

CONTENTS

| | |
|--|------|
| List of Contributors..... | vii |
| Preface to Volume 1 | ix |
| Preface | ix |
| The International System of Units (SI)..... | xiii |
| | |
| CHAPTER 1: Vibrational Spectroscopy of Free Radicals— R. E. Hester | |
| 1. Introduction..... | 1 |
| 2. Stable Radicals | 4 |
| 3. Unstable Radicals | 26 |
| 4. Conclusion | 41 |
| | |
| CHAPTER 2: The Measurement of Optical Constants in the Infrared by Attenuated Total Reflection— Bryce Crawford, Jr., Thomas G. Goplen and Douglas Swanson | |
| 1. Introduction..... | 47 |
| 2. The Optical Constants | 48 |
| 3. The Experiment..... | 64 |
| 4. Some Results | 78 |
| | |
| CHAPTER 3: Infrared Emission Spectroscopy— P. V. Huong | |
| 1. Introduction..... | 85 |
| 2. Theoretical Background..... | 86 |
| 3. Optical Arrangements for the Study of Infrared Emission | 94 |
| 4. Experimental Methods and Examples..... | 97 |
| 5. Conclusion and Perspectives..... | 105 |

**CHAPTER 4: Band Shapes and Molecular Dynamics in Liquids—
J. H. R. Clarke**

| | |
|--|-----|
| 1. Introduction..... | 109 |
| 2. Theoretical Background..... | 112 |
| 3. Interpretation of Correlation Functions in Terms of Molecular Dynamics | 120 |
| 4. Models for Reorientational Molecular Motions | 140 |
| 5. Experimental Aspects and Data Analysis | 157 |
| 6. Experimental Studies of Molecular Dynamics.. .. | 162 |
| Appendix A: What is a Correlation Function? | 183 |
| Appendix B: Stochastic Processes | 186 |

**CHAPTER 5: Low Frequency Vibrations of Molecules with
Biological Interest
Gerard Vergoten, Guy Fleury and Yves Moschetto**

| | |
|--|-----|
| 1. Introduction.. .. | 195 |
| 2. Low-frequency Internal Modes: Hindered Rotations ... | 195 |
| 3. Recent Progress in the Field of Instrumentation | 205 |
| 4. Normal Alkanes as Model Molecules | 208 |
| 5. Lipids: Fatty Acids and Some Derivatives | 222 |
| 6. Steroids, Cholesterol and its Derivative | 241 |
| 7. Carbohydrates | 246 |
| 8. Compounds with Therapeutic Interest | 247 |
| 9. Amino-acids..... | 254 |
| 10. Polypeptides, Polynucleotides and Proteins | 257 |
| 11. Conclusions | 260 |

**CHAPTER 6: Raman Optical Activity
L. D. Barron**

| | |
|--|-----|
| 1. Introduction..... | 271 |
| 2. The Molecular Polarizability and Optical Activity Tensors | 275 |
| 3. The Rayleigh and Raman Circular Intensity Differentials | 290 |
| 4. The Generation of Rayleigh and Raman Optical Activity within Chiral Molecules.. .. | 299 |
| 5. Experimental..... | 320 |
