## 1 The Chemical View of Matter 1

---

Pure Substances	2
Definitions: Operational and Theoretical	3
Separation of Mixtures into Pure Substances	3
Elements and Compounds	4
Chemical Changes and Physical Changes	6
Why Study Pure Substances and Their Chemical Changes?	8
The Structure of Matter Explains Chemical and Physical Properties	9
Facts, Laws, and Theories	9
The Language of Chemistry	12
Measurement	13

## 2 Atoms 20

---

The Greek Influence	20
Antoine Laurent Lavoisier: The Law of Conservation of Matter in Chemical Change	21
Joseph Louis Proust: The Law of Constant Composition	22
John Dalton: The Law of Multiple Proportions	23
Dalton's Atomic Theory	23
Dalton's Idea about Atomic Weights: The Follow-up	24
Atoms Are Divisible	27
Electrons	29
Protons	32
Neutrons	32
The Nucleus	34
Atomic Number	35
Isotopes	36
Where Are the Electrons?	38

## 3 Elements in Useful Order—The Periodic Table 49

---

Elements Described	49
The Periodic Law—The Basis of the Periodic Table	50
Features of the Modern Periodic Table	53
Uses of the Periodic Table	55
The Periodic Table in the Future	61

---

**4 Chemical Bonds 65**

---

Ionic Bonds	66
Properties of Ions, Atoms, and Molecules	70
Covalent Bonds	74
Hydrogen Bonding	82
Van der Waals Attractions	85
Metallic Bonding	85
Molecular Structure	86
Hybridization	87
Valence-Shell Electron-Pair Repulsion Theory	90

---

**5 Some Principles of Chemical Reactivity 98**

---

Rate of Chemical Reaction	102
Reversibility of Chemical Reactions	104
Quantitative Energy Changes in Chemical Reactions	106
Weight Relationships in Chemical Reactions	107

---

**6 Hydrogen Ion Transfer (Acid-Base) and Electron Transfer (Oxidation-Reduction) Reactions 113**

---

Formation of Solutions	113
Ionic Solutions (Electrolytes) and Molecular Solutions (Nonelectrolytes)	114
Acids and Bases	117
Salts	122
Sodium Chloride (Table Salt)	126
Nitrate Salts	127
Sodium Hydrogen Carbonate	127
Electron Transfer (Oxidation-Reduction)	129

---

**7 Useful Materials from the Earth, Sea, and Air 139**

---

Metals and Their Preparation	139
Elements from the Air	148
Glass—Silicon's Domain	150
Chemical Fertilizers—Keys to World Food Problems	154
The Numbers on the Bag	160

---

**8 The Ubiquitous Carbon Atom—An Introduction to Organic Chemistry 164**

---

Why Are There So Many Organic Compounds?	164
Chains of Carbon Atoms—The Hydrocarbons	165
Structural Isomers	167

Nomenclature—What's in a Name?	170
Optical Isomers	174
Geometric Isomers	177
Functional Groups	178
Aromatic Compounds	179

---

## 9 Some Applications of Organic Chemistry 185

---

Some Uses of Hydrocarbons	185
Gasoline	186
Some Important Compounds of Carbon, Hydrogen, and Oxygen	189
Methanol (Methyl Alcohol)	190
Ethanol (Ethyl Alcohol)	191
Propanols (Propyl Alcohols)	192
Ethylene Glycol and Glycerol (Glycerin)	193
Hydrogen Bonding in Alcohols	193
Methanoic Acid (Formic Acid)	196
Ethanoic Acid (Acetic Acid)	196
Fatty Acids	197
Synthetic Detergents (Syndets)	201
Useful Products from Organic Synthesis Reactions	202

---

## 10 Man-Made Giant Molecules—The Synthetic Polymers 209

---

What Are Giant Molecules?	209
Addition Polymers	210
Copolymers	214
Condensation Polymers	218
Silicones	223
Rearrangement Polymers	225
Polymer Additives—Toward an End Use	226
The Future of Polymers	226

---

## 11 Biochemistry—Basic Structures 233

---

Carbohydrates	233
Starches and Glycogen	236
Cellulose	237
Dietary Fats and Essential Fatty Acids	238
Proteins, Amino Acids, and the Peptide Bond	241
Enzymes	248
Nucleic Acids	253

---

## 12 Biochemical Processes 261

---

Biochemical Energy and ATP	261
Photosynthesis	264

Digestion	268
Glucose Metabolism	271
Synthesis of Living Systems	276

---

### **13 Science and Technology as a New Philosophy** 287

---

A Philosophical and Historical Background	287
Technology: Its Triumphs and Problems	291
Technology and the Human Environment	294
Technological Development and Its Environmental Consequences	299
Is Technology Escaping Control?	300

---

### **14 Energy and Our Society** 306

---

Fundamental Principles of Energy	308
Fossil Fuels	311
Coal Gasification	314
Electricity Production	316
Nuclear Energy	319
Controlled Fusion	329
Solar Energy	330

---

### **15 Toxic Substances in Our Environment** 337

---

Dose	337
Corrosive Poisons	338
Metabolic Poisons	340
Neurotoxins	349
Mutagens	353
Teratogens	357
Carcinogens	358
Hallucinogens	361
Alcohols	364

---

### **16 Water: Its Use and Misuse** 367

---

Water Reuse	367
Water Purification in Nature	368
The Scope of Water Pollutants	369
Water Purification: Classical and Modern Processes	379
Distillation	382
Freezing	382
Ion Exchange	383
Electrodialysis	384
Reverse Osmosis	385

Do Air Pollutants Solo or Aggregate?	393
A Major Air Pollutant—Sulfur Dioxide	395
Major Air Pollutants—Nitrogen Oxides	400
A Major Air Pollutant—Carbon Monoxide	404
Major Air Pollutants—Certain Hydrocarbons	405
Ozone—A Secondary Pollutant and a Sunscreen	406
Carbon Dioxide—An Air Pollutant . . . Or Is It?	408
The Automobile—A Special Case of Air Pollution	409
What Does the Future Hold?	413

**18 Consumer Chemistry 416**

---

Part I—Chemicals in Foods	417
Part II—Medicines	428
Part III—Beauty Aids	442
Part IV—Automotive Products	455
Part V—The Chemistry of Photography	462

**Appendix A The International System of Units (SI) 476**

---

Units of Length	476
Units of Mass	477
Units of Volume	478
Units of Energy	478
Other SI Units	478

**Appendix B Temperature Scales 479**

---

**Appendix C Factor-Label Approach to Conversion Problems 481**

---

**Appendix D Calculations with Chemical Equations 483**

---

**Answers to Self-Tests and Matching Sets 488**

---

**Photo Credits 497**

---

**Index 499**

---
