

Contents

Preface v

INTRODUCTIONS

- Guidelines for Laboratory Safety 1
- Laboratory Equipment and Techniques 3
- Review of Mathematical Skills 11
- Fundamentals of Measurement and Data Evaluation 17

EXPERIMENTS

- 1 Thermometer: Construction, Calibration, and Usage 23
- 2 Scientific Observations 37
- ✓3 Determination of Density by Various Methods 53
- 4 Determination of Avogadro's Number 67
- 5 Determination of the Empirical Formula of a Synthesized Compound 77
- 6 Atomic Spectroscopy: The Spectrum of Hydrogen 87
- 7 Molecular Bonding and Structure of Covalent Compounds 99
- 8 Crystal Models of Metals and Ionic Compounds 115
- 9 Solution Conductivity: Covalent and Ionic Solutes 133
- 10 Gas Laws: Molar Mass of a Volatile Liquid 145
- 11 Gas Laws: Mass-Volume Relationships 157
- 12 Chemical Reactions: Macroscopic Observations 169
- 13 Chemical Reactions: Activity Series 183
- 14 Chemical Reactions: Synthesis of a Compound Using a Limiting Reactant 193
- 15 Calorimetry: Heat Capacity of a Solid 203
- 16 Calorimetry: Heat of Reaction 215
- 17 Calorimetry: Heat of Vaporization 227
- 18 Salt Formation and Solubilities 237
- 19 Solubility of Ionic Compounds: Determination of K_{sp} 249
- 20 Separation Techniques: Chromatography 261
- 21 Colloidal Dispersions 275
- 22 Molar Mass Determination by Freezing-Point Depression 285
- 23 Redox Titration: Volumetric Determination of Iron 299
- 24 Chemical Kinetics: Effects of Concentration and Temperature 311
- 25 Chemical Kinetics: An Iodine Clock Reaction 325
- 26 Chemical Kinetics: Catalytic Decomposition of H_2O_2 337
- ✓27 Chemical Equilibrium 349
- 28 Spectrophotometric Determination of a Solubility Product 363
- 29 Acid-Base Titration: Neutralization of a Weak Acid with a Strong Base 375

- 30 Acid–Base Indicators 391
- 31 Spectrophotometry: Determination of K_a for a Weak Acid 403
- 32 Hydrolysis of Salts: Buffer Systems 417
- 33 Electrochemistry: Galvanic Cells 429
- 34 Electrochemistry: Molar Mass of Cu by Electrodeposition 443
- 35 Chemical Kinetics: Enzymatic Catalysis 457
- 36 Inorganic Chemistry of Carbon 473
- 37 Introduction to Metallurgy 487
- 38 Macromolecules: Natural and Synthetic Polymers 499
- 39 Surface-Active Agents: Soaps and Detergents 515
- 40 Coordination Complexes: Synthesis and Properties of *Cis*- and *Trans*-[Co(en)₂Cl₂]Cl₂ 529
- 41 Coordination Complexes: Spectrophotometric Determination of an Empirical Formula 543
- 42 Qualitative Analysis: Anions 555
- 43 Qualitative Analysis: Cations 571
- 44 Qualitative Analysis: Identification of a Salt 593

APPENDIXES

- 1 Density of Water from 0°C to 40°C 603
- 2 Vapor Pressure of Water 605
- 3 Common Laboratory Solutions 607
- 4 Instructions for Instruments 609
- 5 Reading the Barometer 613
- 6 Acid–Base Indicators 615
- 7 Electromagnetic Spectrum 617
- 8 Balancing Oxidation–Reduction Reactions 619
