect of Enzymes on the Activation Energy of a Reaction 466
- 20.3 The Effect of Substrate Concentration on Enzyme-Catalyzed Reactions 466
- 20.4 The Enzyme–Substrate Complex 467
- 20.5 Specificity of the Enzyme–Substrate Complex 468
- 20.6 The Transition State and Product Formation 469

#### A CLINICAL PERSPECTIVE:

#### Enzymes, Isoenzymes, and Myocardial Infarction 470

- 20.7 Cofactors and Coenzymes 473
- 20.8 Environmental Effects 476
  - Effect of pH 476
  - Effect of Temperature 476
- 20.9 Regulation of Enzyme Activity 477
  - Allosteric Enzymes 477
  - Feedback Inhibition 478
  - Zymogens 479
- 20.10 Inhibition of Enzyme Activity 479
  - Irreversible Inhibitors 479
  - Reversible, Competitive Inhibitors 479
  - Reversible, Noncompetitive Inhibitors 480
- 20.11 Proteolytic Enzymes 481
- 20.12 Proteolytic Enzymes and Blood Coagulation 482
  - Vitamin K and Its Role in Blood Clotting 484
- 20.13 Acetylcholinesterase and Nerve Transmission 485

#### A CLINICAL PERSPECTIVE:

#### The AIDS Test 486

- 20.14 Uses of Enzymes in Medicine 489
  - Summary 489
  - Key Terms 490
  - Questions and Problems 491
  - Critical Thinking Problems 492

## 21

### Carbohydrate Metabolism 493

#### CHEMISTRY CONNECTION:

#### The Man Who Got Topsy from Eating Pasta 494

#### INTRODUCTION 494

- 21.1 ATP: The Cellular Energy Currency 494
- 21.2 Overview of Catabolic Processes 498
  - Stage I: Hydrolysis of Dietary Macromolecules into Small Subunits 498
  - Stage II: Conversion of Monomers into a Form That Can Be Completely Oxidized 499

Stage III: The Complete Oxidation of Nutrients and the Production of ATP 499

- 21.3 Glycolysis 500
  - An Overview 500
  - Reactions of Glycolysis 503
- 21.4 Fermentations 508
  - Lactate Fermentation 508
  - Alcohol Fermentation 509
- 21.5 The Pentose Phosphate Pathway 510
- 21.6 Gluconeogenesis: The Synthesis of Glucose 511
- 21.7 Glycogen Synthesis and Degradation 512
  - The Structure of Glycogen 513
  - Glycogenolysis: Glycogen Degradation 514

#### A HUMAN PERSPECTIVE:

#### Fermentations: The Good, the Bad, and the Ugly 516

Glycogenesis: Glycogen Synthesis 516

#### A HUMAN PERSPECTIVE:

#### Glycogen Storage Diseases 520

Compatibility of Glycogenesis and Glycogenolysis 520

- 21.8 Conversion of Pyruvate to Acetyl CoA 521
  - Summary 523
  - Key Terms 524
  - Questions and Problems 524
  - Critical Thinking Problems 525

## 22

### Aerobic Respiration and Energy Production 527

#### CHEMISTRY CONNECTION:

#### Mitochondria from Mom 528

#### INTRODUCTION 528

- 22.1 The Mitochondria 528
  - Structure and Function 529
  - Origin of the Mitochondria 529

#### A HUMAN PERSPECTIVE:

#### Exercise and Energy Metabolism 530

- 22.2 An Overview of Aerobic Respiration 530
- 22.3 The Citric Acid Cycle (The Krebs Cycle) 532
  - Reactions of the Citric Acid Cycle 532
  - Summary of the Energy Yield 534
- 22.4 Oxidative Phosphorylation 536
  - Electron Transport Systems and the Hydrogen Ion Gradient 536
  - ATP Synthase and the Production of ATP 536

#### A HUMAN PERSPECTIVE:

#### Brown Fat: The Fat That Makes You Thin? 538

- 22.5 Control of the Citric Acid Cycle 540

- 22.6 Degradation of Amino Acids 541  
 Removal of  $\alpha$ -Amino Groups: Transamination 542  
 Removal of  $\alpha$ -Amino Groups: Oxidative  
 Deamination 543  
 The Fate of Amino Acid Carbon Skeletons 544
- 22.7 The Urea Cycle 544  
 Reactions of the Urea Cycle 545
- 22.8 Overview of Anabolism: The Citric Acid Cycle as a  
 Source of Biosynthetic Intermediates 546  
 Summary 548  
 Key Terms 549  
 Questions and Problems 549  
 Critical Thinking Problems 550

## 23

### *Fatty Acid Metabolism 551*

#### **CHEMISTRY CONNECTION:**

##### **Obesity: A Genetic Disorder? 552**

#### INTRODUCTION 552

- 23.1 Lipid Metabolism in Animals 553  
 Digestion and Absorption of Dietary Fats 553  
 Lipid Storage 554
- 23.2 Fatty Acid Degradation 555  
 An Overview of Fatty Acid Degradation 555

#### **A HUMAN PERSPECTIVE:**

##### **Losing Those Unwanted Pounds of Adipose Tissue 556**

The Reactions of  $\beta$ -Oxidation 558

- 23.3 Ketone Bodies 562  
 Ketosis 562  
 Ketogenesis 562

- 23.4 Fatty Acid Synthesis 564  
 A Comparison of Fatty Acid Synthesis and  
 Degradation 564

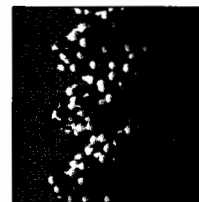

#### **A CLINICAL PERSPECTIVE:**

##### **Diabetes Mellitus and Ketone Bodies 566**

- 23.5 The Regulation of Lipid and Carbohydrate  
 Metabolism 568  
 The Liver 568  
 Adipose Tissue 569  
 Muscle Tissue 569  
 The Brain 569
- 23.6 The Effect of Insulin and Glucagon on Cellular  
 Metabolism 570  
 Summary 571  
 Key Terms 572  
 Questions and Problems 572  
 Critical Thinking Problems 573

## 24

### *Introduction to Molecular Genetics 575*

#### **CHEMISTRY CONNECTION:**

##### **A World Without Human Genetic Disease? 576**

#### INTRODUCTION 576

- 24.1 The Structure of the Nucleotide 577  
 Chemical Composition of DNA and RNA 577  
 Nucleotide Structure 578
- 24.2 The Structure of DNA and RNA 580  
 DNA Structure: The Double Helix 581
- A CLINICAL PERSPECTIVE:**  
**Fooling the AIDS Virus with "Look-Alike"  
 Nucleotides 582**  
 RNA Structure 582
- 24.3 DNA Replication 583
- 24.4 Information Flow in Biological Systems 585  
 Classes of RNA Molecules 586  
 Transcription 586  
 Post-transcriptional Processing of RNA 589
- 24.5 The Genetic Code 591
- 24.6 Protein Synthesis 593  
 The Role of Transfer RNA 594  
 The Process of Translation 594
- 24.7 Mutation, Ultraviolet Light, and DNA Repair 597  
 The Nature of Mutations 597  
 The Results of Mutations 597  
 Mutagens and Carcinogens 598  
 Ultraviolet Light Damage and DNA Repair 598

#### **A CLINICAL PERSPECTIVE:**

##### **The Ames Test for Carcinogens 599**

Consequences of Defects in DNA Repair 600

- 24.8 Recombinant DNA 600  
 Tools Used in the Study of DNA 600

#### **A HUMAN PERSPECTIVE:**

##### **DNA Fingerprints: Admissible in Court? 604**

Genetic Engineering 604

#### **A MEDICAL PERSPECTIVE:**

##### **The New Genetics and Human Genetic Disease 607**

Summary 608  
 Key Terms 609  
 Questions and Problems 609  
 Critical Thinking Problems 610

*Appendixes 611*

*Glossary 647*

*Answers to Selected Problems 661*

*Credits 693*
