1

INTRODUCTION TO CHEMISTRY

1.1	Chemistry as a Natural Science	1
1.2	Chemistry as an Intellectual Discipline	3
1.3	Chemistry as a Technology	4
1.4	Chemistry in World Problems	5
1.5	Chemistry in Recent Years	6
1.6	Scientific Methods in Chemistry	7

2

MEASUREMENTS AND CONCEPTS IN CHEMISTRY

2.1	Matter, Materials, and Substances	11
2.2	Physical and Chemical Changes	14
2.3	The Separation of Mixtures	15
2.4	Identification of Substances	18
2.5	The Metric System (SI)	18
2.6	Mass, Volume, and Density	21
2.7	Matter and Energy	23
2.8	The Electromagnetic Spectrum	27
2.9	The Electrical Nature of Matter	30

3

CHEMICAL LANGUAGE AND WEIGHT RELATIONSHIPS

3.1	The Chemical Revolution	33
3.2	Dalton's Atomic Theory	34
3.3	Chemical Elements and Atomic Weights	35
3.4	The Chemical Formula	39
3.5	Formula Weight, Molecular Weight, and the Mole Concept	40
3.6	Derivation of Empirical Formulas	41
3.7	The Chemical Equation	43
3.8	Weight Relations in Chemical Equations	45
3.9	Industrial Stoichiometry	47

4

ATOMS AND QUANTA

4.1	The Electron in Chemistry	53
4.2	The Proton and the Neutron	55
4.3	The Mass Spectrograph	57
4.4	Radioactivity and Subatomic Particles	59
4.5	Rutherford's Nuclear Atom	59
4.6	The Atomic Number	60
4.7	Dawn of Wave Mechanics and the Quantum Concept	61

5

ATOMIC STRUCTURE

5.1	Atomic Spectra	65
5.2	The Bohr Model of the Atom	67
5.3	The Wave-Mechanical Model of the Atom	70
5.4	Multielectron Atoms	78
5.5	Orbital Symbolism	84
5.6	Magnetic Properties of Atoms	84

6

PERIODIC PROPERTIES

6.1	Discovery of the Periodic Law	87
6.2	Modern Periodic Tables	89
6.3	Electron Dot Symbols	92
6.4	Atomic Sizes	93
6.5	Ionization Energy and Electron Affinity	98
6.6	Electronegativity	101
6.7	Usefulness of the Periodic Concept	104

7

CHEMICAL BONDING

7.1	The Nature of Chemical Bonds	107
7.2	Ionic Bonding	109
7.3	Theory of Covalent Bonding	111
7.4	Electronic Structure of Covalent Molecules	116
7.5	Multiple Bonds	117
7.6	Donor-Acceptor Covalent Bonds	119
7.7	Multiatomic Ions	120
7.8	Resonance	120
7.9	Bond Polarity	123

8

IONS AND MOLECULES

8.1	Physical Properties of Ionic and Molecular Aggregates	127
8.2	Properties of Ions	130
8.3	Structure of Molecules	132
8.4	Bonding Orbitals	137
8.5	Molecular Polarities	140
8.6	Ion-Molecule and Molecule-Molecule Interactions	141

9

GASES

9.1	The Kinetic Theory of Gas Structure	149
9.2	Pressure and Volume Relationships of Gases	152
9.3	Temperature Effects on Gases	154
9.4	The Ideal Gas	156
9.5	Real Gases	161
9.6	Partial Pressures of Gases	165
9.7	Gay-Lussac's Law and Atomic Theory	166
9.8	Calculations Involving Gases	167

10

SOLIDS

10.1	Properties of the Solid State	171
10.2	Structural Concepts in Solids	172
10.3	Crystal Systems	174
10.4	X-ray Diffraction Analysis	175
10.5	Types of Crystalline Solids	177
10.6	Amorphous Solids	181
10.7	Lattice Energy	182
10.8	Defect Solids	184

11

LIQUIDS

11.1	The Liquid State	189
11.2	Vaporization of a Liquid	193
11.3	Changes of State	195
11.4	Phase Rule	199
11.5	Equilibria Between States	200

12

SOLUTIONS

12.1	Nature of Solutions	203
12.2	Concentration of Solutions	204
12.3	Solubilization Processes in Liquid Solutions	209
12.4	Equilibria Between Solutions and Gaseous Solutes	212
12.5	Liquid-Liquid Solutions	214
12.6	Liquid-Solid Solutions	216
12.7	Colligative Properties of Solutions	217
12.8	Colligative Properties of Ionic Solutions	221
12.9	Distribution Between Two Phases	222

13

CHEMICAL KINETICS AND EQUILIBRIUM

13.1	Characteristics of Chemical Reactions	228
13.2	Factors Affecting the Reaction Rate	229
13.3	Kinetics of Chemical Reactions	230
13.4	Reaction Order	233
13.5	Activation Energy and Catalysts	238
13.6	Reaction Mechanism	242
13.7	Reversibility and Equilibrium in Chemical Reactions	244
13.8	Heterogeneous Equilibria	246
13.9	LeChatelier's Principle and Chemical Equilibrium	247

14

FUNDAMENTAL CHEMICAL REACTIONS

14.1	Acid-Base Concepts	253
14.2	Neutralization	257
14.3	Oxides and Amphoterism	258

14.4	Salts	260
14.5	Solid Hydrates	261
14.6	Oxidation-Reduction Reactions	263

15

IONIC EQUILIBRIUM

15.1	Solutions of Ions	271
15.2	Weak Acids and Weak Bases	272
15.3	Ionization of Water	276
15.4	pH and pOH	277
15.5	Indicators	278
15.6	Common-Ion Effect	280
15.7	Hydrolysis and Neutralization	281
15.8	Solubility of Slightly Soluble Salts	284
15.9	Factors that Lead to Analytically Complete Reactions	286

16

ELECTROCHEMISTRY

16.1	Oxidation and Reduction	291
16.2	Electrical Terms	292
16.3	Electrolysis	294
16.4	Faraday's Law	296
16.5	Galvanic Cells	297
16.6	Oxidation-Reduction Potentials	302
16.7	Applications of Electrochemical Processes	304
16.8	Corrosion	307

17

THE DRIVING FORCE IN CHEMICAL REACTIONS

17.1	Systems, States, and State Functions	312
17.2	Forms of Energy and Their Equivalence	312

17.3	Conservation of Energy	314
17.4	Energy Pathways	316
17.5	Thermochemistry	317
17.6	Enthalpy of Formation	319
17.7	Bond Energies	321
17.8	The Driving Force in Chemical Reactions	323
17.9	Thermodynamics in Chemical Changes	326

18

MONATOMIC ANIONS

18.1	Formation of Monatomic Anions	333
18.2	Structural Properties of Monatomic Anions	335
18.3	Monatomic Anions in Aqueous Solution	337
18.4	Strength of Acids Formed by Monatomic Anions	339
18.5	The Cyanide Ion	341
18.6	Preparation of Monatomic Anions	341
18.7	Preparation of Acids of Monatomic Anions	345
18.8	Oxidation of Monatomic Anions	348

19

MONATOMIC CATIONS

19.1	Monatomic Cations and the Periodic Table	355
19.2	Properties of Monatomic Cations	357
19.3	Behavior of Monatomic Cations in Aqueous Solution	359
19.4	Preparation of Monatomic Cations	362
19.5	Reduction of Monatomic Cations	367

20

OXYANIONS

20.1	Formation of Oxyanions	369
20.2	Oxidation States of the Central Atom and Nomenclature of Oxyanions	371

20.3	Oxyanions of the Transition Metals	374
20.4	Strength of Oxyacids	376
20.5	Behavior of Oxyanions in Aqueous Solution	379
20.6	Oxyanions as Oxidizing Agents	382
20.7	Preparation of Oxyanions	386

21

POLYMERIC IONS

21.1	Bonding in Polymers	389
21.2	Silicate Polymers	392
21.3	Phosphate Polymers	395
21.4	Other Anionic Polymers	396
21.5	Cationic Polymers	396
21.6	Sulfur Polymers	397
21.7	Other Polymers	398

22

METALS AND NONMETALS

22.1	The Structure of Metals	401
22.2	Alloys	404
22.3	Phase Diagrams for Alloys	407
22.4	Interstitial Compounds	408
22.5	Elemental Nonmetals	409

23

COORDINATION COMPLEXES

23.1	The Coordination Complex	415
23.2	Ligand Groups	417
23.3	Coordination Number and Geometry	418
23.4	Stereoisomerism in Coordination Complexes	420
23.5	Nomenclature of Coordination Compounds	421

23.6	Stability of Complexes	422
23.7	The Nature of Bonding in Coordination Complexes	425
23.8	Applications	430

24

NUCLEAR CHEMISTRY

24.1	The Elementary Particles	437
24.2	Radioactivity	439
24.3	Nuclear Stability	441
24.4	Transmutation	444
24.5	Measurement of Radioactivity	445
24.6	Applications of Radioactivity	447
24.7	Nuclear Energy	449
24.8	Nuclear Power	451

25

GEOCHEMISTRY AND METALLURGY

25.1	Origin of the Elements	455
25.2	Composition of the Earth	457
25.3	Chemical Processes in the Lithosphere	459
25.4	Metallurgy: The Winning of Elements from Their Ores	462

26

ORGANIC CHEMISTRY I

26.1	Definition of Organic Chemistry	471
26.2	The Carbon Atom	471
26.3	Classes of Organic Compounds	473
26.4	Aliphatic Hydrocarbons	474
26.5	Isomers and Nomenclature	475
26.6	Aromatic Hydrocarbons	476

26.7	Functional Derivatives	479
26.8	Types of Organic Reactions	480

27

ORGANIC CHEMISTRY II

27.1	Mechanisms of Organic Reactions	485
27.2	Resonance	490
27.3	The Hydrogen Bond in Organic Chemistry	492
27.4	Polymers	492

28

BIOCHEMISTRY

28.1	Chemistry in Living Systems	497
28.2	Carbohydrates	498
28.3	Lipids	501
28.4	Proteins	502
28.5	Nucleic Acids	506
28.6	Metabolism of Foods	509
28.7	Vitamins and Hormones	510
28.8	Photosynthesis	514
28.9	Drugs and Medicinals	515

29

COLLOIDS AND SURFACE CHEMISTRY

29.1	Colloids and Surfaces	519
29.2	The Energy at a Surface	521
29.3	Adsorption at a Surface	523
29.4	Electrical Properties of Surfaces	524
29.5	Optical and Kinetic Properties of Colloids	527
29.6	Lyophilic Colloids	528
29.7	Some Practical Aspects of Colloids	529

30

ENVIRONMENTAL CHEMISTRY

30.1	Natural and Manmade Pollution	533
30.2	Water as a Natural Resource	535
30.3	Types of Water Pollution and Their Control	536
30.4	Fresh Water from Seawater	539
30.5	The Air We Breathe	540
30.6	Types of Air Pollution	542
30.7	Pollution and Our Way of Life	545
APPENDIX I	Significant Figures	551
APPENDIX II	Greek Alphabet and Designations	552
APPENDIX III	Small and Large Numbers	552
APPENDIX IV	Logarithms	552
APPENDIX V	International System of Units (SI)	554
APPENDIX VI	Conversion Factors	555
APPENDIX VII	Vapor Pressure of Water	555
APPENDIX VIII	Oxidation-Reduction Potentials	555
APPENDIX IX	Ionization Constants in Aqueous Media, 25 °C	556
APPENDIX X	Solubility Product Constants	557
APPENDIX XI	Numerical Answers to Even-Numbered Problems	557
INDEX		561
