

Contents

	PAGE
<i>Chapter I. Introduction</i>	
The Methods and Purpose of Science	1
<i>Chapter II. The Atomic and Molecular Theories</i>	
Elements and Compounds	4
Laws of Chemical Combination by Weight	5
Dalton's Atomic Theory	8
The Gas Laws and Avogadro's Hypothesis	11
<i>Chapter III. States of Matter</i>	
The Gaseous State	17
The Equation of State for Gases	18
Partial Pressure	22
Diffusion and Effusion	25
The Kinetic Theory of Gases	29
The Specific Heats of a Gas	35
The Liquid State	37
The Solid State	40
Crystalline Substances	40
Allotropy	50
Polymorphism	54
Isomorphism	54
Non-Crystalline Substances	60
<i>Chapter IV. Chemical Change and Energy</i>	
Energy	62
Physical and Chemical Change	65
Thermochemistry	69
<i>Chapter V. Molecular Weights, Atomic Weights, and Equivalents</i>	
Definitions	76

	PAGE
Determination of Molecular Weights of Gases	78
Determination of Molecular Weights of Vapours	84
Molecular Weights and Thermal Dissociation	88
Molecular Weights of Substances in Solution	91
Equivalents	102
Atomic Weights	108
Isotopes	118
<i>Chapter VI. The Periodic Classification, Atomic Structure, and Valency</i>	
Periodic Classification	120
The Structure of the Atom	121
Atomic Structure and the Periodic Table	125
Valency	129
The Covalent Bond	131
Polarity	138
The Ionic Bond	142
Determination of Types of Valency	147
The Lone Pair and the Inert Pair	149
Relationships in the Periodic Table	150
<i>Chapter VII. The Electron in the Atom as a Stationary Wave System</i>	
Particles and Waves	159
Wave Functions or Orbitals	161
Quantum Numbers	165
Shapes of Molecules	170
Hybridization	174
<i>Chapter VIII. Rate of Reaction: Equilibria</i>	
Rate of Chemical Change	178
Homogeneous Reactions	178
Relation Between Reaction Conditions and Reaction Rate	179
Heterogeneous Reactions	188
Catalysis	189

	PAGE
Equilibria	192
Equilibria in Heterogeneous Systems: the Phase Rule	193
Equilibria in Homogeneous Systems	196
<i>Chapter IX. Solution and Osmosis</i>	
Solution of Solids in Liquids	206
Equilibrium Diagrams	211
Distribution of a Solute Between Two Immiscible Solvents	215
Solutions of Liquids in Liquids	218
Immiscible Liquids	218
Completely Miscible Liquids	220
Partially Miscible Liquids	226
Solutions of Gases in Liquids	228
Osmosis	233
<i>Chapter X. Electrolytes</i>	
Acids, Bases, and Salts	244
Acids and Bases	251
Salts	262
Hydrolysis	266
<i>Chapter XI. Electrode Potential, Electrolysis, Conductance</i>	
Electrode Potential	267
Electrolysis	275
Electrical Conductance	284
<i>Chapter XII. Colloids</i>	
Lyophobic Colloids	293
Lyophilic Colloids	303
Colloidal Electrolytes	306
Chromatography	306
Colloids in Everyday Life	309
<i>Chapter XIII. Hydrogen</i>	
Hydrogen	311
Deuterium	319
<i>Chapter XIV. Oxygen</i>	
Oxygen	321

	PAGE
Ozone	327
Oxides	331
Oxidation and Reduction	334
<i>Chapter XV. Water and Hydrogen Peroxide</i>	
Water	338
Hydrogen Peroxide	344
<i>Chapter XVI. Group I: The Alkali Metals</i>	
General Chemistry of Elements in Group I	350
Sodium and its Compounds	353
Potassium and its Compounds	378
<i>Chapter XVII. Group II: The Alkaline Earth Metals</i>	
General Chemistry of Elements in Group II	390
Magnesium and its Compounds	392
Calcium and its Compounds	402
Barium and its Compounds	415
<i>Chapter XVIII. Group III: Sub-Group N. Boron and Aluminium</i>	
General Chemistry of Elements in Sub-Group IIIN	418
Boron and its Compounds	421
Aluminium and its Compounds	423
<i>Chapter XIX. Group IV: Sub-Group N. Carbon and Silicon</i>	
General Chemistry of Elements in Sub-Group IVN	432
Carbon	436
Carbon Compounds	443
Fuel	452
Silicon and its Compounds	457
<i>Chapter XX. Group IV: Sub-Group N (continued): Germanium, Tin, and Lead</i>	
Tin and its Compounds	463
Lead and its Compounds	468
<i>Chapter XXI. Group V: Sub-Group N. Nitrogen</i>	
General Chemistry of Elements in Group VN	478

	PAGE
Nitrogen	486
Ammonia and Ammonium Compounds	493
Oxides of Nitrogen	500
Oxyacids of Nitrogen	507
<i>Chapter XXII. Group V: Sub-Group N (continued): Phosphorus, Arsenic, and Antimony</i>	
Phosphorus	517
Hydrides of Phosphorus	525
Halogen Derivatives of Phosphorus	528
Oxides and Oxyacids of Phosphorus	531
Arsenic and its Compounds	538
Antimony and its Compounds	544
Bismuth and its Compounds	547
<i>Chapter XXIII. Group VI: Sub-Group N. Oxygen and Sulphur</i>	
General Chemistry of Oxygen and Sulphur	550
Sulphur	553
Hydrides of Sulphur	558
Oxides and Oxyacids of Sulphur	563
Sulphuric Acid	568
<i>Chapter XXIV. Group VII: Sub-Group N. The Halogens</i>	
General Chemistry of the Halogens	579
Fluorine	584
Chlorine	587
Hydrogen Chloride	592
Oxides and Oxyacids of Chlorine	597
Bromine	603
Hydrogen Bromide	604
Oxides and Oxyacids of Bromine	606
Iodine	607
Hydrogen Iodide	610
Oxides and Oxyacids of Iodine	612

	PAGE
<i>Chapter XXV. Transition Series of the First Long Period</i>	
General Chemistry of Chromium, Manganese, Iron, Cobalt, and Nickel	615
Titanium	622
Chromium and its Compounds	622
Manganese and its Compounds	627
Iron: Metallurgy of Iron and Steel	630
Compounds of Iron	637
Cobalt and its Compounds	640
Nickel and its Compounds	642
<i>Chapter XXVI. Group XI: The Coinage Metals: Copper, Silver, and Gold</i>	
General Chemistry of Elements of Group XI	647
Metallic Copper	651
General Chemistry of Copper Compounds	655
Cuprous Compounds	656
Cupric Compounds	660
Metallic Silver	665
Silver Compounds	670
Gold and its Compounds	674
<i>Chapter XXVII. Group XII: Zinc and Mercury</i>	
General Chemistry of Elements in Group XII	677
Zinc and its Compounds	679
Mercury and its Compounds	686
<i>Chapter XXVIII. Nuclear Chemistry</i>	
Radioactivity	696
Artificial Nuclear Reactions	703
Applications of Nuclear Chemistry	705
Nuclear Reactions and the Generation of Energy	707
Questions	717
Answers to Numerical Problems	772
Index	775
