

CONTENTS

Preface	vii
I Elements and Compounds	1
II Formulas and Equations. Combining Proportions by Weight	8
III Oxygen, Valence	13
IV Gases. The Kinetic Theory	23
V Hydrogen. Equivalent Weight	33
VI Water	42
VII Solutions	51
VIII Hydrogen Chloride and Sodium Hydroxide	59
IX Structure of Atoms and Ions. Ionization	68
X Ionic Reactions. Acids, Bases, and Salts	80
XI Chlorine, Oxidation and Reduction	92
XII The Halogen Family of Elements	99
XIII Molecular Weight and Volume	104
XIV Sulfur and Hydrogen Sulfide	112
XV Oxides and Acids of Sulfur	120
XVI Classification of the Elements	125
XVII The Atmosphere	136
XVIII Nitrogen and Ammonia	143
XIX Nitric Acid and Explosives	151
XX Phosphorus, Arsenic, Antimony, Bismuth. Fertilizers	159
XXI Carbon and Its Oxides. Fuels	168
XXII Hydrocarbons, Plastics	177
XXIII Carbohydrates and Foods	187
XXIV Silicon and Boron. Glass	195
XXV Lead and Silver	204
XXVI Mercury and Copper	211
XXVII Iron and Steel	218
XXVIII Aluminum, Chromium, Zinc, Magnesium	230
XXIX Calcium Compounds. Hard Water	242
XXX Sodium and Potassium	252
Appendix	257
Index	261
