

## PLENARY LECTURES

Magnetism, bonding and structure of coordination compounds— R. S. NYHOLM (U.K.)	1
Structures and absolute configurations of cobalt(III) complexes— YOSHIIKO SAITO (Japan)	21
Substitution reactions of metal complexes—FRED BASOLO (U.S.A.)	37
Some recent results on hydrolytic equilibria—LARS GUNNAR SILLÉN (Sweden)	55
The importance of coordination in electrophilic substitution reactions of organometallic compounds—O. A. REUTOV (U.S.S.R.)	79
Five-coordination in 3d metal complexes—LUIGI SACCONI (Italy)	95
Catalytic effects of metal chelate compounds—ARTHUR MARTELL (U.S.A.)	129
*Über Nickelorganische Verbindungen—G. WILKE (Germany)	179

\*This lecture presented by Professor G. WILKE at the 3rd International Symposium on Organometallic Chemistry, Munich 1967 has been reprinted here since its scientific content is very similar to that entitled "Transitional Metal Complexes in Organic Chemistry" given by Prof. WILKE at the Xth International Conference on Coordination Chemistry.
