Etymology of the Elements	1
<b>1. A Brief History</b>	<b>7</b>
1.1 Introduction	7
1.2 Background of Alchemy	8
1.3 Rise of Chemistry	14
1.4 Combustion	15
1.5 Phlogiston—A Poor but Workable Paradigm	16
1.6 Lavoisier and the New Chemistry	19
<b>2. Gases: The Beginnings of an Atomic-Molecular Paradigm</b>	<b>22</b>
2.1 Properties of Gases—The Gas Laws	23
2.2 Kinetic Molecular Theory	31
2.3 Impact of the Kinetic Molecular Theory on Chemistry	35
<b>3. The Concept of Energy</b>	<b>37</b>
3.1 The Concept of Energy	37
3.2 First Law of Thermodynamics	39
3.3 Second Law of Thermodynamics	41
<b>4. Concepts of Chemical Combination</b>	<b>48</b>
4.1 Two Kinds of Matter	48
4.2 A Glimpse into the Atom	51
4.3 Discovery of the Electron	52
4.4 Rutherford's Solar System Model	54
4.5 Nature of Electrically Conducting Substances	57
4.6 Nature of Nonconductors	59
4.7 Valence: The Ability of Atoms to Combine	60
4.8 Ionization Potentials	61
4.9 Nature of the Ionic Bond	62
4.10 Nature of the Covalent Bond	64
4.11 Bonding in Metals	67
4.12 Recurring Properties of the Elements	68
4.13 The Transition Metals	73

## x Contents

5. Quantum Theory of the Atom	79
5.1 Inadequacies in the Rutherford Atom	79
5.2 Discontinuous Emission of Energy by Atoms	79
5.3 Planck's Theory of the Quantum of Energy	80
5.4 Bohr Model	81
5.5 Wave Nature of Electrons Leads to a New Theory	82
5.6 Wave Mechanics and Bonding	85
6. Molecular Architecture	88
6.1 Tetrahedral Geometry	88
6.2 Geometry of Some Simple Molecules	90
6.3 Structures of Some of the Elements	91
6.4 Structures of Some Simple Compounds	97
6.5 Molecular Strain and Chemical Energy	101
6.6 Geometrical Isomers	106
6.7 Benzene Molecular	108
6.8 Octahedral Molecules	108
6.9 Phosphorus Pentachloride Molecule	111
6.10 "Sandwich" Molecules	112
6.11 Boron Hydrides	113
7. Instrumental Methods of Analysis	116
7.1 Electromagnetic Radiation	116
7.2 Energy Levels in Atoms and Molecules	117
7.3 Analysis of Electromagnetic Radiation	118
7.4 Electronic Spectra—Ultraviolet Spectroscopy	119
7.5 Vibrational Spectra—Infrared Spectroscopy	120
7.6 Nuclear Magnetic Resonance Spectroscopy	123
7.7 X-ray Diffraction Analysis	126
7.8 Concluding Remarks	128
8. Nuclear Chemistry: Alchemy Revisited	129
8.1 Discovery of X Rays	130
8.2 Discovery of Radioactivity	131
8.3 Alpha, Beta, and Gamma Rays	132
8.4 Atomic Numbers	134
8.5 The Mass Spectrograph—Isotopes	136
8.6 Artificial Disintegration of the Nucleus	138
8.7 Discovery of the Neutron	141
8.8 Energy Changes in Nuclear Reactions	143
8.9 Binding Energy and the Mass Defect	143
8.10 Nuclear Fission	145

<b>9. Chemical Reactions</b>	<b>152</b>
9.1 Statistical Nature of Chemical Changes	152
9.2 A Model for Chemical Reactions	155
9.3 Reactions of Ionic Compounds	157
9.4 Reactions of Covalent Compounds	158
9.5 Classification of Reactions of Covalent Molecules	160
9.6 Conclusion	170
<b>10. Equilibrium and Electricity</b>	<b>172</b>
THE CONCEPT OF EQUILIBRIUM	
10.1 Chemical Equilibrium	173
10.2 Other Examples of Equilibrium Systems	177
THE CHEMICAL EFFECTS OF ELECTRICITY	
10.3 Early Electrochemical Observations	177
10.4 Faraday and Electrochemistry	178
10.5 Acids and Bases	179
10.6 Arrhenius' Theory of Ionization	180
10.7 Strengths of Acids and Bases	181
10.8 Brønsted-Lowry Redefinition of Acids and Bases	182
10.9 Energy Considerations	184
<b>11. Some Consequences of Molecular Shapes</b>	<b>187</b>
11.1 Symmetry	187
11.2 Optical Activity	189
11.3 Hydrogen Bond	192
11.4 Proteins and Amino Acids	195
11.5 Structure of Proteins	198
11.6 Structure of Deoxyribonucleic Acid (DNA)	202
11.7 Function of a Sulfa Drug	207
11.8 Two Dissimilar Molecules with Similar Structures	208
<b>12. Polymer Chemistry</b>	<b>212</b>
12.1 Characteristics of Polymeric Substances	212
12.2 Classification of Polymers	213
12.3 Preparation of Polymers	214
12.4 Effect of Molecular Structure on Physical Properties	215
12.5 Stereoregular Polymers	219
12.6 Linear Rigid Polymers	220
<b>13. Organic Chemistry: A Search for Order</b>	<b>223</b>
13.1 Why Organic Chemistry?	223
13.2 Functional Groups	225

## xii Contents

13.3	Classification by Reaction Type	229
13.4	Synthetic Organic Chemistry	229
<b>14.</b>	<b>Chemistry and Life</b>	<b>231</b>
14.1	Complexity of Life	231
14.2	Theories of the Origin of Life	232
14.3	Organic Compounds of Living Matter	236
14.4	Cells: Basic Units of Life	236
14.5	Intermediary Metabolism	238
14.6	Energy Transformations in the Cell: Metabolism	242
14.7	Biosynthetic Metabolism: Photosynthesis	245
14.8	Biosynthetic Metabolism: Proteins and Nucleic Acids	247
14.9	Conclusion	248
<b>15.</b>	<b>Some Structurally Related Compounds of Biological Importance</b>	<b>251</b>
15.1	Ubiquitous Isoprene Unit	251
15.2	Steroids	254
15.3	Carcinogenic Hydrocarbons	261
15.4	Carcinogenic Activity and Structure	262
<b>16.</b>	<b>Chemical Technological Processes</b>	<b>265</b>
16.1	Nylon	266
16.2	Starting Materials for Nylon Manufacture	268
16.3	Sulfur: The Frasch Process	270
16.4	Sulfuric Acid	271
16.5	Synthetic Diamonds	274
<b>APPENDIX.</b>	<b>Units of Measurement</b>	<b>277</b>
	Metric Units	277
	Very Large and Very Small Numbers	278
<b>INDEX</b>		<b>279</b>
