

# Contents

<b>Chapter 1 Scope of the Book</b>	<b>1</b>
References	4
<b>Chapter 2 Setting the Scene</b>	<b>5</b>
2.1 The State of the Planet	5
2.2 The 'Trilemma'	9
2.3 Human Population and its Growth	10
2.4 Our Attitudes to Technology and How We Come by Them	12
2.5 Science, Controversy and the Media	13
2.6 Chemistry and the Chemical Industry	15
2.7 Why We Cannot Turn the Clock Back	17
2.8 Synthetic Bad, Natural Good?	17
2.9 Decision-making and 'Wicked' Problems	23
2.10 Sustainable Development and Hyperdisciplinarity	24
2.11 The Role of the Expert	28
References	31
Bibliography	33
Webliography	33
<b>Chapter 3 Sustainability and Sustainable Development</b>	<b>35</b>
3.1 What is Sustainability? And is it Different from Sustainable Development?	35
3.2 Environmental Burden or Carrying Capacity	40
3.3 Footprints: Ecological, Carbon and Water	46
3.4 Requirements for Sustainability	48

---

Chemistry for Sustainable Technologies: A Foundation

By Neil Winterton

Bibliography	50
Webliography	51

## **Chapter 4 Science and its Importance** **52**

4.1 What is Science?	52
4.2 The Scientific Method	56
4.3 Hypotheses, Models, Theories and Laws	57
4.4 Exchange of Scientific Knowledge: Peer Review	58
4.5 Science and Authority	59
4.6 Science and Technology	59
4.7 Good Science, Bad Science and the Media	64
4.8 Care in What We Say and How We Say It	65
4.9 Ignorance, Uncertainty and Indeterminacy	66
References	68
Bibliography	69
Webliography	70

## **Chapter 5 Chemistry of the Environment** **71**

5.1 Environmental Science and Environmental Chemistry	72
5.2 Geochemistry	75
5.3 Global Geochemical Cycling of the Elements	77
5.4 The Carbon Cycle I: The Role of Carbon Dioxide	79
5.5 The Sun	87
5.6 The Greenhouse Effect	93
5.7 Global Warming Potential	97
5.8 The Carbon Cycle II: Methane and its Atmospheric Lifetime	99
5.9 The Nitrogen Cycle, Nitrous Oxide and Biomass Production	104
5.10 Human Impact on the Environment	105
5.11 Geophysiology or Earth Systems Science	105
5.12 Geoengineering	109
References	110
Bibliography	114
Webliography	114

## **Chapter 6 Waste, Pollution and the Second Law of Thermodynamics** **116**

6.1 What is Waste?	116
6.2 When Waste Becomes Pollution	118
6.3 Chemical Waste: Sheldon's E-factor	120

6.4	Approaches to Chemical Waste Minimisation	122
6.5	Waste Minimisation Hierarchy	123
6.6	Chemical Waste: Historical Trends and Changes	126
6.7	Inevitability of Waste (But Not Necessarily of Pollution)	129
6.8	Importance of Defining Boundaries	130
6.9	Life-cycle Inventory	136
6.10	The Central Importance of Thermodynamics	143
6.11	Entropy and Waste	149
6.12	Work and the Carnot Cycle	152
6.13	Real Processes: Exergy	154
6.14	Exergetic Analysis	157
6.15	Exergetic Comparison of Processes for Ethanol Production	160
	References	167
	Bibliography	169
	Webliography	169
<b>Chapter 7 Measurement</b>		<b>170</b>
7.1	Reaction Yield	171
7.2	Mass Balance	173
7.3	Conversion	174
7.4	Selectivity	175
7.5	Atom Efficiency	176
7.6	Process Chemistry	183
7.7	Balance Yield	184
7.8	Reaction Mass Efficiency	188
7.9	Other Metrics	189
	References	192
	Bibliography	193
	Webliography	193
<b>Chapter 8 Chemistry: Necessary but not Sufficient</b>		<b>194</b>
8.1	Prebiotic Chemistry (Organic, Inorganic and Physical)	195
8.2	The 50 Millionth Chemical Substance	199
8.3	CAS Registry Number 173075-49-5	199
8.4	The Significance of Small Things	200
8.5	Tamiflu	202
8.6	Chemistry in the Real World	204
8.7	Metathesis, Fullerenes and the Nobel Prize	206
8.8	Presidential Green Chemistry Challenge Awards	213
8.9	Green Chemistry: A Brief History	214
8.10	Principles of Green Chemistry	217

8.11 'Green' Reaction Media	236
References	247
Bibliography	251
Webliography	251
<b>Chapter 9 Chemicals Processing</b>	<b>253</b>
9.1 Technological Development and Experience Curves	256
9.2 Stages of Technological Development	259
9.3 Investment and Risk	260
9.4 Product Development	263
9.5 Patenting	264
9.6 Application of Process Engineering and Chemistry	265
9.7 Reaction Sequence	267
9.8 Mixing and Mass Transfer	268
9.9 Process Intensification	272
9.10 Novel Stimuli	276
9.11 Inherent Safety and Inherent Waste Minimisation	288
9.12 Process Integration and Industrial Ecology	290
References	298
Bibliography	300
Webliography	301
<b>Chapter 10 Catalysis</b>	<b>302</b>
10.1 Catalysis, Kinetics and the Catalytically Active Species	303
10.2 Catalysis in the Environment	310
10.3 Measuring Catalyst Performance	312
10.4 Catalysis and Sustainability	318
10.5 Catalysis in Industry	319
10.6 Waste Reduction and Prevention through Catalysis	330
10.7 Catalysis and Waste as Feedstocks	331
10.8 Environmental and Sustainable Catalysis	334
10.9 Catalysis and Renewables	344
References	348
Bibliography	351
Webliography	351
<b>Chapter 11 Chemicals from Biomass</b>	<b>353</b>
11.1 Renewable Resources	354
11.2 Biomass, Renewability and Sustainability	355
11.3 Chemistry and Biomass: An Overview	359

11.4	Chemicals from Biomass: The Nature of Biomass and its Derivatives	361
11.5	Chemicals from Biomass: Sources of Biomass	366
11.6	Chemicals from Biomass: Biofuels, Commodities, Specialities and 'Platform' Chemicals	373
11.7	Chemicals from Biomass: Biomass Processing	390
11.8	Technological Interdependence and Integration	397
11.9	Technological Constraints	398
	References	402
	Bibliography	406
	Webliography	406
<b>Chapter 12</b>	<b>Energy Production</b>	<b>407</b>
12.1	Primary, Secondary, Renewable and Sustainable Energy	408
12.2	Conventional Sources of Energy	410
12.3	Energy from Renewables	418
12.4	Secondary Energy Sources and Energy Storage	428
	References	432
	Bibliography	434
	Webliography	435
<b>Chapter 13</b>	<b>The Chemist as Citizen</b>	<b>436</b>
13.1	Science and Ethics	437
13.2	Rhetoric and Evidence	438
13.3	Science and Public Perception	439
13.4	Scepticism and Open Mindedness	443
13.5	Logic and Fairness	444
13.6	Individual Action	445
13.7	Science, Activism and Advocacy	446
13.8	'Climategate'	446
	References	449
	Webliography	450
<b>Appendix 1</b>	<b>Finding Stuff Out</b>	<b>451</b>
<b>Appendix 2</b>	<b>Units and Abbreviations</b>	<b>458</b>
<b>Appendix 3</b>	<b>Twelve More Green Chemistry Principles</b>	<b>462</b>
<b>Subject Index</b>		<b>468</b>
