

CONTENTS

CHAPTER ONE	INTRODUCTION	1
	References	
CHAPTER TWO	GRAPHICAL PRESENTATION OF MOLECULAR ORBITALS	7
	2.1 Molecular Orbital Theory	7
	2.2 Atomic Basis Sets	7
	2.3 Construction of Molecular Orbitals	12
	References	13
CHAPTER THREE	THE BONDING IN POLYATOMIC MOLECULES	5
	3.1 σ , π , and δ Bonds	15
	3.2 Orbitals of Simple Polyatomic Fragments	20
	(a) CH_2	20
	(b) CH_3	25
	3.3 Molecules from Fragments	29
	References	31
CHAPTER FOUR	VALENCE MOLECULAR ORBITALS FOR SELECTED MOLECULES	33
	4. Saturated Molecules	35
	(a) Methane	36
	(b) Ethane	36
	(c) Disilane	36
	(d) Methylsilane	36
	(e) Adamantane	37
	(f) Ti_2H_6	37

- 4.2 Electron-Rich Molecules 54
- (a) Ammonia 54
 - (b) Trimethylamine 54
 - (c) Trifluoramine 54
 - (d) Methyl Anion 54
 - (e) Hydronium Cation 54
 - (f) Phosphine 55
 - (g) Water 55
 - (h) Methanol 55
 - (i) Dimethylether 55
 - (j) Methyl Fluoride 56
 - (k) Methyl Chloride 56
 - (l) Methyl Bromide 56
 - (m) Methyl Iodide 56
 - (n) Silyl Fluoride 56
 - (o) Hydrazine (*trans* conformer) 57
 - (p) Diphosphine (perpendicular conformer) 57
 - (q) Hydrogen Peroxide 58
 - (r) Hydrogen Disulfide 58
 - (s) Ferrocene 58
- 4.3 Electron-Deficient Molecules 104
- (a) Methyl Cation 104
 - (b) Ethyl Cation (open form) 104
 - (c) *tert*-Butyl Cation 104
 - (d) Lithiomethyl Cation 104
 - (e) Borane 104
 - (f) Trimethylborane 104
 - (g) Trifluoroborane 104
 - (h) Aluminum Hydride 105
 - (i) Aluminum Trichloride 105
 - (j) Methyl Lithium 105
 - (k) Methyl Magnesium Chloride 105
 - (l) Methyl Lithium Tetramer 106
 - (m) Dimethylzinc 106
 - (n) Beryllium Tetramer 106
 - (o) Beryllium Pentamer 106
 - (p) Beryllium Heptamer 106
 - (q) Methylene 107
 - (r) Silver Chloride 107

- 4.4 Unsaturated Molecules 146
 - (a) Ethylene 146
 - (b) Propene 146
 - (c) Lithioethylene 146
 - (d) Fluoroethylene 146
 - (e) Silaethylene 146
 - (f) Dihydridomethylidenetitanium (planar conformer) 146
 - (g) Dihydridomethylidenetitanium (perpendicular conformer) 146
 - (h) Dihydridoethylidenetitanium 146
 - (i) Formaldehyde 151
 - (j) Dihydridoxtitanium 151
 - (k) Aminomethyl Cation 151
 - (l) Acetylene 151
 - (m) Propyne 151
 - (n) Carbon Monoxide 152
 - (o) Cr_2H_6 152
- 4.5 Conjugated Molecules 184
 - (a) *trans* 1,3-Butadiene 184
 - (b) Acrylonitrile 184
 - (c) Acrolein 184
 - (d) Formamide 185
 - (e) *cis* Formic Acid 185
 - (f) Cyclooctatetraene 185
 - (g) Allene 185
 - (h) Diazomethane (open form) 185
 - (i) Ketene 185
- 4.6 Strained Molecules 210
 - (a) Aziridine 210
 - (b) Oxirane 210
 - (c) Thirane 210
 - (d) Cyclobutane 210
 - (e) Cyclopropene 211
 - (f) Cyclobutene 211
 - (g) Cyclopropyne 212
 - (h) Cyclobutyne 212
 - (i) Cyclobutadiene 212
 - (j) Spiropentane 213

(k) Bicyclo[1.1.0]Butane 213

(l) Tetrahedrane 213

(m) Cubane 213

Aromatic Molecules 250

(a) Benzene 250

(b) Silabenzene 250

(c) Titanabenzene 250

(d) Pyridine 250

(e) Borazine 252

(f) Cyclopentadienyl Anion 252

(g) Thiophene 252

Molecules with Expanded Valence Shells 276

(a) Phosphorous Pentafluoride 276

(b) Sulfur Tetrafluoride 276

(c) Chlorine Trifluoride 276

(d) Sulfur Hexafluoride 277

(e) Chlorine Pentafluoride 277

(f) Sulfur Dioxide 277

(g) Dimethylsulfoxide 277

(h) Sulfur Trioxide 277

Intermolecular Complexes 306

(a) Water Dimer 306

(b) Hydrogen Fluoride Dimer 306

(c) Hydrogen Fluoride-Hydrogen Cyanide 306

(d) Borane Carbonyl 307

(e) Trifluoroborane Carbonyl 307

(f) Dihydridomethylidenetitanium-Aluminum Chloride 308

(g) Iron Pentacarbonyl 310

(h) Cyclopentadienyl Indium 310

(i) Bisbenzene Chromium 310

(j) Protonated Ethylene (bridged structure) 311

(k) Ethylene-Lithium Cation Complex (bridged structure) 311

(l) Ethylene Iron Tetracarbonyl 311

(m) Ethylene-Silver Cation Complex (bridged structure) 311

(n) Corner-Protonated Cyclopropane 311

(o) Edge-Protonated Cyclopropane 311

(p) Face-Protonated Cyclopropane 311

- (q) Face-Protonated Benzene 312
- (r) Benzene-Lithium Cation Complex (face structure) 312
- (s) Methyl Lithium Tetramer-Hydride Anion Complex 313

4.10 Reaction Transition Structures 374

- (a) Hydrogen Isocyanide \rightarrow Hydrogen Cyanide 374
- (b) Borane + Propene \rightarrow *n*-Propylborane 374
- (c) Borane + Propene \rightarrow *iso*-Propylborane 374
- (d) Methyl Fluoride + Fluoride Anion \rightarrow Methyl Fluoride + Fluoride Anion (backside attack) 374
