

## CONTENTS

1. Surface Complexes at Oxide-Water Interfaces <i>P. W. Schindler</i>	1
2. A Review of Anion Adsorption <i>F. J. Hingston</i>	51
3. Cation Adsorption by Hydrous Metal Oxides and Clay <i>D. G. Kinniburgh</i>	91
4. Adsorption vs Precipitation <i>R. B. Corey</i>	161
5. The Surface Acidity of Hydrous Solids <i>C. P. Huang</i>	183
6. Surface Ionization and Complexation at the Colloid/Aqueous Electrolyte Interface . . . . . <i>R. O. James</i>	219
7. Adsorption Models: A Mathematical Analysis in the Framework of General Equilibrium Calculations . . . . . <i>F. M. M. Morel</i>	263
8. Adsorption of Free and Complexed Metals from Solution by Activated Carbon . . . . . <i>A. J. Rubin and D. L. Mercer</i>	295
9. Expectations and Limitations for Aqueous Adsorption Chemistry . . . . . <i>M. Anderson, C. Bauer, D. Hansmann, N. Loux and R. Stanforth</i>	327
General Index	349
Index to Elements, Ions and Minerals	355
