Preface	ix
List of Symbols	xi

PART I

Physical Properties and Molecular Structure

1. Molecular Weight using van der Waals' Equation	1
2. Molecular Weight using Bertholet's Equation	3
3. Density of a Liquid as a Function of Temperature	6
4. Molar Refraction	9
5. Viscosity as a Function of Temperature	11

Thermodynamics

6. Molecular Weight by Ebullioscopy (Landsberger's Method)	13
7. Molecular Weight by Ebullioscopy (Cottrell's Method)	16
8. Molecular Weight by Cryoscopy	18
9. Molecular Weight by Rast's Method	21
10. Heat of Neutralization by Calorimetry	23
11. Heat of Transition by Calorimetry	26
12. Heat of Vaporization by Calorimetry	27
13. Vapour Pressure of a Liquid as a Function of Temperature	29
14. Heat of Solution from Solubility	31
15. An Equilibrium Constant by the Distribution Method	33

Phase Equilibria

16. Distillation of a Mixture	35
17. Distillation of an Azeotropic Mixture with a Minimum Boiling Point	38
18. Distillation of an Azeotropic Mixture with a Maximum Boiling Point	41
19. Phase Diagram for a Binary System	43
20. Variation of Miscibility with Temperature	44
21. Study of the Ternary System: Benzene-Acetic Acid-Water	46
22. Molecular Weight of a Liquid by Steam Distillation	49

Light and Spectra

23. Molar Optical Rotation	51
24. Emission Spectrum of a Metallic Chloride	53
25. Verification of the Lambert-Beer Law	55

Chemical Kinetics

26. A Velocity Constant by a Titration Method	57
27. Variation of Velocity Constant with Catalyst Concentration by a Dilatometer Method	60
28. A Velocity Constant by a Gas Evolution Method	63
29. A Velocity Constant by a Conductimetric Method	66
30. The Effect of Change of Temperature on the Rate of a Reaction	68

<i>Surface Chemistry and Colloids</i>	
31. Surface Tension using a Traube Stalagmometer	72
32. Interfacial Tension (Micrometer Syringe Method)	75
33. Variation of the Surface Tension of a Liquid with Temperature	77
34. Adsorption Isotherm	79
35. Protective Action of Lyophilic Colloids	81
36. The Isoelectric Point of Albumen	83
<i>Conductance and Transference</i>	
37. Variation of Conductance with Concentration (Onsager's Equation)	84
38. Conductimetric Titration of an Acid Mixture	90
39. Solubility by a Conductimetric Method	92
40. Transport Numbers (Hittorf's Method)	94
<i>Ionic Equilibria</i>	
41. Dissociation Constant of a Weak Acid (Approximate e.m.f. method)	97
42. Absorption Curve of an Indicator as a Function of pH	101
43. Dissociation Constant of a Weak Acid (Conductimetric Method)	104
44. Hydrolysis Constant by a Conductimetric Method	107
<i>Electrode Potential and Electrode Processes</i>	
45. The Standard Electrode Potentials of Zinc and Copper	109
46. Concentration Cells	113
47. Solubility Product from e.m.f. Measurements	115
48. Potentiometric Titration—Verification of the Nernst Equation	117
49. Thermodynamics of Cells	119
50. pH Titration Curve	121

PART II

<i>Physical Properties and Molecular Structure</i>	
51. The Radius of a Molecule from Viscosity Measurements	127
52. Dipole Moment of a Polar Molecule (Bridge Method)	129
53. Additivity of Group Moments in Aromatic Compounds	133
<i>Thermodynamics</i>	
54. The Ratio of the Heat Capacities of a Gas (Clément and Desormes Method)	135
55. The Joule Thompson Coefficient	138
56. Heat of Combustion by Bomb Calorimetry	141
57. Partition Coefficient in Gas Chromatography	145
58. The Raoult Law Factor in Gas Chromatography	148
59. Activity of a Non-electrolyte by Cryoscopy	150
60. Activity of an Electrolyte by Cryoscopy	153
61. Activity Coefficient by an e.m.f. Method	158
62. Partial Molal Volumes of a Binary Solution	161
<i>Phase Equilibria</i>	
63. A Transition Temperature by a Solubility Method	164
64. The Thermal Analysis of a Hydrate by the Differential Couple Method	166
65. A Ternary Phase Diagram for a System of Two Solids and a Liquid	169

Light and Spectra

66. Emission Spectra Study of Atomic Hydrogen	173
67. The Ultra-violet Absorption Spectra of Aromatic Compounds	176
68. The Ultra-violet Absorption Spectra of Geometrical Isomers	180
69. Force Constants from Vibrational Frequencies	182
70. Infra-red Spectra of Carbonyl Compounds	184

Chemical Kinetics

71. A Velocity Constant by an Amperometric Method	186
72. A Velocity Constant by a Potentiometric Method	189
73. A Velocity Constant by a Polarimetric Method	191
74. A Velocity Constant for an Anionotropic Rearrangement (Spectrophotometric Method)	195

Surface Chemistry and Colloids

75. Gas Adsorption (McBain-Bakr Balance)	197
76. Surface Tension-Concentration Relationship for Solutions (Gibbs Equation)	200
77. Molecular Weight of a Polymer from Viscosity Measurements	202
78. The Specific Surface Area of a Powder (Rigden's Apparatus)	205
79. Electrophoresis	207

Conductance and Transference

80. Variation of Conductance with Concentration (Robinson-Stokes Equation)	210
81. Transport Numbers (Moving Boundary Method)	212
82. Transport Numbers (e.m.f. Method)	215

Ionic Equilibria

83. Dissociation Constant of an Acid (Accurate e.m.f. Method)	217
84. Dissociation Constant of an Acid (Spectrophotometric Method)	222
85. Composition of a Complex Ion in Solution	225

Electrode Potential and Electrode Processes

86. The Quinhydrone Reference Electrode	227
87. Study of Potentiometric and Indicator End Points	229
88. Potentiometric Titration—Solubility of Silver Halides	231
89. The Polarographic Method of Analysis	233
90. The Polarographic Method of Analysis—Wave Separation	236
91. The Polarographic Study of Quinhydrone	238
92. Titration by the Dead Stop End Point Technique	241

Radiochemistry

Safety Precautions	
93. Separation of Radioelements by Ion Exchange	245
94. Distribution Constant by a Radioactive Tracer Technique	248

PART III

Investigations

95. A Limitation of the Parachor Concept	255
96. Chromatographic Study of the Effects of Substitution on Aceto- phenone	257

97. Steric Effects and Resonance	261
98. Resonance Energies of Aromatic Compounds by Bomb Calorimetry	263
99. The Variation of Rate Constant with Catalyst Concentration by a Polarimetric Method	268
100. Thermodynamic Functions for Acid-Base Equilibria	270
101. Differential Potentiometric Titrations	272
102. The Polarograph: a Study of the Variables when Interpreting Polarograms	275
APPENDIX I List of Textbooks	277
APPENDIX II List of Instruments and Manufacturers	277
LOGARITHMS OF NUMBERS	281
ANTILOGARITHMS	283
INDEX	285
