

CONTENTS

VOLUME 2 FUNCTEONS 1

Chapter 1 Review 4	
1.1 Introduction	6
1.2 Gel Functions	6
1.3 Future Functional Materials	12
References	12
Chapter 2 Functions 15	
Section 1 Absorptivity of Water (Moisture Absorptivity and Retention of Water)	17
2.1 Superabsorbency	17
2.2 Hyalurronic Acid Gels	30
References	43
Section 2 Sustained Release (Water Absorption)-Drug Delivery System	46
2.1 Application of Hydrogels in DDS	46
2.2 Swelling and Shrinking of Polymer Gels	48
2.3 Change of Swelling of Gels and its Effect on Drug Delivery	59
2.4 Drug Delivery Control Using Internal Structural Changes of Gels	68
2.5 Conclusions	76
References	77
Section 3 Adsorption and Separation	80
3.1 Ability to Concentrate Solvent by Gels and Separation of Mixed Solvent by Gel Membranes	80
3.2 Adsorption	105
3.3 Interaction with Natural Materials	120
References	142
Section 4 Transport and Permeation (Diffusion of Materials)	148
4.1 Introduction	148
4.2 Theory of Material Diffusion within Polymer Gels	148
4.3 The Diffusion Coefficient Measurement Methods	151
4.4 Examples of Investigation	153
References	171
Section 5 Insolubility and Supportability (including Absorption of Oil)	173
5.1 Fixation (Microbes, Enzymes and Catalysts Included)	173
5.2 Gelation Agents for Oils	189
References	202
Section 5 Insolubility and Supportability (including Absorption of Oil)	173
5.1 Fixation (Microbes, Enzymes and Catalysts Included)	173
5.2 Gelation Agents for Oils	189

References	202
Section 6 Transparency (Optical Properties)	204
6.1 Transmission of light	204
6.2 Replacement Materials for the Vitreous of Human Eyes	215
6.3 Coloration	225
References	235
Section 7 Energy Conversion	238
7.1 Chemomechanical Polymer Gels	238
7.2 Information Conversion Property	280
References	235
Section 8 Electrical and Magnetic Properties	301
8.1 Electrical Properties	301
8.2 Electroviscous Fluids	311
8.3 Magnetic Fluids	346
References	361
Section 9 Shape Memory Properties	365
9.1 Introduction	365
9.2 Shape Memory of Polymers	366
9.3 Shape Memory Polymer Gels	370
9.4 Characteristics of Shape Memory Materials	374
9.5 Application of Shape Memory Gels	375
References	376
Section 10 Viscosity Enhancement and Flow Properties of Microgels	377
10.1 Microgels	377
10.2 Properties of Microgel Dispersed Liquids	379
10.3 Applications of Microgels	385
References	387
Section 11 Biocompatibility of Hydrogels	388
11.1 The Human Body and Gels	388
11.2 What is Biocompatibility?	391
11.3 Bulk Biocompatibility	393
11.4 Biomaterials	394
11.5 Interfacial Biocompatibility	398
11.6 Conclusions	406
References	406
