

# CONTENTS

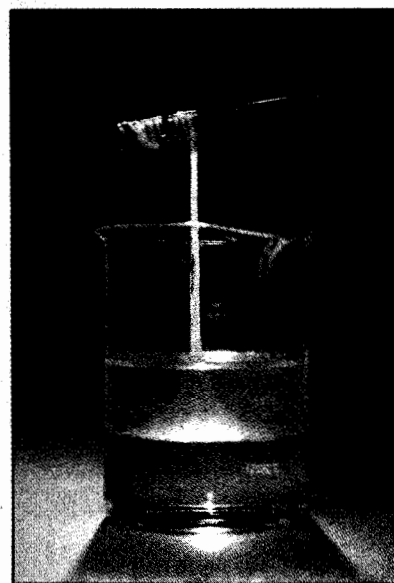

<b>PART ONE THE BASIC TOOLS OF CHEMISTRY</b>	<b>1</b>
<b>INTERVIEW BARNETT ROSENBERG</b>	<b>2</b>
<b>CHAPTER 1 THE TOOLS OF CHEMISTRY</b>	<b>7</b>
1.1 The Science of Chemistry	7
1.2 Methods of Science	8
1.3 Some Definitions	9
1.4 Units of Measurement	13
1.5 Handling Numbers	22
1.6 Problem Solving by Dimensional Analysis	26
<b>INTERVIEW BASSAM SHAKHASHIRI</b>	<b>37</b>
<b>CHAPTER 2 ATOMS AND ELEMENTS</b>	<b>41</b>
2.1 Elements	42
2.2 Atoms	43
2.3 Isotopes	47
2.4 Atomic Weight	48
2.5 The Periodic Table of the Elements—An Introduction	50
2.6 The Mole	56
SOMETHING MORE ABOUT Chemical Elements: Platinum	62
<b>CHAPTER 3 COMPOUNDS AND MOLECULES</b>	<b>69</b>
3.1 Compounds, Molecules, and Molecular Formulas	70
3.2 Elements That Exist As Molecules	72
3.3 Ions and Ionic Compounds	72
3.4 Names of Compounds	78
SOMETHING MORE ABOUT Planetary Chemistry: Neptune	82
3.5 Molar Mass, Molecular Weight, and Formula Weight	83
3.6 Determination of the Formula of a Compound	87
<b>CHAPTER 4 CHEMICAL REACTIONS: AN INTRODUCTION</b>	<b>103</b>
4.1 Chemical Equations	103
4.2 Balancing Chemical Equations	105
4.3 Some Common Types of Chemical Reactions	108
SOMETHING MORE ABOUT Titanium Dioxide: A White Pigment	113
4.4 Weight Relations in Chemical Reactions: Stoichiometry	113
4.5 Reactions Where One Reagent Is Present in Limited Supply	117
4.6 Percent Yield	121
4.7 Chemical Equations and Chemical Analysis	122
<b>CHAPTER 5 REACTIONS IN AQUEOUS SOLUTION</b>	<b>137</b>
5.1 Properties of Aqueous Solutions: An Introduction	138
5.2 Balancing Equations for Reactions in Aqueous Solution: Net Ionic Equations	145

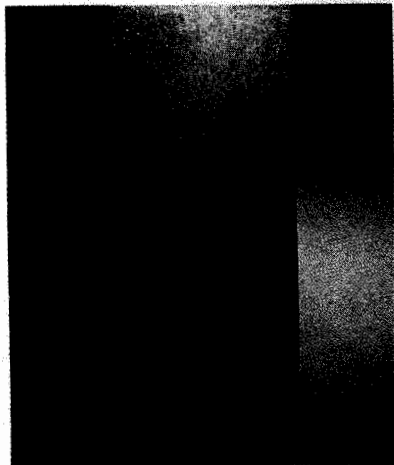

5.3	Some Types of Reactions in Aqueous Solution: Exchange Reactions	148
	SOMETHING MORE ABOUT Lead Iodide Crystals Grown in Space—A Student-Designed Experiment	153
5.4	Stoichiometry of Reactions in Solution	154
5.5	Oxidation–Reduction Reactions	168
	SOMETHING MORE ABOUT Sunglasses, Photochromic Glass, and Oxidation–Reduction	174
	SOMETHING MORE ABOUT Cisplatin, A Cancer Chemotherapy Drug	185
<b>CHAPTER 6 THERMOCHEMISTRY</b>		<b>197</b>
6.1	Energy and Its Forms	197
6.2	Units of Energy	200
6.3	Heat Capacity and Specific Heat	201
6.4	Energy Changes in Chemical Processes: Enthalpy	206
6.5	Hess's Law	212
6.6	State Functions	214
6.7	Standard Conditions and Standard Enthalpies of Formation	216
6.8	Measuring Heats of Reactions: Calorimetry	220
	SOMETHING MORE ABOUT Our Energy Future	224
<b>PART TWO ATOMIC AND MOLECULAR STRUCTURE</b>		<b>237</b>
<b>INTERVIEW ROALD HOFFMANN</b>		<b>238</b>
<b>CHAPTER 7 NUCLEAR CHEMISTRY</b>		<b>243</b>
7.1	The Nature of Radioactivity	243
7.2	Nuclear Reactions	247
7.3	Stability of Atomic Nuclei	251
7.4	Rates of Disintegration Reactions	256
7.5	Artificial Transmutations	264
7.6	Nuclear Fission	265
7.7	Controlled Nuclear Reactions	266
7.8	Nuclear Fusion	270
7.9	Uses of Radioactivity	270
	SOMETHING MORE ABOUT Radon	272
<b>CHAPTER 8 ATOMIC STRUCTURE</b>		<b>279</b>
8.1	Electromagnetic Radiation	279
8.2	The Quantization of Energy	284
8.3	The Photoelectric Effect and Albert Einstein	285
8.4	Atomic Line Spectra and Niels Bohr	287
8.5	The Wave Properties of the Electron	295
8.6	Schrödinger, Heisenberg, and Quantum Mechanics	296
8.7	The Wave Mechanical View of the Atom	297
	SOMETHING MORE ABOUT The History of Atomic Structure: Thomson, Rutherford, and the Nuclear Atom	303

<b>CHAPTER 9 ATOMIC ELECTRON CONFIGURATIONS AND PERIODICITY</b>	<b>317</b>
9.1 Electron Spin	318
9.2 The Pauli Exclusion Principle	321
9.3 Atom Orbital Energies and Electron Assignments	323
9.4 Atom Electron Configurations	325
9.5 Ion Orbital Energies and Electron Configurations	335
9.6 Atomic Properties and Periodic Trends	338
SOMETHING MORE ABOUT The Importance of Ionic Properties: Gems and Their Colors	348
9.7 The Energy Required to Form Common Monatomic Ions and Its Chemical Consequences	349
SOMETHING MORE ABOUT The Origin of the Elements	351
<b>CHAPTER 10 BASIC CONCEPTS OF CHEMICAL BONDING AND MOLECULAR STRUCTURE</b>	<b>361</b>
10.1 Valence Electrons	362
10.2 Chemical Bond Formation	363
10.3 Ionic Bonding	365
10.4 Covalent Bonding	368
10.5 Bond Properties	375
10.6 Molecular Shape	389
10.7 Molecular Polarity	399
<b>CHAPTER 11 FURTHER CONCEPTS OF CHEMICAL BONDING: ORBITAL HYBRIDIZATION, MOLECULAR ORBITALS, AND METALLIC BONDING</b>	<b>413</b>
11.1 Valence Bond Theory	414
11.2 Molecular Orbital Theory	430
11.3 Metals and Semiconductors	438
SOMETHING MORE ABOUT Semiconductors	440
<b>PART THREE STATES OF MATTER</b>	<b>449</b>
<b>INTERVIEW MARY L GOOD</b>	<b>450</b>
<b>CHAPTER 12 GASES AND THEIR BEHAVIOR</b>	<b>455</b>
12.1 The Properties of Gases	455
12.2 The Gas Laws: The Experimental Basis	458
12.3 The Ideal Gas Law	465
12.4 The Gas Laws and Chemical Reactions	471
12.5 Gas Mixtures and Partial Pressures	474
12.6 Kinetic Molecular Theory of Gases	479
12.7 Graham's Law of Diffusion and Effusion	483
12.8 Nonideal Gases	486
SOMETHING MORE ABOUT Molecular Speeds: Deep Sea Diving	488

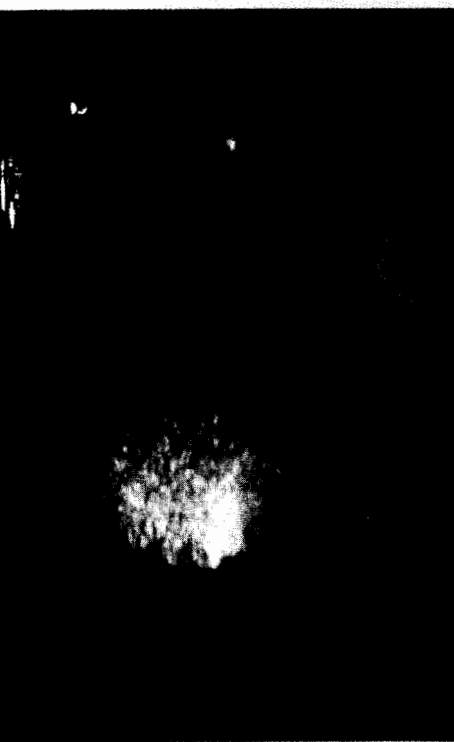

<b>CHAPTER 13</b>	<b>INTERMOLECULAR FORCES, LIQUIDS, AND SOLIDS</b>	<b>501</b>
13.1	Phases of Matter and the Kinetic Molecular Theory	501
13.2	Intermolecular Forces	504
	SOMETHING MORE ABOUT Sweeteners—The Secret Is in the Shape	514
13.3	Properties of Liquids	516
13.4	Solids	526
	SOMETHING MORE ABOUT Probing Solids with X-Rays	540
	SOMETHING MORE ABOUT Artificial Diamonds	542
13.5	The Special Properties of Liquid and Solid Water	543
13.6	Phase Changes	546
<b>CHAPTER 14</b>	<b>SOLUTIONS AND THEIR BEHAVIOR</b>	<b>559</b>
14.1	Units of Concentration	560
14.2	The Solution Process	562
14.3	Colligative Properties	572
14.4	Colloids and Colloidal Dispersions	586
	SOMETHING MORE ABOUT Beer and the Chemistry of Solutions	571

## **PART FOUR THE CONTROL OF CHEMICAL REACTIONS 601**

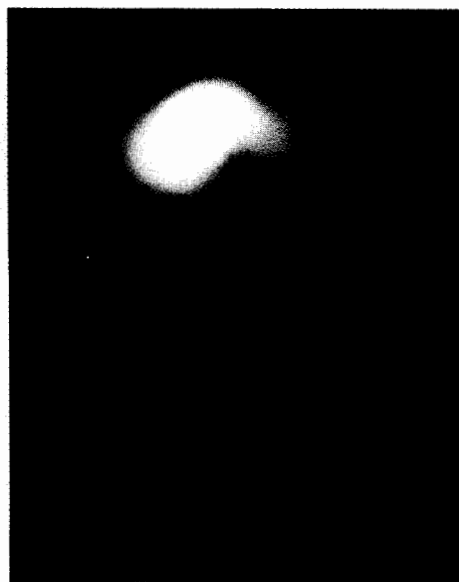

### **INTERVIEW GREGORY C. FARRINGTON 602**

<b>CHAPTER 15</b>	<b>CHEMICAL KINETICS: THE RATES AND MECHANISMS OF CHEMICAL REACTIONS</b>	<b>607</b>
15.1	Kinetics and Conditions	607
15.2	Chemical Reaction Rates	609
15.3	Rate Expressions	612
15.4	Concentration/Time Relationships	617
15.5	Rate Changes with Temperature	626
15.6	Reaction Mechanisms	635
	SOMETHING MORE ABOUT Reactions and Mechanisms in Urban Air Pollution	642
15.7	Catalysis	641
	SOMETHING MORE ABOUT Catalysis: The Production of Acetic Acid from Simple Compounds	646

<b>CHAPTER 16</b>	<b>CHEMICAL EQUILIBRIA: GENERAL CONCEPTS</b>	<b>659</b>
16.1	The Nature of the Equilibrium State	660
16.2	The Equilibrium Constant	662
16.3	The Reaction Quotient	670
16.4	Some Calculations with the Equilibrium Constant	673
16.5	External Factors Affecting Equilibria	679
16.6	Equilibrium, Kinetics, and Mechanisms	684

<b>CHAPTER 17 THE CHEMISTRY OF ACIDS AND BASES</b>	<b>699</b>
17.1 Water, the Hydronium Ion, and Auto-Ionization	700
17.2 The Brønsted Concept of Acids and Bases	701
17.3 Water and the pH Scale	709
17.4 Strong Acids and Bases	717
17.5 Weak Acids and Bases	717
17.6 The Lewis Concept of Acids and Bases	734
SOMETHING MORE ABOUT Planetary Chemistry: The Acid Clouds of Venus	741
<b>CHAPTER 18 REACTIONS BETWEEN ACIDS AND BASES</b>	<b>753</b>
18.1 Acid-Base Reactions	753
18.2 The Common Ion Effect and Buffer Solutions	760
18.3 Acid-Base Titration Curves	768
18.4 Acid-Base Indicators	773
<b>CHAPTER 19 PRECIPITATION REACTIONS</b>	<b>781</b>
19.1 Solubility of Salts	781
19.2 The Solubility Product	783
19.3 Determining $K_{sp}$ from Experimental Measurements	784
19.4 Estimating Salt Solubility from $K_{sp}$	785
19.5 Precipitation of Insoluble Salts	788
19.6 Solubility and the Common Ion Effect	793
19.7 Solubility, Ion Separations, and Qualitative Analysis	797
19.8 Simultaneous Equilibria	799
19.9 Solubility and Complex Ions	800
19.10 Acid-Base and Precipitation Equilibria of Practical Significance	801
SOMETHING MORE ABOUT Carbon Dioxide Equilibria—Of Oceans and Eggs	806
SOMETHING MORE ABOUT Silver Chemistry	809
<b>CHAPTER 20 THE SPONTANEITY OF CHEMICAL REACTIONS: ENTROPY AND FREE ENERGY</b>	<b>819</b>
20.1 Spontaneous Reactions and Speed: Thermodynamics Versus Kinetics	819
20.2 Energy and Spontaneity	821
20.3 Spontaneity, Disorder, and Entropy	822
20.4 Entropy, Elements, and Compounds	826
20.5 Entropy and the Second Law	828
20.6 Thermodynamics and the Equilibrium Constant	838
20.7 Thermodynamics and Time	842
<b>CHAPTER 21 ELECTROCHEMISTRY: THE CHEMISTRY OF OXIDATION-REDUCTION REACTIONS</b>	<b>851</b>
21.1 Chemical Change Leading to Electric Current	853
21.2 Electrochemical Cells and Potentials	857
21.3 Voltaic Cells At Nonstandard Conditions	869
21.4 Common Batteries and Storage Cells	872
21.5 Electrolysis: Chemical Change from Electrical Energy	876

21.6	Electrical Energy	881
21.7	The Commercial Production of Chemicals By Electrochemical Methods	884
21.8	Corrosion: An Example of Oxidation-Reduction Reactions	888

## **PART FIVE THE CHEMISTRY OF THE ELEMENTS AND THEIR COMPOUNDS** **901**

### **INTERVIEW JACQUELINE K. BARTON** **902**

### **CHAPTER 22 THE CHEMISTRY OF HYDROGEN AND THE s-BLOCK ELEMENTS** **907**

22.1	The Chemistry of Hydrogen	907
	SOMETHING MORE ABOUT Hydrogen Absorbed by Metals—The Cold Fusion Episode	914
22.2	Diagonal Relationships	915
22.3	The Alkali Metals: Group 1A	915
	SOMETHING MORE ABOUT The Chemistry of Fireworks	924
22.4	The Alkaline Earth Metals: Group 2A	925

### **CHAPTER 23 METALS, METALLOIDS, AND NONMETALS: PERIODIC GROUPS 3A and 4A** **941**

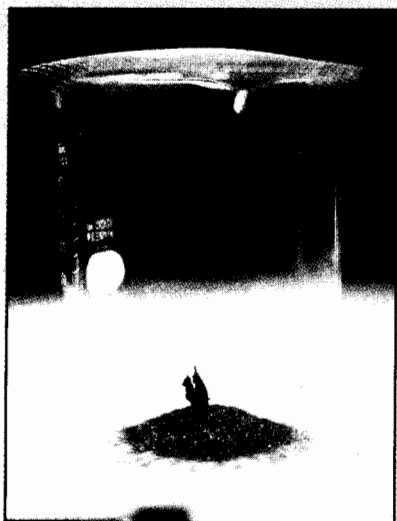

23.1	The Elements of Group 3A	941
23.2	The Elements of Group 4A	953
	SOMETHING MORE ABOUT Lead Chemistry	964
	SOMETHING MORE ABOUT Asbestos	968

### **CHAPTER 24 THE CHEMISTRY OF THE NONMETALS: PERIODIC GROUPS 5A THROUGH 7A AND THE RARE GASES** **975**

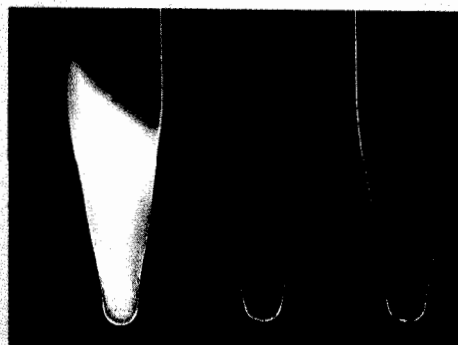

24.1	The Chemistry of Group 5A Elements	975
24.2	The Chemistry of Group 6A Elements	996
	SOMETHING MORE ABOUT Ozone in the Stratosphere	1003
24.3	The Chemistry of Group 7A Elements	1009
24.4	The Chemistry of the Rare Gases	1017

### **CHAPTER 25 THE TRANSITION ELEMENTS AND THEIR CHEMISTRY** **1025**

25.1	Physical Properties of the Transition Metals	1026
25.2	Commercial Production of Transition Metals	1030
25.3	Coordination Compounds	1037
25.4	Structures of Coordination Compounds and Isomers	1042
25.5	Bonding in Coordination Compounds	1050
25.6	The Colors of Coordination Compounds	1056
	SOMETHING MORE ABOUT Iron Chemistry	1061
	SOMETHING MORE ABOUT Nickel Chemistry	1063
	SOMETHING MORE ABOUT Superconductivity	1065

<b>CHAPTER 26 ORGANIC CHEMISTRY</b>	<b>1073</b>
26.1 Some Preliminaries: Structural Formulas and Bonding	1074
26.2 The Alkanes	1075
26.3 Functional Groups and Common Classes of Organic Compounds	1080
26.4 Alcohols, ROH	1084
26.5 Ethers, ROR	1088
SOMETHING MORE ABOUT Organic Chemistry, Gasoline, and Gallstones	1088
26.6 Unsaturated Compounds: Alkenes and Alkynes	1089
26.7 Benzene and Aromatic Compounds	1094
26.8 Alkyl Halides	1099
26.9 Carboxylic Acids and Esters	1101
SOMETHING MORE ABOUT Fat	1106
26.10 Carbonyl Compounds: Aldehydes and Ketones	1108
26.11 Amines and Amides	1112
26.12 Petroleum and Refinery Processes	1114
<b>CHAPTER 27 POLYMERS: NATURAL AND SYNTHETIC MACROMOLECULES</b>	<b>1123</b>
27.1 Amino Acids	1124
27.2 Proteins	1125
27.3 Carbohydrates	1129
27.4 Energy and Information: Nucleotides and Nucleic Acids	1134
27.5 Synthetic Polymers: Plastics, Fibers, and Elastomers	1139
<b>Appendices A–L</b>	<b>A-1</b>
A. Some Mathematical Operations	A-2
B. Common Units, Equivalences, and Conversion Factors	A-10
C. Physical Constants	A-13
D. Some Physical Constants for Water and a Few Common Substances	A-14
E. Ionization Constants for Weak Acids at 25 °C	A-16
F. Ionization Constants for Weak Bases at 25 °C	A-17
G. Solubility Product Constants for Some Inorganic Compounds at 25 °C	A-18
H. Formation Constants for Some Complex Ions in Aqueous Solution	A-20
I. Standard Reduction Potentials in Aqueous Solution at 25 °C	A-21
J. Selected Thermodynamic Values	A-24
K. Answers to Exercises in the Text	A-29
L. Answers to Selected Study Questions	A-49
M. Atomic Masses of the Elements	A-80
<b>Index/Glossary</b>	<b>I-1</b>
