contents

chapter			
	1	Some Fundamental Concepts	1
	2	Symbols, Formulas, and Equations	15
	3	Structure of the Atom and the Periodic Law	29
	4	Chemical Bonding, Part 1—General Concepts	57
	5	Chemical Bonding, Part 2—Molecular Orbitals	73
	6	Oxygen and Ozone	91
	7	Hydrogen	102
	8	The Gaseous State and the Kinetic-Molecular Theory	113
	9	Gram-Molecular Volume of Gases and Molecular, Atomic, and Equivalent Weights	125
	10	The Liquid and Solid States	138
	11	Water and Hydrogen Peroxide	152
	12	Solutions	171
	13	Solutions of Electrolytes	195
	14	Colloid Chemistry	205
	15	Oxidation-Reduction Reactions	214
	16	The Relationship of the Periodic Classification to the Properties of the Elements	224
	17	Chemical Equilibrium	235
	18	The Halogens and Their Compounds	261
	19	Electrochemistry	289
	20	Acids, Bases, and Salts	315
	21	The Sulfur Family	329
	22	The Atmosphere and the Noble Gases	349
	23	Nitrogen and Its Compounds	358
	24	Phosphorus and Its Compounds	379
	25	Carbon and Its Compounds	390
	26	Biochemistry	420
	27	Boron and Silicon	443
	28	Nuclear Chemistry	460
	29	Ionic Equilibria Involving Weak Electrolytes	481
	30	The Solubility Product Principle	504
	31	Hydrolysis	519
	32	The Metallic Elements	529
	33	Coordination Compounds	542
	34	The Alkali Metals—Group IA	560
	35	The Alkaline Earth Metals—Group IIA	573
	36	The Coinage Metals—Group IB	585

37	The Metals of Group IIB	**598**
38	The Metals of Group III	**607**
39	The Metals of Group IV	**617**
40	The Metals of Group V	**627**
41	The Metals of Groups VIB and VIIB	**636**
42	The Metals of Group VIII	**644**

appendix

A	Chemical Arithmetic	**661**
	A.1 Exponential Arithmetic	**661**
	A.2 Significant Figures	**662**
	A.3 The Use of Logarithms and Exponential Numbers	**663**
	A.4 The Solution of Quadratic Equations	**664**
B	Four-Place Table of Logarithms	**666**
C	Table of Conversion Factors	**668**
D	Solubility Product Constants	**668**
E	Dissociation Constants for Complex Ions	**670**
F	Ionization Constants of Weak Acids	**670**
G	Ionization Constants of Weak Bases	**671**
H	Electromotive Series	**671**
I	Heats of Formation and Gibbs Free Energies of Formation	**672**
