

Contents

<i>Preface</i>	iii
<i>Acknowledgements</i>	v
I. Introduction	1
Part I: Theory	
II. Lifshitz–Van Der Waals Forces	7
III. Polar or Lewis Acid-Base Interactions	18
IV. Electrostatic Interactions	46
V. Brownian Movement Forces—Osmotic Interactions of Polymers	66
VI. Rate of Decay with Distance	75
Part II: Experimental Measurement Methods	
VII. Contact Angle and Surface and Interfacial Tension Determination	89
VIII. Preparation of Solid Surfaces	108
IX. Other Approaches for Interpreting Contact Angles and Determining the Surface Tension and Surface Tension Components of Solids	112
X. Electrokinetic Methods	128
	vii

XI.	Relation Between the Hamaker Constant and the Apolar Surface Tension Component	154
XII.	Direct Measurement Methods	161
Part III: Associated Phenomena and Applications		
XIII.	Surface Tension Components and Parameters of Liquids and Solids	170
XIV.	Attractive AB-Forces: "Hydrophobic" Interactions	186
XV.	Repulsive AB-Forces: Hydrophilic Interactions	205
XVI.	The Primary Interactions	231
XVII.	Secondary Phenomena and Interactions	237
XVIII.	Phase Separation in Polymer Solutions; Coacervation and Complex Coacervation	245
XIX.	Solubility of Polymers and Other Solutes	272
XX.	Cell and Particle Stability	308
XXI.	Adsorption and Adhesion in Aqueous Media	333
	<i>List of Symbols Used</i>	377
	<i>References</i>	383
	<i>Index</i>	400
