

Contents

INTRODUCTION	1
1. BASIC CONSIDERATIONS	
Solutions—Suspensions—Emulsions—Surface Activity	3
2. PROPERTIES OF EMULSIONS	
Particle size and arrangement—Rheology—Micelle Theory—Stability and Interfacial Phenomena—Causes of Unstable Emulsions	13
3. INGREDIENTS AND ADDITIVES	
Surfactants—Emulsifying Agents—Wetting Agents— Foamers—Protective Colloids—Preservatives.....	37
4. ANALYSIS AND TESTING OF EMULSIONS	
Type of Emulsion—Density—Viscosity—Surface Tension—Particle Size—Water—PH—Color—Odor— Corrosion—Stability—Performance—Analytical Proc- edures—ASTM Specifications	53
5. TECHNIQUES OF EMULSIFICATION	
English Method—Continental Method.....	75
6. EMULSIFYING EQUIPMENT	
Low-Shear—High-Shear—Rotor-Stator—Pressurized Fluid—Vibrational Devices—Laboratory Equipment ...	81
7. EMULSION PLANTS AND PRODUCTION MACHINERY	
Over-all Plan—Modes of Operation—Power Re- quirements—Mixing Tanks—Pumps—Conveyors—Ma- terials of Construction—Instrumentation—Packaging ...	99
8. SELECTED TOPICS	
Formulation of Emulsions—HLB—Biodegradability— Regulations	127
BIBLIOGRAPHY	139
LIST OF EMULSIFYING AGENTS	141
SUPPLIERS OF EMULSIFYING AGENTS.....	153
GLOSSARY	157
INDEX.....	179
