

## CONTENTS

## GENERAL DISCUSSIONS

1. Roles Played by Metastable States in Chemistry	3
2. Direct Variational Methods for Complex Resonance Energies	17
3. Complex Energy Quantization for Molecular Systems	35
4. Approximate Quantum Approaches to the Calculation of Resonances in Reactive and Nonreactive Scattering	43

## ELECTRON-MOLECULE SCATTERING AND PHOTOIONIZATION

5. Resonances in Electron-Molecule Scattering and Photoionization	65
6. Dynamics of Molecular Photoionization Processes	89
7. Molecular Photoionization Resonances: A Theoretical Chemist's Perspective	113
8. Shape Resonances in Molecular Fields	139
9. Temporary Negative Ion States in Hydrocarbons and Their Derivatives	165
10. Negative Ion States of Three- and Four-Membered Ring Hydrocarbons Studied by Electron Transmission Spectroscopy	183
11. Anion Resonance States of Organometallic Molecules	193
12. Vibrational-Librational Excitation and Shape Resonances in Electron Scattering from Condensed N <sub>2</sub> , CO, O <sub>2</sub> , and NO	211

## VAN DER WAALS COMPLEXES

13. Vibrational Predissociation of Small van der Waals Molecules	231
14. Complex-Coordinate Coupled-Channel Methods for Predissociating Resonances in van der Waals Molecules	263
15. Vibrationally Excited States of Polyatomic van der Waals Molecules: Lifetimes and Decay Mechanisms	289
16. Photodissociation of van der Waals Molecules: Do Angular Momentum Constraints Determine Decay Rates?	305

## UNIMOLECULAR DYNAMICS

17. Classical, Semiclassical, and Quantum Dynamics of Long-Lived Highly Excited Vibrational States of Triatoms	323
18. The Intramolecular Dynamics of Highly Excited Carbonyl Sulfide (OCS)	337

## BIMOLECULAR REACTIVE SYSTEMS

19. Vibrationally Bonded Molecules: The Road from Resonances to a New Type of Chemical Bond	353
20. Bimolecular Reactive Collisions: Adiabatic and Nonadiabatic Methods for Energies, Lifetimes, and Branching Probabilities	375
21. Atom-Diatom Resonances Within a Many-Body Approach to Reactive Scattering	401
22. Resonances in the Collisional Excitation of Carbon Monoxide by Fast Hydrogen Atoms	421
23. Resonant Quasi-periodic and Periodic Orbits for the Three-Dimensional Reaction of Fluorine Atoms with Hydrogen Molecules	441
24. Resonance Phenomena in Quantal Reactive Infinite-Order Sudden Calculations	457
25. Dynamic Resonances in the Reaction of Fluorine Atoms with Hydrogen Molecules	479
26. Reactive Resonances and Angular Distributions in the Rotating Linear Model	493
