

## CONTENTS

Introduction . . . . .	1
<i>Charles B. Colburn</i> , Redstone Arsenal Research Division, Rohm & Haas Co., Huntsville, Ala.	
1. Review of the <b>Properties</b> and Reactions of Some Inorganic Free Radicals . . . . .	3
F. O. Rice, Georgetown University, Washington 7, D. C.	
2. Production of Free Radicals and Their Physical Properties in the Liquid and Solid State . . . . .	10
G. <i>Wilse</i> Robinson, California Institute of <b>Technology</b> , Pasadena, Calif.	
3. Spectroscopic Studies of Some Excited Inorganic Free Radicals . . . . .	26
<i>Norman Basco</i> , The University, Sheffield 10, <b>Yorks</b> , England	
4. Mass Spectrometry of Inorganic Free Radicals . . . . .	34
S. N. <i>Foner</i> and R. L. Hudson, Applied Physics Laboratory, The <b>Johns</b> Hopkins University, Silver Spring, Md.	
5. <b>ESR</b> Studies of Inorganic Free Radicals in Photolytic Systems . . . . .	50
F. J. <i>Adrian</i> , E. L. <i>Cochran</i> , and V. A. Bowers, Applied Physics Laboratory, The <b>Johns</b> Hopkins University, Silver Spring, Md.	
6. Experimental Determination of the Electron Affinities of Inorganic Radicals . . . . .	68
F. M. Page, College of Advanced Technology, Birmingham 4, England	
7. Electron-Spin Resonance of Some Simple Oxy Radicals . . . . .	76
<i>Martyn</i> C. R. <i>Symons</i> , The University, Leicester, England	
8. The Nature of Peroxo-Bridged <b>Dicobalt</b> Complexes . . . . .	90
G. L. Goodman, H. G. <i>Hecht</i> , and J. A. Weil, Argonne <b>National</b> Laboratory, Argonne, Ill.	
9. Electron Paramagnetic Resonance Spectra of Halogen Atoms . . . . .	98
N. <i>Vanderkooi, Jr.</i> , and J. S. <i>MacKenzie</i> , General Chemical Research Laboratory, Allied Chemical Corp., Morristown, N. J.	
10. Inorganic Free Radicals in Solution and Some Aspects of Autoxidation . . . . .	102
N. <i>Uri</i> , Explosives Research and Development Establishment, Ministry of Aviation, <b>Waltham</b> Abbey, Essex, England	
11. Aqueous Chemistry of Inorganic Free Radicals. IV. <b>Stoichiometry</b> of the Reaction of Peroxydisulfate Ion with Hydrogen Peroxide and Evidence of Acidity Constant of the HO <sub>2</sub> Radical . . . . .	113
Mauk-Sang <i>Tsao</i> and W. K. <i>Wilmarth</i> , University of Southern California, Los Angeles 7, Calif.	
12. The Difluoramino Radical . . . . .	123
<i>Frederic</i> A. Johnson, Redstone Arsenal Research Division, <b>Rohm &amp; Haas</b> Co., Huntsville, Ala.	

13. **Radical Reactions of Tetrafluorohydrazine** . . . . . 128  
*Jeremiah P. Freeman*, Redstone Arsenal Research Division, Rohm & Haas Co., Huntsville, Ala.
14. **The Significance of NO, Free Radicals in the Reactions of Dinitrogen Tetroxide and Metal Nitrates** . . . . . 131  
*C. C. Addison*, The University, Nottingham, England
15. **Reactions of Nitrogen(II) Oxide** . . . . . 143  
*Russell S. Drago*, University of Illinois, Urbana, Ill.
16. **The Reactions of Alkyl-Substituted Amino Radicals** . . . . . 150  
*Brian G. Gowenlock* and *David R. Snelling*, University of Birmingham, Birmingham 15, England
17. **A New Deep Violet Compound,  $(O_2ClF_3)_n$ , Dioxygen Chlorine Trifluoride** . . . . . 159  
*A. G. Streng* and *A. V. Grosse*, Temple University, Philadelphia 44, Pa.
