

# Contents

<b>Chapter 1</b>	<b>Matter and Measurements</b>	<b>1</b>
	1.1 Measurements	2
	1.2 Uncertainties in Measurements; Significant Figures	6
	1.3 Conversion of Units	10
	1.4 Kinds of Substances	15
	1.5 Properties of Substances	16
	1.6 Separation of Mixtures	23
	Summary	27
	Key Words and Concepts	28
	Questions and Problems	28
<b>Chapter 2</b>	<b>Atoms, Molecules, and Ions</b>	<b>33</b>
	2.1 Atomic Theory	33
	2.2 Components of the Atom	35
	2.3 Molecules and Ions	40
	2.4 Masses of Atoms	43
	2.5 The Mole	47
	2.6 Moles in Solution; Molarity	50
	2.7 Atomic Masses From Experiment	52
	Summary	55
	Key Words and Concepts	56
	Questions and Problems	56
<b>Chapter 3</b>	<b>Chemical Formulas and Equations</b>	<b>61</b>
	3.1 Types of Formulas	61
	3.2 Percent Composition from Formula	62
	3.3 Formulas from Experiment	63
	3.4 Formulas of Ionic Compounds	70
	3.5 Names of Compounds	72

	3.6 Writing and Balancing Chemical Equations	75
	3.7 Mass Relations in Reactions	78
	3.8 Limiting Reactant and Theoretical Yield	80
	Summary	83
	Key Words and Concepts	84
	Questions and Problems	84
<b>Chapter 4</b>	<b>Sources of the Elements</b>	<b>90</b>
	4.1 Nonmetals from the Air	91
	4.2 Nonmetals from the Earth	93
	4.3 Metals	100
	Summary	114
	Key Words and Concepts	114
	Questions and Problems	114
<b>Chapter 5</b>	<b>Thermochemistry</b>	<b>120</b>
	5.1 Exothermic and Endothermic Reactions; Enthalpy Changes	121
	5.2 Thermochemical Equations	123
	5.3 Heats of Formation	129
	5.4 Measurement of Heat Flow; Calorimetry	135
	5.5 Enthalpy, Energy, and the First Law of Thermodynamics	139
	5.6 Sources of Energy	143
	Summary	149
	Key Words and Concepts	150
	Questions and Problems	150
<b>Chapter 6</b>	<b>Physical Behavior of Gases</b>	<b>156</b>
	6.1 Measurements on Gases	157
	6.2 The Ideal Gas Law	160
	6.3 Volumes of Gases Involved in Reactions	167
	6.4 Mixtures of Gases; Dalton's Law	171
	6.5 Real Gases	173
	6.6 Kinetic Theory of Gases	176
	6.7 Historical Perspective on the Gas Laws	182
	Summary	185
	Key Words and Concepts	186
	Questions and Problems	186
<b>Chapter 7</b>	<b>The Electronic Structure of Atoms</b>	<b>192</b>
	7.1 The Quantum Theory	192
	7.2 The Atomic Spectrum of Hydrogen and the Bohr Model	197
	7.3 The Quantum Mechanical Atom	201
	7.4 Quantum Numbers, Energy Levels, and Orbitals	
	7.5 The Electron Arrangements in Atoms	210
	Summary	219
	Key Words and Concepts	219
	Questions and Problems	220

<b>Chapter 8</b>	<b>The Periodic Table and the Properties of Metals</b>	<b>224</b>
	8.1 Development of the Periodic Table	225
	8.2 Electron Arrangements and the Periodic Table	228
	8.3 Some Trends in the Periodic Table	231
	8.4 Metals and the Periodic Table	237
	8.5 The Alkali and Alkaline Earth Metals	239
	8.6 Transition Metals	250
	Summary	252
	Key Words and Concepts	253
	Questions and Problems	253
<b>Chapter 9</b>	<b>Chemical Bonding</b>	<b>258</b>
	9.1 Ionic Bonding	259
	9.2 Nature of the Covalent Bond	265
	9.3 Lewis Structures; The Octet Rule	267
	9.4 Covalent Bond Properties	276
	Summary	283
	Key Words and Concepts	284
	Questions and Problems	284
<b>Chapter 10</b>	<b>Molecular Structure</b>	<b>288</b>
	10.1 Molecular Geometry	289
	10.2 Polarity of Molecules	297
	10.3 Atomic Orbitals; Hybridization	299
	10.4 Expanded Octets	306
	10.5 Molecular Orbitals	310
	Summary	315
	Key Words and Concepts	316
	Questions and Problems	316
<b>Chapter 11</b>	<b>Liquids and Solids</b>	<b>321</b>
	11.1 Liquid-Vapor Equilibrium	322
	11.2 Phase Diagrams	329
	11.3 Structural Types of Solids	332
	11.4 Intermolecular Forces	338
	11.5 Crystal Structures; Unit Cells	344
	Summary	347
	Key Words and Concepts	348
	Questions and Problems	348
<b>Chapter 12</b>	<b>Solutions</b>	<b>354</b>
	12.1 Solution Terminology	354
	12.2 Concentration Units	358
	12.3 Principles of Solubility	365
	12.4 Colligative Properties of Solutions	368
	Summary	379
	Key Words and Concepts	380
	Questions and Problems	380

<b>Chapter 13</b>	<b>Structures of the Nonmetals and their Binary Compounds</b>	<b>386</b>
	13.1 The Nonmetallic Elements	387
	13.2 Nonmetal Hydrides	395
	13.3 Nonmetal Oxides	400
	13.4 Nonmetal Halides	405
	13.5 Hydrocarbons	408
	Summary	415
	Key Words and Concepts	416
	Questions and Problems	416
<b>Chapter 14</b>	<b>Spontaneity of Reaction; <math>\Delta H</math>, <math>\Delta S</math>, and <math>\Delta G</math></b>	<b>421</b>
	14.1 The Enthalpy Change, $\Delta H$	422
	14.2 The Entropy Change, $\Delta S$	424
	14.3 The Free Energy Change, $\Delta G$	429
	14.4 The Second Law of Thermodynamics	437
	14.5 Historical Perspective: J. Willard Gibbs (1839–1903)	441
	Summary	442
	Key Words and Concepts	443
	Questions and Problems	443
<b>Chapter 15</b>	<b>Chemical Equilibrium in the Gas Phase</b>	<b>448</b>
	15.1 The $N_2O_4$ - $NO_2$ Equilibrium System	449
	15.2 General Expression for $K_c$	452
	15.3 Applications of $K_c$	456
	15.4 Effect of Changes in Conditions upon an Equilibrium System	462
	15.5 $K_c$ versus $K_p$	468
	15.6 Relation Between $\Delta G^0$ and the Equilibrium Constant	470
	Summary	472
	Key Words and Concepts	473
	Questions and Problems	473
<b>Chapter 16</b>	<b>Rate of Reaction</b>	<b>480</b>
	16.1 Meaning of Reaction Rate	481
	16.2 Reaction Rate and Concentration	483
	16.3 Reactant Concentration and Time	488
	16.4 Activation Energy	493
	16.5 Catalysis	495
	16.6 Reaction Rate and Temperature	498
	16.7 Reaction Mechanisms	502
	Summary	506
	Key Words and Concepts	507
	Questions and Problems	507
<b>Chapter 17</b>	<b>The Atmosphere</b>	<b>515</b>
	17.1 Industrial Chemicals from Atmospheric Gases; $NH_3$ , $HNO_3$ , and $H_2SO_4$	516

17.2	Water Vapor and Carbon Dioxide; Weather and Climate	522
17.3	The Upper Atmosphere	525
17.4	Air Pollution	529
17.5	Two Historical Perspectives	539
	Summary	540
	Key Words and Concepts	540
	Questions and Problems	541

## **Chapter 18    Precipitation Reactions    547**

18.1	Solubilities of Ionic Solids	547
18.2	Precipitation Reactions	548
18.3	Solubility Equilibria	554
18.4	Water Softening	564
	Summary	566
	Key Words and Concepts	567
	Questions and Problems	567

## **Chapter 19    Acids and Bases    573**

19.1	Water Dissociation; Acidic, Neutral, and Basic Solutions	574
19.2	pH	576
19.3	Strong and Weak Acids	579
19.4	Strong and Weak Bases	584
19.5	Acid-Base Properties of Salt Solutions	586
19.6	Acid-Base Reactions	589
19.7	Acid-Base Titrations	592
19.8	General Models of Acids, Bases, and Acid-Base Reactions	598
19.9	Historical Perspective	602
	Summary	603
	Key Words and Concepts	604
	Questions and Problems	604

## **Chapter 20    Acid-Base Equilibria    609**

20.1	The Equilibrium Constant for Dissociation of a Weak Acid, $K_a$	609
20.2	Determination of $[H^+]$ in Solutions of Weak Acids	613
20.3	Determination of $[H^+]$ in Buffer Solutions	616
20.4	The Equilibrium Constant for the Reaction of a Weak Base with Water, $K_b$	621
20.5	Relations Between Equilibrium Constants	624
	Summary	629
	Key Words and Concepts	629
	Questions and Problems	629

## **Chapter 21    Complex Ions; Coordination Compounds    634**

21.1	Compositions of Complex Ions and Coordination Compounds	635
21.2	Geometry of Complex Ions	640

	21.3	Electronic Structures of Complex Ions	643
	21.4	Complex Ions in Water; Rate and Equilibrium Considerations	652
	21.5	Uses of Coordination Compounds	654
	21.6	Historical Perspective	657
		Summary	658
		Key Words and Concepts	659
		Questions and Problems	659
<b>Chapter 22</b>		<b>Qualitative Analysis</b>	<b>664</b>
	22.1	Analysis of Cations: An Overview	665
	22.2	Analysis for Group 1	668
	22.3	Reactions in Qualitative Analysis	670
	22.4	Solubility Equilibria in Qualitative Analysis	677
		Summary	681
		Key Words and Concepts	682
		Questions and Problems	682
<b>Chapter 23</b>		<b>Oxidation and Reduction; Electrochemical Cells</b>	<b>687</b>
	23.1	Oxidation Number	688
	23.2	Balancing Redox Equations	691
	23.3	Electrolytic Cells	698
	23.4	Voltaic Cells	705
	23.5	Historical Perspective	711
		Summary	713
		Key Words and Concepts	713
		Questions and Problems	714
<b>Chapter 24</b>		<b>Oxidation and Reduction; Cell Voltages</b>	<b>719</b>
	24.1	Standard Voltages	719
	24.2	Effect of Concentration Upon Voltage	727
	24.3	Relations Between $E_{\text{tot}}^0$ , $\Delta G^0$ , and $K$	732
	24.4	Corrosion of Metals	735
		Summary	740
		Key Words and Concepts	741
		Questions and Problems	741
<b>Chapter 25</b>		<b>Chemistry of the Transition Metals</b>	<b>746</b>
	25.1	Reactions Involving Transition Metals	746
	25.2	Cations of the Transition Metals	753
	25.3	Oxyanions of the Transition Metals	761
		Summary	764
		Key Words and Concepts	765
		Questions and Problems	765
<b>Chapter 26</b>		<b>Chemistry of the Nonmetals</b>	<b>770</b>
	26.1	Oxygen and Fluorine	771
	26.2	Oxyacids and Oxyanions of the Nonmetals	775
	26.3	Chlorine (Bromine, Iodine)	779

26.4	Nitrogen	784
26.5	Sulfur	788
26.6	Phosphorus	792
	Summary	794
	Key Words and Concepts	794
	Questions and Problems	795

## **Chapter 27 Nuclear Reactions 799**

27.1	Radioactivity	800
27.2	Rate of Radioactive Decay	808
27.3	Mass-Energy Relations	811
27.4	Nuclear Fission	814
27.5	Nuclear Fusion	819
	Summary	822
	Key Words and Concepts	822
	Questions and Problems	822

## **Chapter 28 Organic Molecules, Small and Large 828**

28.1	Functional Groups in Organic Molecules Containing Cl, O, and N Atoms	829
28.2	Isomerism in Organic Compounds	836
28.3	Synthetic Polymers	841
28.4	Natural Polymers	848
	Summary	856
	Key Words and Concepts	856
	Questions and Problems	857

## **Appendix 1 Constants, Reference Data, SI Units A.1**

## **Appendix 2 Properties of the Elements A.10**

## **Appendix 3 Nomenclature A.13**

## **Appendix 4 Review of Mathematics A.18**

## **Appendix 5 Answers to Problems A.25**

## **Glossary G.1**

## **Index I.1**
